Turkish Lira Symbol

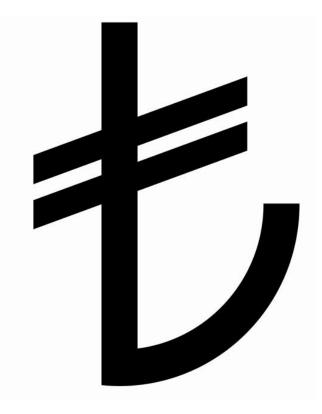

On October 3rd 2011, Central Bank of Turkey announced a contest open to the public, to determine the symbol for country's currency Turkish Lira -which has long been expressed with abbreviation "TL".

The results of the contest -which enjoyed widespread attention from the public and had more than 8.000 entries, were announced by CBT Governor Basci at 1st of March, with the attendance of Turkish PM Erdogan. Turkish Lira's symbol will be "₺" from now on, making Tülay Lale, designer of the symbol, the winner of the contest.

With the press conference, CBT also provided a sample font containing the Turkish Lira symbol, and a program which would allow the users of the font to use the character with a keyboard shortcut (i.e. AltGr+T for Microsoft Windows and Linux, Alt+T for MacOS) in their operating systems to enable preliminary use of the symbol in personal space. The program and font enabling the Turkish Lira symbol attracted more than a million downloads in the first month of the launch. The programs provided by CBT and the technical details of the symbol can be reached via this web page at the official web site of CBT.

CBT's main intent is to make the newly designed Turkish Lira symbol part of the everyday life, and replace the previously used abbreviaton "*TL*" by the Turkish Lira symbol. For this purpose a televised advertising campaign promoting the use of Turkish Lira symbol is planned by CBT.

CBT recognizes that IT will be the main driver to spread everyday usage of Turkish Lira sign, and will take necessary steps to standardize the symbol in character sets and fonts across applicable grounds, such as ISO, Unicode Consortium and technical vendors.
