

Title: Summary of repertoire for PDAM 4 of ISO/IEC 10646**File: uc52-b.lst****Date: 2006-09-28****N3176**

Source: Asmus Freytag, contributing editor

Status: contributing editor's summary of the character repertoire as result of changes in M49

Action: for review by WG2 and UTC experts

Note

This document is a summary of the tentative repertoire for the amendment. It is intended for the convenience of the WG2 delegates. A separate ballot document will be submitted by the project editor after the meeting.

Status

This document presents a summary of all characters that constitute the tentative repertoire of the amendment, with code positions, representative glyphs and character names.

In this document, the names and code positions are shown as currently approved by WG2 for the text of the forthcoming ballot.

The purpose of this document is to allow WG2 delegates to review the character names, code positions and glyphs and notify the editor if they differ from what was approved in the meeting.

The WG2 document number for all proposals has been provided for reference, as has the UTC document number in some cases for the convenience of UTC reviewers.

Many characters presented in this document have also been reviewed by the Unicode Technical Committee — where they have been approved by UTC for addition to a future version of the Unicode Standard, that information is presented in a marginal note. A series of \$\$\$\$ indicates the presence of a issue that needs to be resolved as part of synchronization.

Manner of Presentation

The characters have been presented in the same style that would be used for publishing the Unicode Standard, with the addition of marginal notes documenting the source of the characters. This was done deliberately in order to be able to document some of the draft annotations for the reviewers.

The character names and code points shown are the same for Unicode and ISO/IEC 10646, with exception of any ISO character name comments and Annex P annotation '*', which are suppressed in this style of presentation. Where such omission occurs, it has been noted in an annotation.

Unlike the presentation style to be used for the actual amendment, the new characters are not shown in the context of the existing characters. The existing characters will be shown in the actual ballot document. The occasional use of the word <reserved> in this draft is an artifact of the production process and should be ignored.

Note to Reviewers

Please review that this document accurately reflects the decisions taken at meeting M49, and if possible, alert the contributing editors to any discrepancies before the ballot is issued.

Despite best efforts there may be minor discrepancies in this document, particularly in terms of this summary and the status information printed in the margins.

Contents

This document lists 436 characters.

Existing characters from ISO/IEC 10646:2003, including AMD1-AMD3, for which glyph corrections have been requested are not shown in this summary of the approved repertoire, but they will be shown in the ballot documents. The following list shows all 10 blocks to which characters will be added, or which have been affected by other changes documented here.
