## Proposal for Stabilized Standards within SC 2

SC 2 recommends to JTC 1 that the following standards be stabilized.

### Rationale:

These coded character set standards have been widely used and basically did not change its basic architecture and repertoire. There is little chance to revise these standards.

ISO/IEC 646:1991	Information technology -- ISO 7-bit coded character set for information interchange
ISO 962:1974	Information processing -- Implementation of the 7- bit coded character set and its 7- bit and 8-bit extensions on 9- track 12,7 mm (0.5 in) magnetic tape
ISO 1113:1979	Information processing -- Representation of the 7- bit coded character set on punched tape
ISO 1154:1975	Information processing -- Punched paper tape -- Dimensions and location of feed holes and code holes
ISO 1681:1973	Information processing -- Unpunched paper cards -- Specification
ISO 2033:1983	Information processing -- Coding of machine readable characters (MICR and OCR)
ISO 2047:1975	Information processing -- Graphical representations for the control characters of the 7- bit coded character set
ISO 3275:1974	Information processing -- Implementation of the 7- bit coded character set and its 7- bit and 8- bit extensions on 3,81 mm magnetic cassette for data interchange
ISO/IEC 4873:1991	Information technology -- ISO 8-bit code for information interchange -- Structure and rules for implementation
ISO 5426:1983	Extension of the Latin alphabet coded character set for bibliographic information interchange
ISO 5427:1984	Extension of the Cyrillic alphabet coded character set for bibliographic information interchange
ISO 5428:1984	Greek alphabet coded character set for bibliographic information interchange
ISO/IEC 6429:1992	Information technology -- Control functions for coded character sets
ISO 6438:1983	Documentation -- African coded character set for bibliographic information interchange
