Proposal to Encode the Typikon Symbols in Unicode: Part 2 Old Rite Symbols

Yuri Shardt, Nikita Simmons, Aleksandr Andreev

In the previous proposal for encoding the Typikon symbols (Shardt & Andreev, 2009), the basic symbols found in the Typikon as used by the Orthodox Church were included. It came to our attention that these symbols only covered the usage of modern, Synodal era (post-1700) texts. However, to typeset texts of the pre-Nikonian period, an additional symbol needs to be added to the range U+1F54x. This symbol is used in the texts of the Old Rite, that is, those Orthodox Christians who did not recognise the liturgical and textual reforms of Patriarch Nikon in the 17th century. Furthermore, following the fall of the USSR, there has been renewed interest in the Old Rite texts both among the adherents of the New Rite and the scholars of Russian liturgics and literature. Thus, the typesetting of these texts would be useful for a broad community.

Based on the information in Chapter 47 of the Old Rite Orthodox Typikon and other appropriate service books, the desired symbol, its characteristics, and proposed encoding region are described in Table 1. An example taken from the 1916 Old Rite Typikon is shown in Figure 1 (Тѣпѣкон сѣестъ Оуставъ (Tipikon sijest' Ustav), 1916), while the usage of the Typikon symbols in an 1872 Menologion is shown in Figure 2 (Менологїонъ, 1872).

Table 1: Summary of the Proposed Typikon Symbol for Encoding

Typical Typikon Symbol	Proposed Name	Proposed Location	Comments
	Notched Right Semicircle with Three Dots	U+1F544	This is a reversed form of the preceding Unicode symbol located at U+1F543 (proposed location): ☧. This symbol is used by Old Believers to denote one of the two Orthodox Lower Ranked feasts. As well, this symbol can be used to denote one of the two lower rank feasts in black-and-white printing.
