

WG2N3280  
JTC1/SC2/WG2/IRG N1330  
Date: 2007-07-16

ISO/IEC/JTC 1/SC 2/WG 2/IRG  
**Ideographic Rapporteur Group (IRG)**

**Request for Removal of Characters in CJK C PDAM5**

Source: IRG Meeting #28  
Place: Xi'an, Shaanxi, China  
Date: 2007-6-4 to 2007-6-8

**The Review Process**

The IRG has taken quality control very seriously to ensure that characters included are indeed correct. All characters that are considered questionable or warrant further discussion will be removed from CJK C. The quality assurance process includes both automatic/semi-automatic check and manual verification.

The IRG has carefully reviewed comments from different member bodies on CJK C in the ballot comments and on other occasions using the following process:

1. Automated and semi-automated verification process based on IDS from at least two independent systems to identify potentially unifiable characters (questionable characters).
2. Review done manually by member bodies individually and also as a group during IRG 28 of the complete list of questionable characters.
3. If there is no consensus on a character, it will be removed from CJK C. Some are deemed unified with coded characters. Others are moved to CJK D for further discussion.

**Attachment A** lists the complete list of 67 characters removed from CJK C PDAM5. **Attachment B** provides the decisions on whether the character is unified or moved to Extension D for further discussion. A total of 8 characters are unified with coded characters and 59 characters are moved to Extension D for further discussion.

## List of removed characters from pDam5
