Finland	DISAPPROVAL - In our consultation with other national bodies on this, we have become aware of the forthcoming negative US comments that we find both relevant and appropriate. We believe that it would serve no useful purpose and be utmost inefficient if we were to reformulate them by ourselves, especially since we believe that it would be difficult if not impossible to try to solve the problems inherent in this DTR with pointed, individual editing instructions.

We need to maintain the disapproval votes – and I believe, France's vote was a mistake. We have to win a few that approved the first DTR or did not vote at all – we might have a chance with Austria, Egypt, Japan, Netherlands, and possibly China and Korea.
