

IRG N2223: IRG Working Set 2015 Version 4.0

UTC Comments

Source: Ken Lunde, Adobe Systems Incorporated

Date: 2017-08-23

This document represents the UTC's comments for the UTC-assigned portion of IRG Working Set 2015 Version 4.0 (aka IRG N2223), from serial number 02965 through serial number 04319, and includes comments for characters that are outside of that range due to radical reassignment as a result of earlier review cycles. The comments are separated into the following six categories, each of which is in its own table:

1. UTC Response to Pending Characters
2. IDS Issues
3. Representative Glyph Issues
4. Indexing Radical Issues
5. SC Issues
6. TS Issues

1. UTC Response to Pending Characters

SN	Image/Source	SN/Code	Image or Source	Comment Type	UTC Response
02262	 UTC-01272	02284	 UTC-01276	Pending	<p>Although both of these characters are variants of U+70AF 炯, with both being used in the personal name of the same person, 朱縉炯 Zhu Jinjong, they are not unifiable according to the current unification rules. If they were to be unified, it is unreasonable to be forced to choose between UTC-01272 and UTC-01276 to represent variant usage of this character in two different historical texts of arguably equal importance. In particular, for scholars of Southern Ming history, it is important to distinguish these two characters, because different usage in different editions or manuscript copies of a text may be significant for understanding textual history. In other words, both forms are attested in historical sources, and it is important for textual historians to be able to distinguish them.</p>
02284	 UTC-01276	02262	 UTC-01272	Pending	Same as above

3. Representative Glyph Issues

SN	Image/Source	Comment Type	Comment
----	--------------	--------------	---------

03419	 USAT06375	Structure	Change 市 (5 strokes) to 市 (4 strokes) in glyph
03526	 T13-3055	Conventions	The Radical #162 form does not follow TW conventions; also see U+2CA66, U+2CA6A, and U+2CA6E in Extension E
03564	 KC-03553	Glyph Normalization	Normalize the number of strokes of Radical #140 to be 4 among ROK-submitted glyphs
03573	 KC-03555	Glyph Normalization	Normalize the number of strokes of Radical #140 to be 4 among ROK-submitted glyphs
03585	 KC-03560	Glyph Normalization	Normalize the number of strokes of Radical #140 to be 4 among ROK-submitted glyphs

03586	 KC-03564	Glyph Normalization	Normalize the number of strokes of Radical #140 to be 4 among ROK-submitted glyphs
03597	 KC-03578	Glyph Normalization	Normalize the number of strokes of Radical #140 to be 4 among ROK-submitted glyphs
03598	 T13-3066	Conventions	The Radical #140 form does not follow TW conventions
03610	 T13-3068	Conventions	The Radical #140 form does not follow TW conventions
03615	 T13-306A	Conventions	The Radical #140 form does not follow TW conventions

03629	 KC-03622	Glyph Normalization	Normalize the number of strokes of Radical #140 to be 4 among ROK-submitted glyphs
03636	 T13-306C	Conventions	The Radical #140 form does not follow TW conventions
03647	 KC-03655	Glyph Normalization	Normalize the number of strokes of Radical #140 to be 4 among ROK-submitted glyphs; Top stroke of 良 component should be vertical, not diagonal
03972	 T13-3125	Conventions	The upper-left vertical stroke does not follow TW conventions (its bottom should curve to the left)
04130	 KC-04031	Glyph Normalization	Normalize the number of strokes of Radical #140 to be 4 among ROK-submitted glyphs

04136	 KC-04037	Glyph Normalization	Normalize the number of strokes of Radical #140 to be 4 among ROK-submitted glyphs
04265	 T13-3131	Conventions	The Radical #162 form does not follow TW conventions; also see U+2CA66, U+2CA6A, and U+2CA6E in Extension E
04292	 T13-313A	Conventions	The Radical #162 form does not follow TW conventions; also see U+2CA66, U+2CA6A, and U+2CA6E in Extension E
04296	 T13-313B	Conventions	The Radical #162 form does not follow TW conventions; also see U+2CA66, U+2CA6A, and U+2CA6E in Extension E
04298	 T13-313D	Conventions	The Radical #162 form does not follow TW conventions; also see U+2CA66, U+2CA6A, and U+2CA6E in Extension E

4. Indexing Radical Issues

SN	Image/Source	Comment Type	Comment
00592	 UTC-01615	Indexing Radical	The Radical cannot possibly be #154; Radical #30 seems the most likely, with SC=8 and TS=11; Is this an editorial error?
03408	 T13-304B	Indexing Radical	Change the Radical to #74 or change the bottom component to be Radical #130 per TW conventions
03438	 T13-304E	Indexing Radical	Is the Radical #130 or #74? Is the lower-right component Radical #130 or #74? If #130, they do not follow TW conventions; also, its IDS, 𠂇月胛, does not match lower-right component; there are multiple issues with this particular character
03833	 USAT08338	Indexing Radical	Change Radical to #18 or #74, or at least add additional kRSUnicode value(s): 18.4 and/or 74.2
04279	 GHZR63854.02	Indexing Radical	Is Radical #162 correct? Radical #152 might be better

5. SC Issues

SN	Image/Source	Comment Type	Comment
00250	 G_Z1741401	SC	Change SC from 17 to 12; Is this an editorial error?
01635	 G_Z2072304	SC	Change SC from 6 to 8
03263	 UTC-01990	SC	Change SC from 7 to 6 (a simplified-only component is present)
03366	 T13-3043	SC	Change SC from 1 to -1
04126	 KC-04024	SC	Change SC from 13 to 12
