Doc Type: Working Group Document**Title:** **Proposal to encode dashed-box symbols in Plane 14 of the UCS****Source:** **Michael Everson****Status:** **Individual Contribution****Action:** **For consideration by JTC1/SC2/WG2 and UTC****Date:** **2023-06-15**

1. Introduction. (*This document differs from the previous version in that the suggested code points are not ignorable.*) ISO/IEC 10646 and the Unicode Standard make use of 545 glyphs consisting of dashed boxes with some sort of content inside to inform the user as to the use of the formatting or control character which these characters usually represent. (See *The Unicode Standard Version 15 §24.1.*)

This proposal requests the creation of a new block in Plane 14, scoped from E0200–E04FF, to be called “Dashed Boxes”, for encoding as graphic printable characters the glyphs used in the code charts, so that such glyphs can be made available to all users of the standard in an interchangeable way. Since many of these characters are control characters, it is difficult to represent them (impossible, with variation selectors in some environments). But it is reasonable for users of the standard to be able to cite characters visibly using the conventions of the standard. So it makes sense to encode visible glyphs for them, and to put the block in the “specialty” Plane 14 they are “out of the way”. In fact having these glyphs in a formal part of the standard will help editors of the standard now and in future.

Here is a breakdown of the number of dashed boxes in the various blocks in which they occur:

034	C0 Controls and Basic Latin	001	Halfwidth and Fullwidth Characters
034	C1 Controls and Latin-1 Supplement	003	Specials
001	Combining Diacritical Marks	001	Kharoshthi
008	Arabic	003	Brahmi
001	Syriac	002	Kaithi

001	Meetei Mayek Extensions	240	Variation Selectors Supplement
016	Variation Selectors	002	Specials
001	Arabic Presentation Forms-B		

2. Maintenance. The right way to maintain this block, when new scripts or characters are added which have characters displayed with dashed boxes, is to add the new characters to the bucket after the final ballot has closed on the characters they will represent. The delay would be one publication cycle, which is not unreasonable.

3. Character names and glyphs.

The character names append DASHED BOX FOR in front of the UCS character name, or, in the case of some of the ASCII and Latin-1 controls, their aliases. Glyphs derive from the code-chart glyphs, though in the attached code table it can be seen that some identical glyphs have been differentiated by script (chiefly viramas); here they are coloured yellow.

4. Unicode Character Properties.

```
E1000;DASHED BOX FOR NULL;So;0;ON;;;;N;;;;;
..
E12FF;SYMBOL FOR NONCHARACTER;So;0;ON;;;;N;;;;;
```

5. Figures.

1.1 Glyph change. Where a glyph has been changed to a new glyph, a VARIATION SELECTOR can be used after the encoded character to get the font to display the old glyph.

Figure 1. Discussion about the use of Variation Selectors to force the plain-text display of normative glyph shapes in Blissymbolics. Here a glyph for VS1 is given using the Private Use Area, but this is important semantic content and users of the standard should be able to interchange such content in a standardized way.

1.3 Sequence replacement where the replaced character is not an encoded Unicode character. Few people may need to use these forms, but the use of either the ZERO-WIDTH JOINER or an OpenType feature are ways of dealing with them. I will investigate the best way to do it with my Unicode colleagues. The alternative to this kind of representation is to encode the older forms as characters. An example of an “OLD” character that was published but has long remained in the Unicode drafts is PIER. For that, and other characters in this document, the choice is, (1) Do we encode them as glyphs for special sequences:

Or (2) Do we encode the precomposed and older characters alongside one another:

Figure 2. Discussion about the potential use of ZERO-WIDTH JOINER to force the plain-text display of normative glyph shapes in Blissymbolics. This kind of educational discussion and use of symbols would be commonplace in the field of Blissymbolics and Alternative and Augmentative Communication. In this case the use of zwj is accepted and mandated, which means that being able to discuss the character interchangeably is a requirement of this user community. It is obvious that there is general benefit to the encoding of these characters.

The character names append DASHED BOX FOR in front of the UCS character name, or, in the case of some of the ASCII and Latin-1 controls, their aliases. Glyphs derive from the code-chart glyphs, though in the attached code table it can be seen that some identical glyphs have been differentiated by script (chiefly viramas); here they are coloured yellow.

A. Administrative

1. Title

Proposal to encode dashed-box symbols in Plane 14 of the UCS

2. Requester's name

Michael Everson

3. Requester type (Member body/Liaison/Individual contribution)

Individual contribution.

