

ISO/IEC JTC1/SC2/WG2/IRG N2369R

Universal Multiple-Octet Coded Character Set International Organization for Standardization

Doc Type: ISO/IEC JTC1/SC2/WG2/IRG

Title: Proposed Horizontal Extension to ISO/IEC 10646

Source: John H. Jenkins (井作恒)

Status: Member Body Contribution

Action: None

Date: 2019-05-08

The spreadsheet appended below lists some 150 unified ideographs encoded in ISO/IEC 10646. These are all found in UAX #45, the UTC's database of encoding candidates, but are lacking U-source identifiers. We request that a horizontal extension be made to provide them with appropriate U-source identifiers. This will aid the UTC in tracking encoded characters in UAX #45 and minimize confusion among users.

The spreadsheet is available as a plain text file for convenience of the ISO/IEC 10646 editor.

UTC Proposed Horizontal Extension
