Title: Final Proposal to encode Western Cham in the UCS
Source: Martin Hosken
Status: Individual contribution
Action: For consideration by UTC and ISO
Date: 2020-11-18

Executive Summary. This proposal is to add 87 characters to a block: 1E200-1E26F in the supplementary plane, named Western Cham. In addition, 1 character is proposed for inclusion in the Arabic block and 8 characters are proposed for inclusion in the Arabic Supplemental Symbols block: 1EF00-1EF07. The proposal is a revision of L2/20-061.

A revision history is given at the end of the main text of this document.

Introduction. Eastern Cham is already encoded in the range AA00-AA5F. As stated in N4734, Western Cham while closely related to Eastern Cham, is sufficiently different in style for Eastern Cham characters in plain text to be unintelligible to Western Cham readers and therefore a separate block is required. As such, the proposal to encode Western Cham in a separate block from (Eastern) Cham can be considered a disunification. But since Western Cham was never supported in the (Eastern) Cham block, it can be argued that this is a proposal for a new script. This is further discussed in the section on disunification.

The Western Cham encoding follows the same encoding model as for (Eastern) Cham. There is no halant or virama that calls for a Brahmic model. The basic structure is a base character followed by a sequence of marks as described in the section on combining orders. The basic orthographic syllable structure is: (C | I) M* V* F? with relative orders as shown in the section on combining orders. A final may also be a spacing base character.

The proposal in N4734 has been closely reviewed by script experts and community leaders among the Western Cham in Cambodia and this proposal arises from their considerations. Where a direct correspondance exists between a Western Cham character and an Eastern Cham character, the character is encoded in a corresponding position in the Western Cham block. Extra final characters are used in Western Cham for words borrowed from Khmer. Special ligatures and symbols are also added. These result in the Western Cham block needing an extra column over Eastern Cham.

The Western Cham language is written in 3 scripts: Arabic (Jawi), Western Cham and some informal Latin Romanizations. Speakers of the Western Cham language are found almost entirely in Cambodia. There are small pockets of speakers in Vietnam, but they do not use the Western Cham script, only the Jawi script.

Disunification. While there are some similarities between many characters of both scripts and some consistent features between both scripts, the scripts have diverged for a long period of time in which there was little contact between the two communities. Eastern Cham plain text characters are not identifiable for Western Cham readers, unless people have been trained by someone knowledgeable in both scripts and vice versa. Contact between the two groups today is very limited and exchange nearly unknown, which means that exposure to the other group's script is virtually zero for more than 99% of the population. Therefore the probability of them learning from each other is small. There are probably only a handful of Western Cham people who could even identify Eastern Cham letters as being Eastern Cham, let alone being able to transpose the letters in their minds. The Western Cham community would feel very strongly, not to say violently, about one of their texts being displayed in Eastern Cham characters by default and the same is almost certainly true for the Eastern Cham people as well.

The languages themselves also have diverged to the point of no longer being mutually intelligible, with even basic words like ‘house’ being different. Apart from being geographically and politically isolated from each other, the two groups of Cham people are also separated in culture and religion, the Western Cham being Muslims and the Eastern Cham predominately Buddhist.

Reports of Eastern Cham people from Vietnam visiting a Western Cham village in Cambodia show that the Eastern Cham could not be understood by young or old. The attempt to introduce Eastern Cham letters into that Western Cham community was rejected strongly.

Some fonts have been made to use Eastern Cham codepoints for Western Cham, and while they are somewhat successful, it is necessary for them to use unassigned codepoints from the block to complete basic Western Cham support. One thing such fonts do indicate is a desire to keep the same basic encoding model between the two scripts. It should also be noted that there is very little print material in Western Cham. All the core samples are taken from handwritten books and documents.

Repertoire. The basic structure of Western Cham text consists of initial consonants: U+1E206 (LETTER KA) ... U+1E228 (LETTER HA); medial consonants: U+1E233 (CONSONANT SIGN YA) ... U+1E236 (CONSONANT SIGN WA); dependent vowels: U+1E229 (VOWEL SIGN AA) ... U+1E232 (VOWEL SIGN U) and final consonants: U+1E23D (FINAL PH) ... U+1E24E (CONSONANT SIGN TKAJ KA). There are also a few independent vowels: U+1E200 (LETTER A) ... U+1E205 (LETTER OH). The overall structure of the Western Cham block follows that of Eastern Cham closely, removing some correspondances and introducing many new characters.

