RE: Suggested Collation for Cyrillic O's (U+A698 – U+69B) from L2/10-394R

DATE: 12 May 2011

At the Feb. 2011 UTC, the following four new Cyrillic letters were approved, based on proposal L2/10-394R:

A698 CYRILLIC CAPITAL LETTER DOUBLE O

A699 CYRILLIC SMALL LETTER DOUBLE O

A69A CYRILLIC CAPITAL LETTER CROSSED O

A69B CYRILLIC SMALL LETTER CROSSED O

Ralph Cleminson and Michael Everson recommended the following collation:

- the primary weight for U+A69A CYRILLIC CAPITAL LETTER CROSSED O be between U+A66E CYRILLIC LETTER MULTIOCLULAR O and U+04E6 CYRILLIC CAPITAL LETTER O WITH DIAERESIS;
- the primary weight for U+A698 CYRILLIC CAPITAL LETTER DOUBLE O be between U+047C CYRILLIC CAPITAL LETTER OMEGA WITH TITLO and U+047A CYRILLIC CAPITAL LETTER ROUND OMEGA.

The UCA should hence be (according to Ken Whistler):

043E < A69B < 04E7

047D < A699 < 047B
