

Universal Multiple-Octet Coded Character Set (UCS)  
Jeu universel de caractères codés sur plusieurs octets (JUC)

**L2/04-284**

**ORGANISATION INTERNATIONALE DE NORMALISATION**  
**Международная организация по стандартизации**  
**INTERNATIONAL ORGANIZATION FOR STANDARDIZATION**

**Doc Type: Working Group Document**

**Title: Unanimous recommendations on the encoding of the Uighur, Kazakh and Kirghiz Arabic characters**

**Source: Ad-hoc on Uighur: Wushauer Silamu (China), Qin Lu (China), Behdad Esfahbod (Iran), Aïcha Bouhjar (Morocco), Patrick Andries (Canada)**

**Status: Ad Hoc Report**

**Action: For consideration by JTC1/SC2/WG2**

**Date: 2004-06-23**

The document in the current form cannot be accepted since a letter proposed (U+076E) is already encoded in ISO/IEC 10646 as ALEF MAKSURA U+0649. Moreover, in the current proposal there are characters proposed with eight different contextual forms, but the logic behind to choose one of this eight forms is not provided.

China will revise its document N2820 and provide a revised version of it at the next WG2 meeting.

Please consider ISO/IEC 10646's direction to use USI (Unique Sequence Identifiers) as a solution for Uighur letters when updating the document.
