Doc type: Working group document Title: Nüshu ad hoc report Source: Nüshu ad hoc committee

Author: Tero Aalto, CSC – IT Center for Science

Status: Ad hoc Report

Action: For consideration by JTC1/SC2/WG2

Date: 2012-10-24

An ad hoc committee on Nüshu met in Chiang Mai, Thailand on October 23, 2012. The following experts were present:

Tero Aalto (Finland)
Deborah Anderson (USA)
Chen Zhuang (China)
Michael Everson (Ireland)
Martin Hosken (UK)
Alain LaBonté (Canada)
Wei Lin Mei (TCA)
Ken Whistler (USA)
Zhang Yan (China)
Zhao Liming (China)

The meeting was chaired by Tero Aalto.

The discussion in the ad hoc group was based on these current documents:

- N4341 Updated Proposal for Encoding Nyushu in the SMP of the UCS
 - o N4366 Input on encoding Nushu

Prior documents related to the proposal:

- N3287 Proposal for Encoding Nüshu in the SMP of the UCS
 - o N3322 Comments on Nüshu Proposal by the Chinese NB
 - N3337 Reply to WG2 N3322 UC Berkeley's Comments on Nüshu
- N3340 Proposal for Encoding Nüshu in the SMP of the UCS
- N3598 Secondly Revised Proposal for Encoding Nüshu
 - o N3705 Comments and Questions on N3598
 - N3719 A Quick Response to WG2 N3705
- N3635 Ad hoc report on Nüshu

In the most recent proposal document (N4341), the spelling of the script had been changed from "Nüshu" from "Nyushu", according to the recommendation of the previous ad hoc meeting (N3635). However, the commonly used English name is "Nushu". Because of this, it was agreed that the script be named "Nushu", because "Nüshu" is not a technically allowable script name.

The transcription of the characters was discussed. Mr. Everson had pointed out in his comments (N4366) that the approach currently presented inconsistently uses two methods. The Chinese experts agreed to unify the transcription to conform an ASCII version of the International Phonetic Alphabet (IPA).

As per the tone notation, Mr. Everson argued that numeric reference would be helpful in identifying and finding the characters. Mr. Whistler expressed his concern that the benefit would be marginal and that the notation might cause confusion. However, the Chinese experts did not anticipate problems using the tone numbers and accepted the proposal.

Ms. Anderson pointed out certain inconsistencies in the Chinese proposal regarding the ordering of the readings in the charts. It was agreed that the data be thoroughly reviewed. Also N4366 (item 3) points out a few characters, and the experts agreed these were actual errors and should be corrected.

The ordering of the characters in the current proposal is based on a combination of stroke order and pronunciation. It was discussed whether it would be more logical to use purely either way. However, the current ordering is the one contemporarily used, for example in textbooks, so there is no reason to change it.

The previous ad hoc report (N3635) requested the addition of "Nüshu Iteration Mark". The character "Nyushu character DIE" included in the revised proposal (N4341), indicating reduplication, answers this request. This should be renamed to "Nushu Repetition Mark".

The ad hoc group arrived at the following conclusions:

- The script will be named "Nushu", with a comment that a more correct spelling would be "Nüshu".
- The characters will be identified with the tone numbers. A comment will be included explaining the meaning of the numbers.
- The character charts will be reviewed to find and fix any potential errors. The ordering will be updated accordingly.
- The ordering of the characters shall remain the way it is presented in N4341.
- One character, 1B08C, will be deleted, as it is a glyph variant of the preceding character.
- The character 1B045 MWE-B will be renamed VA33 and moved to before 1B039 TCHYA44.

The revised code chart based on this discussion, prepared by Mr. Everson, is attached to this document.
