IV. Selection factors — Inclusion

A. Compatibility

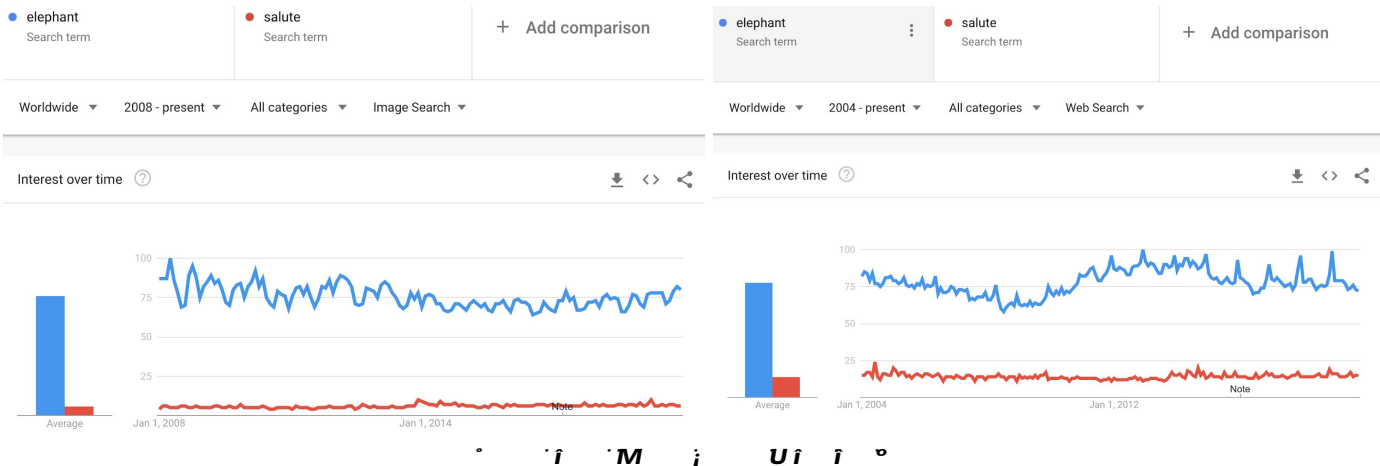

Yes. As documented in [L2/18-258](#) and [L2/19-085](#).

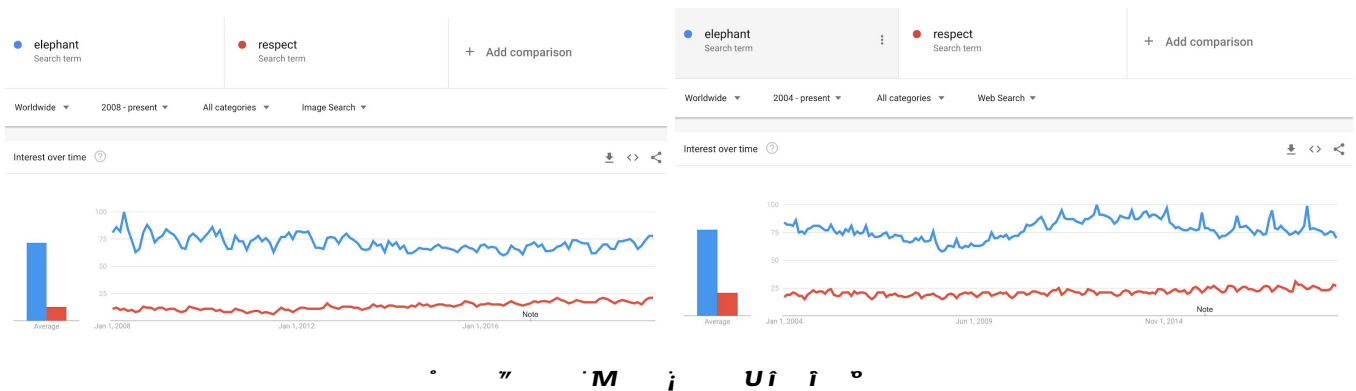

B. Expected use

1. Frequency

In addition to being one of [Emojipedia's top requests in 2019](#), usage is expected to be extremely high. The following search results indicate the function of this emoji could perform well over-median due to his high-frequency uses (See section B2-3)

Search term	Google Search	Bing Search	Google Video Search
Salute			
Respect			

2. Multiple usages

Functions as both affirmation and acknowledgment — two expressions that appear on the highest frequently expressed sentiments in digital communications.

To recognize or acknowledge a message

👤 : Can you pick up the kids from school?

👤 : No Problem 😊

To honor or pay respect to

Thank you for your service 😊

Affirmation

As you wish 😊

Salute is also the Italian word for “cheers” but I don’t think that this emoji will be used to communicate congratulations 🙄🍷🍷 Or, will it? 😂

3. Use in sequences

Can be used with non-face emoji, to indicate reactions, acknowledgement, respect, etc.

😊❤️ = As you wish.

😊🧢🏆 = Support your troops

😊🇺🇸 (or any flag) = Respect and pride for your country or team

😊👊 = Respect

😊👑 = God save the Queen

😊☁️❓ = I can’t see you

😊🥨 (or any food) = I live for pretzels

😊☀️ = sun in my eyes

😊🩳 = Salute my shorts (camp prank)

Can also be used in combination with other facial expressions to indicate your respect or submission to another.

😐 👨‍🍳 = Yes Chef/you're the boss

😐 🎯 🔥 You are amazing

😐 🤖 I welcome our robot overlords

😐 🌙 Night shift

😐 ☀️ Morning shift

4. Breaking new ground

Because it is an established representation of a common expression, SALUTE EMOJI is more likely to convey meaning to the broadest possible range of emoji users. In addition to saluting, this emoji also fills an important gap in existing face options and allows the user to express respect, affirmation, and in some contexts that annoying feeling when the sun is in their eyes or when you're looking for someone.

A recent paper proposes that the popularity of faces and hands is because emoji have a similar role in written communication as gesture does in spoken communication (Gawne & McCulloch 2019) so continuing to fill in the set of common metaphorical feelings represented as emoji is sensible from both a theoretical and a practical, usage-based perspective.

C. Image distinctiveness

Yes.

D. Completeness

There is only one emoji that conveys the concept of showing respect 🙇. However, since this particular behavior is regionally specific there is great value in adding a salute emoji for cultures where bowing is less common.

It's worth noting, there are hundred of kamojis representing this expression, a possible indication of its usefulness, demand, and value add to a bowing expression m(_)_m.

(^*)	(-ω-)	(`∇')	(`∇`)	(≥∇≤)	(∇-∇)	(^*)	(^∧)	(`∇')
(#^_?)	(·ω·)	(#^_?)	(`∇')	(∇^∇)	<(@∇@)	(-ω-)	∠(^-^)	(°∇°)
(`∇')	(≥∇≤)	(≥ω≤)	(>∇<)	(`∇')	(∇∇)	(^∧)	∨(∇∇)	∨ ∇·
