Universal Multiple-Octet Coded Character Set

(U C S)

ISO/IEC JTC 1/SC 2/WG 2 ***N 1300***

Date: 1995-10-20

Title:	Document Register <i>(N 1 - N 1271)</i>
Source:	Mike Ksar, Convenor
Action:	For your records
Distribution:	ISO/IEC JTC 1/SC 2/WG 2 members

This document register is a cumulative list of all documents issued by SC2/WG2 since its inception. I inherited this document register from Jerry Andersen, the former convenor of WG2, who in turn inherited its early part from Peter Fenwick, the first convenor of WG2. I do not have all these documents in my archives except for the ones that I mailed out but I do have some of the older ones when I started to participate in WG2 in an active role.

Standing documents are ones that are in **bold** and underlined.

Document Number	Title	Source	Date
1	Register of documents tabled at Kyoto and ad-hoc meeting		
2	Draft agenda of Kyoto ad-hoc meeting		
3	Initial membership and mailing list		
4R	WG2 program of work (=97/2 N 1436) and goals (=97/2 N 1436 Annex)		
5	Proposed framework for WG program of work	SC2 Secretariat	
6	971214 N 486: "Three Papers.. " (= X3L2/83-134 + 97/2 N 1412+ 971211 N 68)		
7	Proposals for 2-byte graphic character set from AFNOR (=97/2 N 1376 =971211 N 75)		
8	Relationship of proposed 2-byte standard and existing 2-byte standards	Tom Hastings	
9	Japanese code table of JIS C 6226-1983 (regn. proposal 87)		
10	Chinese code table of GB 2312-80 (regn. proposal 58)		
11	Some questions on 2-byte ISO standard	Masami Hasegawa	
12	Registration of New Work item 97.2.18 - international 2-byte character set (=97/2 N 1380)		
13	Calling notice for 1st WG2 meeting (Geneva), and suggested agenda items		
14	Language scripts and coding structure	Japan	
15	Suggestions for structure of 2-byte standard	T. N. Hastings	
16	Specifying graphic characters by name versus by meaning	T. N. Hastings	
17	World Scripts	John Clews	
18	What Names?	Hugh McG. Ross	
19	Liaison Statement from ECMA/TC1 (=97/2 N 1457)		
20	Usage of "dot-under" in transliterations	P. W. Fenwick	
21	Agenda for the first meeting		
22	The Xerox character code		
23	US position on 2-byte character code structure		
24	US position on multiple ideographic languages' requirements		
25	US position on shape vs. meaning		
26	Generalized n-byte encoding	R. J. Pellar	
27	(unused document number)		
28	Report of the 1st meeting (Geneva) (=97/2 N 1492)		
29	(unused document number)		

30	(unused document number)		
31	Calling notice for the 2nd meeting (Turin) (=97/2 N 1519)		
32	The inter-relation of character codes	Hugh McGregor Ross	
33	On the coding of accented letters	H. McG. Ross	
34	The requirements of languages that use the Cyrillic script	H. McG. Ross	
35	Requirements of the Greek language and script	H. McG. Ross	
36	Requirements of world languages that use the Roman script	H. McG. Ross	
37	Trial of fitting the Roman, Cyrillic and Greek scripts into the 16-bit character code	H. McG. Ross	
38	Shape/meaning and character set issues	Gary Watson	
39	Revised proposal for ANSI printing/publishing graphic character sets, with Adobe character and symbol sets appended		
40	Potential 16-bit code structure	Thomas O. Hotley	
41	Comments on the direction of WG2	Japan	
42	Proposal for 16-bit code structure	Eiiti Wada	
43	Alternatives for mixing left to right languages and right to left languages	Tom Hastings	
44	Comments by ECMA on the direction of work on "2-byte" codes (=97/2 N 1496)		
45	Goals for 2-byte coding system what coding cannot do/contradictions between criteria	Lloyd B. Anderson	
46	..fully-formed characters vs. composition-from-parts in codes and some misleading terminology	Lloyd B. Anderson	
47	Proposal for a dp 2-byte standard	R. J. Pellar	
48	Korean industrial standard KS C 5619 (multi-byte code)		
49	Korean 7- & 8-bit codes KS C 5601		
50	Transliteration of Hebrew Slavic Cyrillic and Arabic characters (=ISO 259 + ISO/DIS 9.3 + ISO 233)		
51	Suggestions for process .. to select characters and coding	T.N. Hastings	
52	(1st) Proposal for structure of 2-byte code	T. N. Hastings and M. Hasegawa	
53	Improved standard means for providing a "Custom 8-bit Code Table"	T. N. Hastings	
54	2nd proposal for structure of 2-byte code assuming multiple planes	T. N. Hastings and M. Hasegawa	
55	Outline of NTT set of additional Kanji characters		
56	Introduction to Chinese code GB 2312 (=46/4 N 167)		
57	Report of the 2nd meeting (Torino)		
58	Calling notice for the 3rd meeting (London)		
59	Mailing list of ISO/TC97/SC2/WG2		

