L2/11-345

To: UTC Representatives  
Subject: UTC Letter Ballot on Approval of 10646 PDAM 1 Ballot Comments

Dear Unicode Corporate, Institutional, and Supporting Members,

Please find below a letter ballot to approve ballot comments on ISO/IEC 10646 PDAM 1. These ballot comments will accompany the US negative vote. The only changes from what was reviewed and approved at the August UTC are items T.6 and E.8:

T.6. Webdings and Wingdings

The U.S. requests the addition of Webdings characters and modifications to the set of Wingdings characters currently in the PDAM 1.2 (SC2 N4201), as described in NXXXX (L2/11-344).

E.8. Error on cover page and pages 1/3 of PDAM (SC2 N4201)

The title of the PDAM on the cover page of N4201 currently reads: "Amendment 1: Linear A, Palmyrene, Manichean, Khojki, Khudawadi, Bassa Vah, Duployan, and other characters". The script name "Manichean" is a typo for "Manichaean" and should also be corrected on pages "1" and "3."

The ballot comments in full are in document L2/11-328.

You have 20 days, until October 17, in which to respond. However, I ask that you respond as quickly as possible so that Unicode may participate in the L2 ballot which will begin shortly. Once we can determine a majority, the results will be announced.

Send your vote, one allotted vote per member company, to me using the above subject line. If you have any questions as to the rules of letter ballots, please see the Technical Committee Procedures, section 11, at:

<http://www.unicode.org/unicode/consortium/tc-procedures.html#11>

If you wish to engage in any technical discussions, please do so on the unicore email list.

Best regards,

Lisa

=====

Unicode Technical Committee Letter Ballot:

RESOLVED: Approve the 10646 PDAM 1 ballot comments documented in L2/11-328.

Agree [ ]

Disagree [ ]

Please send a response to this ballot as soon as possible so that Unicode can vote in L2.
