# UTC Comments

2018-08-22

This document contains comments from the UTC, separated into the following three parts:

Part 1: Comments by Dr. Ken Lunde (Adobe)

Part 2: Comments by Eddie Li

Part 3: Comments by Ming Fan

## Part 1: Comments by Dr. Ken Lunde (Adobe)

The following are general comments:

- 1) Change all instances of U+25AD7 <sup>々</sup>, U+2EAE <sup>々</sup> (there are only two: 01555 and 03290), and U+E836 <sup>々</sup> (there is only one: 03271) in IDSeS to U+7AF9 竹
- 2) The following six Plane 3 (Extension G) code points, which are not stable, were detected in seven IDSeS and are noted later in this review: U+3015B, U+306AE (now U+306B7), U+30837 (now U+3082C), U+308C6 (now U+308B3), U+309BB (now U+30991) & U+30C5C (now U+30C26)
- 3) ROK-submitted characters inconsistently use Radical #140 in their representative glyphs, appearing with either three or four strokes

Character-specific comments are provided in the following three named tables:

1. Unifications

2. Attributes

3. Representative Glyph & Evidence Issues

### Part 3: Comments by Ming Fan

As this review will demonstrate, there are many corrupt ideographs in the Tripiṭaka. Many of them are transcription errors in early editions (which propagate to later editions/revisions) or among different later editions. Since there are so many editorial errors in the Tripiṭaka, I recommend that it **should not be treated as an authoritative source**. Moreover, there are also many other SAT-submitted ideographs in WS2017 that cannot be found in any other old books or dictionaries. Therefore, if an ideograph appearing in the Tripiṭaka is unencoded, other evidence **besides versions of the Tripiṭaka** should be provided to prove that it is not simply a transcription error in the Tripiṭaka. In addition, further systematic and clear research outside the context of the Tripiṭaka is indeed crucial and indispensable to confirm the origin for such ideographs, and to ensure that they are not corrupt forms.

I suggest that SAT **withdraw all SAT-submitted ideographs in WS2017** in order to do further research to confirm their origins. Evidence only from Tripiṭaka should be deemed insufficient and therefore not reliable for them to be encoded. If such forms are still necessary, please consider registering a new IVD collection in lieu of encoding them.
