

Title: Characters approved by UTC for addition to Unicode 4.1**Date: 2003-09-28****N2623R**

Status: contributing editor's summary of liaison contributions

Action: for review at WG2 meeting 44 in Mountain View, California.

Distribution: WG2 delegates

Status

The characters presented in this document have been reviewed by the Unicode Technical Committee and have been approved by UTC for addition to a future version of the Unicode Standard, unless noted otherwise.

They have not yet been approved by WG2. Proposals for these characters have been submitted to WG2, or are in the process of being submitted at this time. The WG document number for all proposals has been provided for reference.

The revised version of this document corrects a few glyph errors.

The characters have been presented in the same style that would be used for publishing the Unicode Standard. This was done deliberately in order to be able to document some of the draft annotations for the reviewers.

The character names and code points would be the same, with exception of the ISO character name comments and Annex P annotation '*'. Where such omission occurs, it has been noted in an annotation.
