

## **Title: Draft additional repertoire Amendment 2.3 to ISO/IEC 10646:2014 (4th edition)**

**Date: 2014-12-16**

**L2/14-295 WG2 N4651**

Source: Michel Suignard, project editor

*Status: Project Editor's summary of the character repertoire addition as of October 2014*

Action: For review by WG2 and UTC experts

Distribution: WG2 and UTC

Replaces: WG2 N4637

### **Status**

This document presents a summary of all characters that constitute the tentative repertoire of the amendment 2.3 to ISO/IEC 10646:2014, with code positions, representative glyphs and character names. In this document, the names and code positions are shown as currently approved by WG2 for the text of a future ballot. In addition, this version of the document also includes a few names and code positions currently approved by UTC for future versions of the Unicode Standard (see more details below).

### **Manner of Presentation**

The character names and code points shown are the same for Unicode and ISO/IEC 10646, including annotations.

In this document, the new characters are not shown in the context of the existing characters. The existing characters will be shown in the final ballot document or character names list. The occasional use of the word <reserved> in this draft is an artifact of the production process and should be ignored.

Information about the status of a character proposal in WG2 and UTC as well as other information about the proposal is presented in a marginal note. Where a proposal refers to characters that are not in a single range, the information is repeated as necessary. A series of \$\$\$\$ indicates the presence of an issue that needs to be resolved as part of synchronization. The WG2 document number for all proposals has been provided for reference, as well as the UTC document number.

### **Note to Reviewers**

UTC reviewers, please use this document as a summary of UTC review of pending ballots and proposals.

### **Contents**

*This document lists 11799 characters.*

Existing characters from ISO/IEC 10646:2014 (DIS), for which glyph corrections have been requested are not shown in this summary document, but they will be shown in the ballot documents.

The following list shows all 33 blocks (existing or new) to which characters are proposed to be added, or which have been affected by other changes documented here.

### Tangut radicals

*This is a superset of radicals used in various sources. Those radicals that are used to order the characters in the Tangut ideographs block are annotated with the corresponding range of code points.*

#### One-stroke radicals

18900	一	TANGUT RADICAL-001	• used for 17000 𐰀 .. 1702F 𐰏
18901	丨	TANGUT RADICAL-002	• used for 17030 𐰁 .. 170CF 𐰏
18902	丿	TANGUT RADICAL-003	• used for 170D0 𐰂
18903	𠄎	TANGUT RADICAL-004	• used for 170D1 𐰃 .. 170D4 𐰄
