FROM: Debbie Anderson (message from Strudwick forwarded by M. Everson)
RE: Report from Oxford Meeting of IAE Computer Group (Informatique et Egyptologie,
I&E), 7-10 August, 2006
DATE: 9 September 2006

Below is a message from Nigel Strudwick, one of the organizers of the August 2006 IAE
Computer Group meeting in Oxford, in response to the presentation by Michael Everson
and Bob Richmond ("Towards a proposal to encode Egyptian hieroglyphs in Unicode")

Subject: Unicode

Dear Michael

This is the 'formal' email following up on the presentation of your proposal at the I&E
meeting in Oxford last week.

The meeting has given its approval to the proposal as you are putting it forward at
present. However, everyone there who is interested would ask to be kept informed of the
various issues and questions which need resolving. You now must have a better list of
interested persons than before, and so please copy us all in on correspondence. I would
suggest that you circulate an email with your outstanding questions and proposed
changes to the proposal.

Best wishes

Nigel Strudwick