4. Submission date

2023-06-15

5. Requester's reference (if applicable)

6. Choose one of the following:

6a. This is a complete proposal

Yes.

6b. More information will be provided later

No.

B. Technical -- General

1. Choose one of the following:

1a. This proposal is for a new script (set of characters)

No.

Proposed name of script

1b. The proposal is for addition of character(s) to an existing block

Yes.

1b. Name of the existing block

Dashed Boxes.

2. Number of characters in proposal

545

3. Proposed category (see section II, Character Categories)

Category A.

4a. Is a repertoire including character names provided?

Yes.

4b. If YES, are the names in accordance with the character naming guidelines in Annex L of ISO/IEC 10646-1: 2000?

Yes.

4c. Are the character shapes attached in a legible form suitable for review?

Yes.

5a. Who will provide the appropriate computerized font (ordered preference: True Type, or PostScript format) for publishing the standard?

Michael Everson.

5b. If available now, identify source(s) for the font (include address, e-mail, ftp-site, etc.) and indicate the tools used:

Michael Everson, Fontographer.

6a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided?

Yes.

6b. Are published examples of use (such as samples from newspapers, magazines, or other sources) of proposed characters attached?

Yes.

7. Does the proposal address other aspects of character data processing (if applicable) such as input, presentation, sorting, searching, indexing, transliteration etc. (if yes please enclose information)?

No.

8. Submitters are invited to provide any additional information about Properties of the proposed Character(s) or Script that will assist in correct understanding of and correct linguistic processing of the proposed character(s) or script. Examples of such properties are: Casing information, Numeric information, Currency information, Display behaviour information such as line breaks, widths etc., Combining behaviour, Spacing behaviour, Directional behaviour, Default Collation behaviour, relevance in Mark Up contexts, Compatibility equivalence and other Unicode normalization related information. See the Unicode standard at <http://www.unicode.org> for such information on other scripts. Also see Unicode Character Database <http://www.unicode.org/Public/UNIDATA/> UnicodeCharacterDatabase.html and associated Unicode Technical Reports for information needed for consideration by the Unicode Technical Committee for inclusion in the Unicode Standard.

The characters should have the same properties as other symbols.

C. Technical -- Justification

1. Has this proposal for addition of character(s) been submitted before? If YES, explain.

Perhaps. It has been mentioned, to my memory.

2a. Has contact been made to members of the user community (for example: National Body, user groups of the script or characters, other experts, etc.)?

Yes.

2b. If YES, with whom?

I am a user, having needed glyphs for variation selectors, joiners, and so on.

2c. If YES, available relevant documents

3. Information on the user community for the proposed characters (for example: size, demographics, information technology use, or publishing use) is included?

Anyone.

4a. The context of use for the proposed characters (type of use; common or rare)

Not terribly common.

4b. Reference

5a. Are the proposed characters in current use by the user community?

Yes.

5b. If YES, where?

In printed publications, discussions of writing systems or other features of the characters in the standard.

6a. After giving due considerations to the principles in Principles and Procedures document (a WG 2 standing document) must the proposed characters be entirely in the BMP?

No.

6b. If YES, is a rationale provided?

6c. If YES, reference

7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)?

8a. Can any of the proposed characters be considered a presentation form of an existing character or character sequence?

No.

8b. If YES, is a rationale for its inclusion provided?

8c. If YES, reference

9a. Can any of the proposed characters be encoded using a composed character sequence of either existing characters or other proposed characters?

No.

9b. If YES, is a rationale for its inclusion provided?

9c. If YES, reference

10a. Can any of the proposed character(s) be considered to be similar (in appearance or function) to an existing character?

No.

10b. If YES, is a rationale for its inclusion provided?

10c. If YES, reference

11a. Does the proposal include use of combining characters and/or use of composite sequences (see clauses 4.12 and 4.14 in ISO/IEC 10646-1: 2000)?

No.

11b. If YES, is a rationale for such use provided?

11c. If YES, reference

12a. Is a list of composite sequences and their corresponding glyph images (graphic symbols) provided?

No.

12b. If YES, reference

13a. Does the proposal contain characters with any special properties such as control function or similar semantics?

No.

13b. If YES, describe in detail (include attachment if necessary)

14a. Does the proposal contain any Ideographic compatibility character(s)?

No.

14b. If YES, is the equivalent corresponding unified ideographic character(s) identified?
