

Provisional Draft of Unicode 4.1 Additions

L2/04-237

Date: 2002-06-07

N2764

Source: Asmus Freytag, contributing editor

Status: contributing editor's summary of character proposals and ballot comments. Input document for FPDAM

Action: for review by WG2 and other experts prior to WG2 meeting in Toronto

Distribution: WG2 delegates and experts

Replaces: N2676

Status

The characters presented in this document are those from the PDAM ballot document plus some of the proposed characters from National Body comments. Characters that were not part of the ballot document have been highlighted. Most of the characters presented in this document have been reviewed by the Unicode Technical Committee — where they have been approved by UTC for addition to a future version of the Unicode Standard, that information is presented in a marginal note. A series of \$\$\$\$ indicates the presence of a issue that needs to be resolved as part of synchronization.

Manner of Presentation

The characters have been presented in the same style that would be used for publishing the Unicode Standard, with the addition of marginal notes documenting the source of the characters. This was done deliberately in order to be able to document some of the draft annotations for the reviewers.

The character names and code points shown are the ones that will be used in the FPDAM, with exception of any ISO character name comments and Annex P annotation '*', which are suppressed in this style of presentation. Where such omission occurs, it has been noted in an annotation.

Unlike the presentation style to be used for the actual FPDAM, but like document N2676 which this document replaces, the new characters are not shown in the context of the existing characters. The existing characters will be shown in the actual PDAM document. The occasional use of the word <reserved> in this draft is an artifact of the production process and should be ignored.

Note to Reviewers

Please use this document as a guide when reviewing the ballot comments.

Contents

The following list shows all 32 blocks to which characters will be added. Entirely new blocks are indicated with a * for blocks added for the PDAM, and ** for blocks added for the FPDAM. Blocks with comments from the PDAM are noted with a +
