Title: Letter in support: L2/10-096 Proposal to add two Tifinagh characters
From: Lorna A. Priest and Jon Coblenz (SIL International)
Date: 27 April 2010

SIL International would like to express support for the proposal for two Tifinagh vowels.

While the “APT” and “SIL” vowel systems are not the same, we believe with the addition of yo, the “SIL” system would also be sufficiently supported by Unicode. The chart below demonstrates the vowels for the “SIL” system.

| SIL glyph | SIL USV | Latin |
|-----------|----------------|-------|
| ⵏ | 2d30 + 0302 | a |
| ⵍ | 2d62 + 0302 | e |
| ⵐ | Y0 + 0302 | o |
| ⵑ | 2d30 + 0306 | ə |
| ⵒ | 2d53 + 0302 | u |
| ⵓ | 2d62 + 0323 | i |
