

WG2 N2697 L2/04-024

ISO/IEC JTC 1/SC 2
Coded Character Sets
Secretariat: **Japan (JISC)**

DOC. TYPE	Application for Registration	
TITLE	Application for Registration No. 233, Japanese Graphic Character Set for Information Interchange, Plane 1 (Update of ISO-IR 228)	
SOURCE	National Body of Japan	
PROJECT		
STATUS	In accordance with ISO/IEC 2375, this document is circulated to the SC 2 members for comment.	
ACTION ID	COM	
DUE DATE	2004-03-24	
DISTRIBUTION	P, O and L Members of ISO/IEC JTC 1/SC 2 ; ISO/IEC JTC 1 Secretariat; ISO/IEC ITTF	
ACCESS LEVEL	Def	
ISSUE NO.	177	
FILE	NAME SIZE (KB) PAGES	02n3712.pdf 25

Secretariat ISO/IEC JTC 1/SC 2 - IPSJ/ITSCJ *(Information Processing Society of Japan/Information Technology Standards Commission of Japan) Room 308-3, Kikai-Shinko-Kaikan Bldg., 3-5-8, Shiba-Koen, Minato-ku, Tokyo 105-0011 Japan *Standard Organization Accredited by JISC

NAME: Japanese Graphic Character Set for Information Interchange, Plane 1 (Update of ISO-IR 228)					
DESCRIPTION: A set of 8797 graphic characters contained in 94X94 character cell plane that can be invoked 7-bits or 8-bits double byte environment. This registration added 10 graphic characters to ISO-IR 228 and changed character names of 128 graphic characters for compatibility purpose with ISO/IEC 10646. Also, shapes of 168 graphic characters have been modified. (See attachment for details)					
SPONSOR: Japanese Industrial Standard Committee (JISC)					
ORIGIN: JIS X 0213:2000 Plane 1 and JIS X 0213/AMENDMENT 1: 2004					
OWNER OF ORIGIN: JISC					
COPYRIGHT OWNER: JISC					
FIELD OF UTILIZATION: Information Interchange between Data processing systems (including their related devices) or Data communication Systems. Applicable for both Data and Document processing.					
NOTE: Background Information on JIS X 0213/Amd 1 is attached to this registration.

JIS X 0213 AMD-1 Summary

(informative note)

1. Background

The National Language Council (Agency for Cultural Affairs a part of Ministry of Education, Sports, Science and Technology –Japan) published the “The form of Kanji characters not listed in the Joyo Kanji Table” on Dec. 8, 2000.

The publication describes about the most preferable form (abstract shape, a kind of glyph) of the Kanji characters out side of Joyo Table. (Note: The Joyo table defines a form of the basic Kanji)

There are two parts of discussion, one is general principle for the selection of the most preferable form for all cases, and another is an actual print of the most preferable form for 1022 Kanji and 22 of the allowable simplified form.

JIS X 0213 AMD-1 is a reflection of the 1022 + 22 forms on to the JIS X 0213: 2000 as a printed sample shapes such that no conflict occurs between JIS X 0213 and the publication of The National language Council.

2. Contents of JIS X 0213: 2000 AMD-1

The amendment includes following

- Replace of printed sample form of 168 Kanji characters (all of them on plane-1)
- Addition of 10 dis-unified Kanji characters for the purpose of interoperability with ISO/IEC 10646
- Associated revision of the “unification rule to be used in JIS X 0213”
- Character name correction and USI description for some characters to make the JIS X 0213 consistent with ISO/IEC 10646
- Related texts changes.

Therefore, there is no implication on ISO/IEC 10646. Also, the amendment affects only on plane-1 of the JIS X 0213: 2000, therefore, the new final byte is needed only for the plane-1, nothing is needed for the plane-2 of the JIS.

3. 168 form changes

The 1022+22 forms are all within the range of the unification rule of the JIS X 0213, therefore, in theory, no need to change the printed sample forms (following the publication). However, to avoid the confusion of the users, JISC decided to revise the form. Fortunately, JIS X 0213 and the publication are using the same common typeface for printing of the JIS, it was easy to compare the forms. In fact, The National Language Council made a necessary modification on the font that was used for printing the JIS X 0213. There is no big room for discussion of which is which.

Out of 227 modified characters (815 were used without any modification), 168 forms were replaced. Because of the form differences are significant for some users (those are still within unification range). Those 168 characters are listed in Attachment A. The table shows code position of the JIS X 0213 along with the new form.

The code value is shown in 1-XX-YY format and the new form is the right side of the code. 1 stands for plane-1, XX is for row number and YY is for cell number of the JIS X 0213.

Mapping to the code points to the ISO/IEC 10646 are not changed.

4. Dis-unified 10 characters.

There are 10 characters that should be unified in JIS X 0213. Besides, those characters are already encoded as separated characters in ISO/IEC 10646. Even if, for JIS X 0213, there is no need to dis-unify those characters, for compatibility purpose with ISO/IEC 10646, JIS decided to dis-unify those characters (10 characters) and add the 10 characters on plane-1 as an amendment-1.

Attachment B shows the 10 characters.

Table structure is as follow

The most left column: 5 character code related data

2nd column: New sample form of the character

3rd column: Radical code and number of stroke in JIS X 0213 method

The most right column: related data

The most left column: There are 5 numbers within one line.

- Top number: 1-XX-YY format. 1 stands for plane-1 of the JIS X 0213, XX is for row number and YY for cell number of the JIS X 0213.
- Middle left number: Bit combination when assigned for GL
- Middle right number: Bit combination when assigned for GR
- Lower left number: Bit combination for Shift-JIS
- Lower right number: Mapping to ISO/IEC 10646 (This is the mapping data)

Related data (the right column): This character is dis-unified from the character specified this column (with plane, row and cell number)

5. Character name changes.

JIS X 0213: 2000 included about 200 of characters which are not CJK and not included in ISO/IEC 10646 at the time of JIS X 0213: 2000 publication.

The characters were proposed to ISO/IEC JTC1 SC2 WG2 for addition to ISO/IEC 10646. About a half of the characters were accepted as proposed, and 168 of them were responded as one of followings from the WG.

- Proposed character name was recommended to change to the better name.
- The character is recommended to unify with the character that is already in ISO/IEC 10646. This means to use the character name of the name in ISO/IEC 10646.
- The character should be expressed by using USI in the ISO/IEC 10646 environment. This means that the proposed character was not accepted.

JIS X 0213 development committee accepted the WG2 responses. And decided to change a name of the 128 characters. Those new character names are listed in Attachment C.

The second to left column of the table is the plane, row-cell number of the character, the left column is the new character name along with the BLOCK NAME.

The third column is mapping data for ISO/IEC 10646 (and JIS X 0221), in case of characters that are expressed by, mapping information to the ISO/IEC 10646 using a sequence of the characters of the ISO/IEC 10646 and local character name are expressed within parenthesis.

Attachments

Attachment A: 168 characters that the printed form are changed

Attachment B: 10 characters added as AMD-1

Attachment C: 128 characters for character name change
