# Arabic Mathematical Old Symbols, <br> Additional characters proposed to Unicode 

Azzeddine Lazrek<br>lazrek@ucam.ac.ma<br>Cadi Ayyad University, Faculty of Sciences<br>P.O. Box 2390, Marrakech, Morocco<br>Phone: +212 44434649 Fax: +212 44437409<br>URL: http://www.ucam.ac.ma/fssm/rydarab

July 10, 2005

A special system of Arabic-Indic numerals has been in use in North Africa rump since the $\mathrm{X}^{\mathrm{e}}$ century. It remained in use until the XVII ${ }^{\mathrm{e}}$ century. This system has been especially used in the administration of the city of Fees in Morocco. It has also been used in Spain starting from the XII century. The forms of the digits are quiet different from the Arabic or the Arabic-Indic digits in use today. The system of numeration was decimal, but not positional. There are Arabic-Rwmy digits (see Table 1), Arabic-Rwmy numbers (see Table 2) and Arabic-Rwmy fractions (see Table 3). It has been described by the mathematician Ibn Al-Banna (1256-1321, Marrakech) in his famous book [1] "Abstract of using rwmy in calculus" in Arabic (namely AlAYqtDAb mn al-Eml b-al-rwmI fl al-HsAb). This system is also known as "time letters, calculus letters, Roman, Fès letters" (namely Hrwf al-zmAn, Hrwf al-HsAb, al-rwmI, Hrwf fAs).

- Arabic-Rwmy unities are:

- Arabic-Rwmy hundreds are: $\boldsymbol{z}, \boldsymbol{y}, \boldsymbol{4}, \boldsymbol{\in}, \boldsymbol{y}, \mathfrak{\}}, \boldsymbol{e}$
- Arabic-Rwmy thousands are noted by one bar under the number (ex., $\geq$ for three thousands);
- Arabic-Rwmy million are noted by two bars under the number (ex., for three million);
- and so on.
- fractions are also noted by:

The Rwmy and AntiSym fonts available, includes all these characters. In Rwmy font, the shapes of the reference glyphs are scanned from [1], in OpenType format and converted in METAFONT as a $\mathrm{LA}_{\mathrm{E}} \mathrm{X}$ package [3]. In AntiSym font, glyphs are drawing by hand in METAFONT as a $\mathrm{AT}_{\mathrm{E}} \mathrm{X}$ package [2].

Some boxes are add to some symbols in Figures in order to emphases them and understand the purpose of the samples.

More information about this presentation is available in [4].

ARABIC－RWMY DIGIT ONE
$\approx 00311$ digit one
$\approx 0661$｜Arabic－Indic digit one

## 万

ARABIC－RWMY DIGIT TWO $\approx 00322$ digit two
$\approx 0662$ r Arabic－Indic digit two
7 ARABIC－RWMY DIGIT THREE $\approx 00333$ digit three $\approx 0663 \upharpoonright$ Arabic－Indic digit three
ARABIC－RWMY DIGIT four $\approx 00344$ digit four
$\approx 0664$ \＆Arabic－Indic digit four ARABIC－RWMY DIGIT FIVE $\approx 00355$ digit five $\approx 0665 \circ$ Arabic－Indic digit five ARABIC－RWMY DIGIT SIX $\approx 00366$ digit six $\approx 0666$ ヶ Arabic－Indic digit six ARABIC－RWMY DIGIT SEVEN $\approx 00377$ digit seven $\approx 0667 \vee$ Arabic－Indic digit seven
5 ARABIC－RWMY DIGIT EIGHT $\approx 00388$ digit eight $\approx 0668 \wedge$ Arabic－Indic digit eight
〕 ARABIC－RWMY DIGIT NINE $\approx 00399$ digit nine
$\approx 0669$ 9 Arabic－Indic digit nine
Table 1：Arabic－Rwmy digits

ARABIC-RWMY NUMBER TEN

- used as a symbol with a numeric value of 10

ARABIC-RWMY NUMBER TWENTY

- used as a symbol with a numeric value of 20
- ARABIC-RWMY NUMBER THIRTY
- used as a symbol with a numeric value of 30
$\}$ ARABIC-RWMY NUMBER FORTY
- used as a symbol with a numeric value of 40

ARABIC-RWMY NUMBER FIFTY

- used as a symbol with a numeric value of 50
$\sum$ ARABIC-RWMY NUMBER SIXTY
- used as a symbol with a numeric value of 60

」 ARABIC-RWMY NUMBER SEVENTY

- used as a symbol with a numeric value of 70
$\boldsymbol{\omega}$ ARABIC-RWMY NUMBER EIGHTY
- used as a symbol with a numeric value of 80
< ARABIC-RWMY NUMBER NINETY
- used as a symbol with a numeric value of 90

I ARABIC-RWMY NUMBER HUNDRED

- used as a symbol with a numeric value of 100
y ARABIC-RWMY NUMBER TWO HUNDRED
- used as a symbol with a numeric value of 200

ARABIC-RWMY NUMBER TREE HUNDRED

- used as a symbol with a numeric value of 300
(ARABIC-RWMY NUMBER FOUR HUNDRED
- used as a symbol with a numeric value of 400
? ARABIC-RWMY NUMBER FIVE HUNDRED
- used as a symbol with a numeric value of 500

2 ARABIC-RWMY NUMBER SIX HUNDRED

- used as a symbol with a numeric value of 600
< ARABIC-RWMY NUMBER SEVEN HUNDRED
- used as a symbol with a numeric value of 700

3. ARABIC-RWMY NUMBER EIGHT HUNDRED

- used as a symbol with a numeric value of 800
e ARABIC-RWMY NUMBER NINE HUNDRED
- used as a symbol with a numeric value of 900

Table 2: Arabic-Rwmy numbers

## ARABIC-RWMY

- used as a symbol with a numeric value of $1 / 2$

## ARABIC-RWMY

- used as a symbol with a numeric value of $2 / 3$

ARABIC-RWMY

- used as a symbol with a numeric value of $3 / 4$

ARABIC-RWMY

- used as a symbol with a numeric value of $4 / 5$

ARABIC-RWMY

- used as a symbol with a numeric value of $5 / 6$

ARABIC-RWMY

- used as a symbol with a numeric value of $6 / 7$

ARABIC-RWMY

- used as a symbol with a numeric value of $7 / 8$

## $25^{6}$

ARABIC-RWMY

- used as a symbol with a numeric value of $8 / 9$

- used as a symbol with a numeric value of $9 / 10$

ARABIC-RWMY

- used as an other symbol with a numeric value of $1 / 2$

ARABIC-RWMY

- used as a symbol with a numeric value of $1 / 3$

## ARABIC-RWMY

- used as a symbol with a numeric value of $1 / 4$

4. ARABIC-RWMY

- used as an other symbol with a numeric value of $2 / 3$