1. The 4 textual symbols U+1E260 (SIGN TANA TAMAT PHON) ... U+1E262 (SIGN TANA CHAPEDAEM IU) and U+061D (ARABIC END OF TEXT) are textual symbols with discourse functions. Specifically:

Codepoint	Character name	Glyph	Description	Script	Figure
1E260	SIGN TANA TAMAT PHON		Closing Korannic quotation	Arabic	47
1E261	SIGN TANA CHAPEDAEM PHON		Section beginning	Cham	4
1E262	SIGN TANA CHAPEDAEM IU		Alternate section beginning	Cham	2, 5
061D	ARABIC END OF TEXT		Closing text	Arabic	8, 23

In styling, U+1E260 ( SIGN TANA TAMAT PHON) and U+1E262 ( SIGN TANA CHAPEDAEM IU) may lose their dotted outline and U+1E261 ( SIGN TANA CHAPEDAEM PHON) may gain one. The script indication for each symbol gives its script context. Arabic script symbols occur in Western Cham script, but often at the boundary of some Arabic text either in Arabic language or Western Cham language. But as can be seen in the examples, some symbols claiming to be used for Arabic script also get used in Western Cham script. It is felt, therefore, best to encode these as part of a Western Cham block and to allow their use in Arabic script.

U+061D ( ARABIC END OF TEXT) is an Arabic symbol that is used in Arabic text only. As such it is proposed for inclusion in the Arabic block. It is distinct from a sequence of U+2055 ( FLOWER PUNCTUATION MARK) as can be seen in Figure 51.

2. There are three special ligatures, after Arabic style ligatures, which have contrasting rendering with the normal sequence. Both the ligature and the normal sequence may occur in text. The sequence is the compatibility normal form for the ligature.

Codepoint	Character name	Glyph	Sequence	Glyphs	Figure
1E23A	LIGATURE BRAY		1E21D 1E234 1E22C		31
1E23B	LIGATURE NAN		1E217 1E246		24
1E23C	LIGATURE SALAM		1E227 1E224 1E24C		3, 13

All other ligatures are rendered the same as their character sequence.

- U+1E25B (𑄛 SIGN TANA PATOK SAP) reduplication mark (Figure 45) and U+1E25C (𑄜 PUNCTUATION SPIRAL) ‘one’ or ‘first’ (Figure 46) are the same as in N4374. Note that while U+1E25C (𑄜 PUNCTUATION SPIRAL) has lexical value, it takes no diacritics.
- U+1E24E (𑄚 CONSONANT SIGN TKAJ KA) is an abstract character that only ever ligates with the previous character (figures 1, 2, 15, 16). It does not occur following a vowel and is also not followed by a final letter either. Its occurrence after a consonant usually indicates a vowel or it may indicate that the consonant is acting as a final. Ligated sequences involving U+1E24E have a visual similarity to those using U+1E24D (𑄙 CONSONANT SIGN FINAL H) (Figures 25, 44). For example:

Sequence	Glyphs	Meaning	Sequence	Glyphs	Meaning
1E206 1E24E	𑄛𑄚	tie	1E206 1E24D	𑄛𑄙	push away
1E208 1E24E	𑄛𑄚	stutter	1E208 1E24D	𑄛𑄙	side

U+1E24D (CONSONANT SIGN FINAL H) may occur following a vowel as in 𑄛𑄙𑄚𑄛.

- The character U+1E25A (𑄝 DIGIT MOON TEN) is used when describing days in the lunar calendar. U+1E24C (𑄛 FINAL M) is used together with a digit to mark the days after a full moon, e.g. 𑄛𑄛 U+1E251 (𑄛 DIGIT 1) U+1E24C (𑄛 FINAL M) for the first day after the full moon. U+1E25A (𑄝 SIGN MOON TEN) is used for the 10s digit in such contexts: thus 𑄛𑄛 U+1E25A (𑄝 SIGN MOON TEN) U+1E251 (𑄛 DIGIT 1) U+1E24C (𑄛 FINAL M) for the eleventh day after a full moon. The new moon occurs on day 14 or 15. The days after the new moon work in the same way but are marked with U+1E22E (𑄛 SIGN OE) instead of U+1E24C (𑄛 FINAL M), with the full moon occurring on day 15. For example 10 days after a full moon is represented by 𑄛 U+1E25A (𑄝 DIGIT MOON TEN) U+1E22E (𑄛 SIGN OE). See Figure 48.

U+1E25A (𑄝 DIGIT MOON TEN) is not a digit, in that it has no numeric value.

