Title:	Defect report of J-column in the CJK Unified Ideographs
Source:	Japanese National Committee for JTC 1/SC2
Status:	---
Action:	To be considered by WG2

Japan has completed the review of J-column in the CJK Unified Ideographs of 10646 UCS part 1 and we request to correct the shapes of following 9 ideographs and further request to improve the quality of printed ideographs in J-column.

1. Wrong shape ideographs

Japan requests to correct 9 ideographs that are shown in the attachment.

2. Improvement of printing quality

Totally, quality of printed ideographs in J-column are not good (stroke is bolded, element is blused, etc.). We are afraid that UCS user misunderstands actual shapes of j-column ideographs.

We request to improve the quality of printed ideographs in J-column.
