RE: List of Characters in Modern Scripts Not Yet Encoded

Below are the names of scripts that are either not yet encoded or encoded scripts that contain sets of unencoded charcters. The second column gives an estimate of the number of unencoded characters and the third column a contact name.

Note: This list is intended only as a rough guide. The hyphen indicates that no information is available at this time. The term "modern" is used loosely, as it is difficult to get exact information on several of the scripts. Additional feedback is encouraged and should be sent to dwanders@berkeley.edu.

Name	Est. No. of Chars.	Contact Name
Afaka	57	Riley
Arabic Extensions for Africa	10	Priest
Arabic Extensions for Kazakh	-	Priest
Bassa Vah	38	Riley
