

## Universal Multiple-Octet Coded Character Set International Organization for Standardization

**Doc Type:** ISO/IEC JTC1/SC2/WG2/IRG

**Title:** Additional UTC Review Comments on CJK Working Set 2015 v2.0 (IRG N2155)

**Source:** Unicode Consortium

**Status:** Liaison Contribution

**Action:** For consideration by IRG

**Date:** 2016-07-20

The multiple-page table in this document represents the UTC's comments on CJK Working Set 2015 Version 2.0 (aka IRG N2155) with regard to the range that was assigned per Mr. Chen's job-distribution email that was dated 2016-07-03, specifically serial numbers 00001 through 01488, though some of the comments are for characters outside of the assigned range.

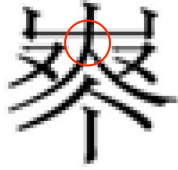

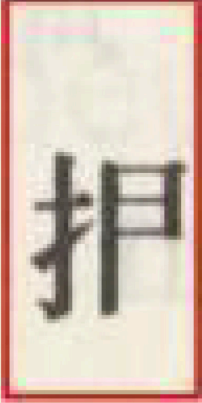

Note that some characters are marked OK, and their "Comments" column is shaded green for easy recognition. The purpose of including such comments is primarily to acknowledge that a representative glyph differs from its evidence, but has been normalized or adjusted to follow regional conventions. **It would be helpful if the submitter of such characters were to confirm their status.** These comments may be helpful for subsequent reviews of CJK Working Set 2015.

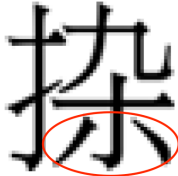

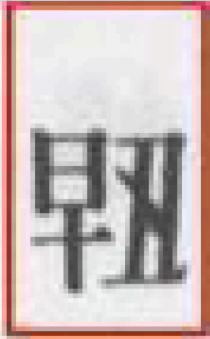

Our apologies if any of the issues that are included in this document have been pointed out in the previous review cycle.