60	Document register: 971212 N 1 to N 60		
61	Another alternative	P. W. Fenwick	
62	=SC2 N 1559: 1st WG2 progress report	P. W. Fenwick	
63	Results of the four letter ballots on the work of WG2	PWF	
64	US position paper on the two octet code structure		
65	An example of full 16-bit code table	Masami Hasegawa	
66	Names of special characters from JIS 6226		
67	Necessity of additional Kanji code sets in Japan		
68	SINHA: computer processing of Indian languages		
69	Extended Georgian alphabet	Lloyd B. Anderson	
70	Discovering "extended" non-western alphabets	L. B. Anderson	
71	Proposed 16-bit code structure	Tom Holtey	
72	Processing.vs. backwards compatibility	L. B. Anderson	
73	Xerox character set allocation		
74	Types of evidence relevant to character code structure	Lloyd B. Anderson	
75	General considerations for structured codes	L. B. Anderson	
76	Japanese comments on the two extra WG2 questions		
77	Coding system in the international version of UN IX	K. Suzuki	
78	Superscript/subscript as operators...	Lloyd B. Anderson	
79	=461411 N 98 Hebrew character set	R. J. M. Gabriel	
80	=461411 N 80, Arabic character set	R. J. M. Gabriel	
81	=46/4 N 165, the coding of Arabic script		
82	Alternatives for structure of 2-byte code	Tom Hastings	
83	Reasons for including 8859 1 as a single row	Tom Hastings	
84	Rows 1-7 commonality in GB2312 & JIS 6226	John Clews	
85	Eight more alternatives	Tom Hastings	
86	Requirements to make migrations easier	Masami Hasegawa	
87	PWF's "Alternative 4" in 256/256 table		
88	=461411 N 135, Armenian character set	R. J. M. Gabriel	
89	=46/4/l N 136, Georgian character set	R. J. M. Gabriel	
90	=46/4/l N 139, Character sets for a further extended Latin set	R. A. Christophers	
91	Chinese outline of code table		
92	Report of the 3rd (London) meeting		
93	Venue of the 4th meeting (London)		
94	A technical strategy for compatibility between '8859, 6937 & the ISO multi-octet graphic character set standard	Tom Hastings & Tim Lasko	
95	Proposal for .. Hebrew character set ..	Tom Hastings	
96	Proposal for the editorial format and organization of a	Tom Hastings	

	first working draft of the ISO multi-octet graphic character set standard		
97	(unused document number)		
98	=46/4/1 N 81 (April 1976) international phonetic alphabet character set	R. J. M. Gabriel	
99	Meaning shape and direction of presentation	Joel Berson	
100	The macro structure of a proposed 16-bit code	Hugh McG. Ross	
101	The micro structure of a proposed 16-bit code	Hugh McG. Ross	
102	On the upper limit of multiple octet code representation	Masami Hasegawa	
103	Private use characters in the multiple octet standard	Masami Hasegawa	
104	Follow-up and corrections to N 94	Tom Hastings & Tim Lasko	
105	(Part) JIS C 6226 & GB 2312 code tables showing commonality of coding in 1st seven rows	John Clews	
106	Extract from GB 2312: names of general characters		
107	Proposal for technical publishing output rendering and line drawing graphic character sets	Tom Hastings	
108	Latin character sets within the proposed 2-octet standard	Tom Hastings Masami Hasegawa & Piotr Koziol	
109	8-8 or 16-bit coding of controls	P. W. Fenwick	
110	Report of the 4th (London Feb '86) meeting		
111	Venue and draft agenda of the 5th meeting (London June 1986)		
112	One alternative. . .working draft. .."Two octet world alphabet Nr 1 "	Tom Hastings Piotr Koziol & Tim Lasko	
113	Conversion between 7-7 and 16-bit codes	P. W. Fenwick	
114	Code conversion of ideographic characters between 8-8 bit code table and 16 bit code table	Eiiti Wada	
115	Types of scripts and languages using them etc. Extracts from Gilyarevsky & Grivnin's 'Languages Identification Guide'.		
116	Protocol to deal with a multiplicity of character codes	Hugh McG Ross	
117	Comment on proposals for a 2-byte code	Hugh McG Ross	
118	Non-ideographic spill planes	Masami Hasegawa	
119	Japanese. . .UNIX mixed single and double byte code (expansion of N 77)	Kouichi Suzuki	
120	Status of character set standards in some Asian countries	Masami Hasegawa	
121	Request for WG2 to include three or four octet structure and coding in its ISO standard	from Japan	
122	Future revision of national standards	from Japan	
123	Comments on two octet code versus greater than two octet code	Masami Hasegawa Tom Hastings Piotr Koziol & Tim Lasko	

124	Coding of narrow and wide characters	Masami Hasegawa	
125	(=ANSC X3L2 86-106 rev) Maximization of compatibility of the proposed two octet and one byte standards being developed by SC2/WG4 and SC2/WG7	US	
126	(=ANSC X3L2/86-108 rev) US position on structure and fill criteria for ISO two octet standard		
127	Response to N 99	Dara Hekimi	
128	Response to N 127	Joel Berson	
129	Potential 16-bit code structure - 2nd edition	T. O. Holtey
