Title: ULI-TC Liason Report, 2017Q4
Source: Steven R. Loomis (ULI-TC chair)
Status: Liason Contribution
Action: Informative
Date: 2017-10-26

This is a status on the Unicode Localization Interoperability TC

- The Unicode Localization Interoperability committee has met 3 times in 2017, with four attendees. (There continue to be a number of persons who have expressed interest in joining the meeting at some point.)

- ULI will be discussed as topic in FEISGILTT at the LocWorld preconference next week in Santa Clara, California (Oct 31/Nov 1), including interoperability with XLIFF and XLIFF requirement gathering)

Topics included:

- Word Count ([forthcoming document](), draft expected in January)
- Segmentation exceptions (mechanisms for requesting that translation units not be broken - "Hello, Dr.<mark>×</mark> Smith"). So far such mechanisms have been rejected both by the UTC() and by the ICU-TC ([#13317]()).
    - (Compare:: Word Break Suppressor [L2/15-192]())
- Pluralization standards in XLIFF
    - Investigating the XLIFF OMOS-TC's work
- XLIFF Liason reports
- NLP topics – including analysis of Emoji (directed to CLDR)
