This document supersedes ISO/IEC JTC/1 SC/2 WG2 N2148 which was a place holder for Beijing agenda.
This is what Cambodia and Japan want to discuss at Beijing.

Attached please find a counter proposal from Cambodia about AMD-25.

Sato proposes WG2 should consider this proposal as a request of corrigendum from national body of Cambodia.

Sato understands the fact that this proposal is including the deletion of the characters, and the deletion is not normal practice of coded character set development.

However, the request must be reviewed seriously, because:
1. The request is from the native user of the script.
2. AMD-25 is not a proven character set by usage of native user.
3. The AMD-25 has been approved since October 1999, there has been on the street for very short period of time, thus impact of the deletion might be minimum. This is a last chance to make a correction.
