Title: Actions for UTC and Editorial Committee in response to L2/01-430R

Source: Rick McGowan

Date: Nov 8, 2001

1. ACTIONS FOR UTC

Characters to be added to the standard:

```
0904 DEVANAGARI SHORT LETTER A

09BD BENGALI SIGN AVAGRAHA

0A01 GURMUKHI SIGN ADAK BINDI
0A03 GURMUKHI SIGN VISARGA

0A8C GUJARATI LETTER VOCALIC L
0AE1 GUJARATI LETTER VOCALIC LL
0AE2 GUJARATI VOWEL SIGN VOCALIC L
0AE3 GUJARATI VOWEL SIGN VOCALIC LL
0AF1 GUJARATI RUPEE SIGN

0B35 ORIYA LETTER VA

0CBC KANNADA SIGN NUKTA
0CBD KANNADA SIGN AVAGRAHA
```

2. ACTIONS FOR EDITORIAL COMMITTEE

ACTION: Add comments for Sindhi, etc to the Devanagari block introduction as per page 17.

ACTION: Add Konkani specific remarks to the Devanagari block introduction, as illustrated on page 17.

ACTION: The block introductions for Indic scripts should specify where users are to look for the DANDA and DOUBLE DANDA characters (in the Devanagari block).

ACTION: 094D. A change in the character name is suggested. UTC might want to make an annotation, since a name change is not possible.

ACTION: 0970. The document suggests an annotation or explanation which is suitable. Suggested action: add explanation.

ACTION: Page 17, 09F4, 09F5, 09F6. Changes in namelist annotation will be added to the list of proposed additions.

ACTION: 09F4, 09F5, 09F6. Changes in namelist annotation added to the list of proposed additions.

ACTION: The block introduction should point out that the sign called "Khanda" is encoded at U+262C and may be used in Gurmukhi text.

ACTION: 0B66. The shape/size of the representative glyph for the "zero" character should be changed. The document gives some detail as to why it should be smaller than 0B20, avoiding confusion. Suggested UTC action: amend the charts for this character.

ACTION: The document suggests removing the annotation under character 0B2C; probably because it also suggests the addition of an Oriya "va" character at 0B35. Remove the annotation;

ACTION: 0664-0667. Consider adding annotations for the variant digit shapes. If an annotation for Sindhi is added at 0664-0667, then the text should also mention Farsi and Urdu variations, as applicable. Likewise, similar text for Sindhi could be included at 06F4-06F7.

ACTION: Make erratum for 0A33. Move the nukta to the other side of the glyph. Should be corrected in the next edition of the standard.
