## 1 User Community

Chinese chess is a traditional board game which is played by two players. It has a lot of similarities with international chess and Japanese chess. It is very popular in Asia-Pacific region. With the culture exchange between Eastern and Western country, more and more Western people become to like to play Chinese chess.

French Bouathong Ye wrote an article about the chess; he said that in Europe and the United States, although, people in general thought that international chess was the most popular chess in the world, actually, their player only accounts for 40 percent of the world population. Chinese chess players were perhaps much more than that number.

Chinese Chess is a kind of game for entertainment. It is also a kind of intellectual development game. It can train people's capacity of decision-making, people's ability to bear the loose and so on. For example, some chess players often publish Chinese chess Pai board in the newspapers, magazines, networks. The process of creating and answering Pai Board is like poetry to be created and enjoyed. At this point, we can say Chinese chess is an art. In the electronic era, Chinese chess has become an intellect competing platform for human brain and computer. The purpose for the competition is not only to compare the human brain to the computer; it is the commercial interests which we seek. In this sense, playing Chinese chess is socio-economic activities.

## 2 Invention of Chinese Chess

Chinese Chess also known as "Elephant opera" or "orange in the Opera", had evolved from the gambling in pre-Qin era. It was closely related to the war between Chu and Han in the end of Qin Dynasty. At that time, playing the "six-Bo" chess that each side only had six pieces was in fashion. During the Tong Dynasty, there were some improvement which Chinese chess consisted of General, horses, carriages and pawns, total four branches. Like international chess, Chinese chess board was also composed of 64 black-and-white grids. By the time of the Song Dynasty, Chinese chess had formed basic format, except adding a piece of "cannon", due to the invention of gunpowder, also adding the "Assistant", "elephant" into the game. In the book "thing Lin Guang Ji" of Song time, the earliest Chinese chess "Qi Pu" was found, which was 200 years earlier than the first international chess "Qi Pu". This finding raised a question whether or not Chinese chess came from India. In the Ming Dynasty, Chinese chess got further development, the Party B's "General" was replaced by "Marshal". Chess pawns divided into two colors, "Marshal" side was red color; the other side was black, known as the "red Marshal black "General"." This format was the same as our modern Chinese Chess. According to the legend, "Red Marshal, black General" originated in the "conflict between Chu and Han", "red Marshal" "black General" stand for Liu Bang, Xiang Yu, that was, the red side was on behalf of Liu Bang's army, black side represented Xiong Yu' troops.

## 3 Spread of Chinese Chess

Chinese Chess formed about the 5th century in the Tang Dynasty in China, was first introduced to Japan, then Korea, Vietnam, Indonesia, the Philippines, Singapore and other countries. With the chess internationalization, chess associations and organizations were established in Europe, North America and Australia and other countries and regions. Only in Europe, there were many national chess organizations, such as Italy chess association, the French Chess Federation, France Chaozhou Association chess group, the Netherlands chess association, the Netherlands Sports Association Chinese chess group, the British Chess Association, the National Chess Federation of Germany, West Berlin Chinese Chess Association. As a result of the promotion in European countries' chess associations and organizations, more and more Europeans become to enjoy Chinese chess. USA, Canada and other places also have set up chess organizations such as the U.S. East Coast Chess

Association, Toronto Chess Association.

**4 Type of Chinese chess**

There are two types of Chinese chesses, Simplified and Traditional chesses. Both have the same kind of Chessboard, the way of playing a and layout, except different Chinese characters between simplified and traditional chess.

**5 Style and coding of Chinese chess**

Chinese chess is made up of chess board and chess pieces.

**a. Chessboard symbols**

Chessboard is a rectangular plane board. There are nine vertical lines and ten horizontal lines on the Chinese chess board, which forms 90 intersections. The pieces are placed on the intersections and move along the lines.

There is an interruption between the nine vertical lines that divides the board into two halves of five horizontal lines each. The interruption serves as the middle point and is known as the river.

Centered at the first through third ranks of the board is a square zone, also mirrored in the opponent's territory. The three points by three point zone is demarcated by two diagonal lines connecting opposite corners and intersecting at the center point. This area is known as the palace or fortress. The Marshal /General can only move inside this area.

We totally need 23 fonts, or codes to describe the Chinese chess on the paper, but 11 codes have already been described in ISO/IEC Table 76 - Row 25: Box Drawing.

符号	编码	符号描述
┐	250f	BOX DRAWINGS HEAVY DOWN AND RIGHT
└	2513	BOX DRAWINGS HEAVY DOWN AND LEFT
┌	2517	BOX DRAWINGS HEAVY UP AND RIGHT
┘	2517	BOX DRAWINGS LIGHT UP AND LEFT
┴	252f	BOX DRAWINGS DOWN LIGHT AND HORIZONTAL HEAVY
┬	2537	BOX DRAWINGS UP LIGHT AND HORIZONTAL HEAVY
┤	2520	BOX DRAWINGS VERTICAL HEAVY AND RIGHT LIGHT
├	2528	BOX DRAWINGS VERTICAL HEAVY AND LEFT LIGHT
+	253c	BOX DRAWINGS LIGHT VERTICAL AND HORIZONTAL
┴	2534	BOX DRAWINGS LIGHT UP AND HORIZONTAL
┴	252c	BOX DRAWINGS LIGHT DOWN AND HORIZONTAL

We only need to increase 12 more new codes. They are described in the behind Table of Chinese chess symbol.

**b. Piece**

Piece, like flat-column, is usually made by wood or plastic materials. On the one side, engraved with Chinese characters. Their positions on the board when a game starts are as

follows (take Simplified Chinese chess for example):

Simplified Chinese chess has a total 32 pieces, which are divided into red and black two sides; each side has 16 pieces, and 7 classes. Therefore, we need 14 codes for it.

Red Black	Name	No. on each side	Abbreviation
帅 将	Marshal、 General (King)	1	M/G
仕 士	Mandarin (Assistant)	2	M
相 象	Prime minister 、 Elephant	2	P/E
车 车	Chariot (Rook)	2	C (R)
马 马	Horse 2		H
炮 炮	Cannon	2	C
兵 卒	Soldier (Pawn)	5	S (P)

Like Simplified Chinese chess, traditional Chinese chess also has 32 pieces, 16 pieces for each side (red or black side). Every side has 7 classes (General, Assistant, Elephant, Chariot, Horse, Cannon, and Pawn), some of these such as red Elephant, red Mandarin, red pawn, black Mandarin, black Elephant, black pawn are as same as Simplified Chinese chess, So, we need add another 8 codes.

Red Black	Name	No. on each side	Abbreviation
帅 将	Marshal、 General (King)	1	M/G

仕 士	Mandarin (Assistant)	2	M(A)
相 象	Prime minister、Elephant	2	P、E
車 車	Chariot (Rook)	2	C (R)
馬 馬	Horse 2		H
礮 砲	Cannon	2	C
兵 卒	Soldier (Pawn)	5	S (P)

Therefore, we need 22 codes for Chinese chess pieces.

Totally, there are 34 code position needed for Chinese chess symbols, described in the following table:

Table: Chinese chess symbol