- Western Cham has special characters, unique to itself and unknown to other languages, that can be used for indicating month names. They are based on the transliterated month name into Arabic followed by 1 to 7 dots. Since these are Arabic symbols, they are proposed for inclusion in the Arabic Supplemental Symbols block. The order of the months is U+1EF07 (𐄇 SEVEN DOTS LUNAR MONTH), U+1EF01 (𐄁 TWO DOTS LUNAR MONTH), U+1EF02 (𐄂 THREE DOTS LUNAR MONTH), U+1EF04 (𐄄 FIVE DOTS LUNAR MONTH), U+1EF06 (𐄆 SIX DOTS LUNAR MONTH), U+1EF00 (𐄀 ONE DOT LUNAR MONTH), U+1EF01 (𐄁 TWO DOTS LUNAR MONTH), U+1EF03 (𐄃 FOUR DOTS LUNAR MONTH), U+1EF04 (𐄄 FIVE DOTS LUNAR MONTH), U+1EF07 (𐄇 SEVEN DOTS LUNAR MONTH), U+1EF00 (𐄀 ONE DOT LUNAR MONTH), U+1EF03 (𐄃 FOUR DOTS LUNAR MONTH). Notice the repetitions in the order. These symbols are used both in Western Cham script and also in Arabic script, when writing Western Cham. They may occur next to each other and with Western Cham digits but never with Arabic digits.

In addition, there are two forms of the lunar 5 dots, that occur in free variation in a text, hence U+1EF05 (𐄅 FIVE DOTS LUNAR MONTH OVER HEH).

In font design, these characters contrast to Arabic characters in their position. Western Cham conceptually hangs from a baseline and the Lunar characters are positioned relative to that upper baseline. See Figure 10.

- The reserved codepoints at 1E20B, 1E211 and 1E22D correspond to characters in Eastern Cham that do not occur in Western Cham. The slots are kept to keep character alignment with the Eastern Cham encoding.
- The reserved codepoints at 1E203 and 1E204, correspond to characters in Eastern Cham that while they occur in Western Cham have no visual distinction from other characters in the block. Thus

Variants. There are two ‘literary’ variants for a pair of vowels. Such variants are used in religious and ethical texts. The examples are shown following an arbitrary base character of U+1E223 (ꨟ RA).

Sequence	Normal	Literary variant
1E223 1E22E 1E232	ꨟꨟꨟ	ꨟꨟꨟ
1E223 1E233 1E229	ꨟꨟꨟ	ꨟꨟꨟ

There is also a free stylistic font variant of U+1E235 (ꨟ CONSONANT SIGN LA) ꨟꨟ (figure 14).

Finals. For most finals there is a visual link between the initial and the final:

Initial	Encoding	Final	Encoding	Initial	Encoding	Final	Encoding
ꨟ	1E206	ꨟꨟ	1E240	ꨟꨟ	1E220	ꨟꨟ	1E24C
ꨟꨟ	1E20A	ꨟꨟꨟ	1E242	ꨟꨟ	1E222	ꨟꨟꨟ	1E248
		ꨟꨟ	1E22E	ꨟꨟ	1E223	ꨟꨟ	1E249
ꨟꨟ	1E20C	ꨟꨟ	1E244	ꨟꨟ	1E224	ꨟꨟꨟ	1E24A
ꨟꨟ	1E213	ꨟꨟꨟ	1E245	ꨟꨟ	1E225	ꨟꨟꨟ	1E23E
ꨟꨟ	1E217	ꨟꨟꨟ	1E246	ꨟꨟ	1E226	ꨟꨟꨟ	1E24B
ꨟꨟꨟ	1E21C	ꨟꨟꨟꨟ	1E23D	ꨟꨟ	1E227	ꨟꨟꨟ	1E23F
ꨟꨟ	1E21A	ꨟꨟꨟ	1E247	ꨟꨟꨟ	1E228	ꨟꨟ	1E24D

Most finals are productive modifications of their corresponding initials. See figures 32-41, 43, 44.

U+1E22E (ꨟ VOWEL SIGN OE) and U+1E24C (ꨟꨟ SIGN FINAL M) are both considered marks because they are non-spacing (figure 25). U+1E22E (ꨟ VOWEL SIGN OE) acts as a vowel or a final and there may be a sequence involving both of them. For example: ꨟꨟꨟ ‘bank (of river)’ U+1E21D (ꨟꨟ LETTER BA) U+1E217 (ꨟꨟ LETTER NUE) U+1E22E (ꨟ VOWEL SIGN OE) U+1E22E (ꨟ VOWEL SIGN OE). Those viewing this script through a Sanskrit lens may want to refer to U+1E24C (ꨟꨟ SIGN FINAL M) as an anusvara, but this is an alien term and concept to Western Cham speakers and is not used in a number of scripts in the region. Likewise for U+1E24D (ꨟꨟ FINAL H) as visarga, which also loses its connotation in a number of scripts in the region.

Spelling. The details of the relative ordering of marks in a sequence are listed in the section on character properties. Here we list some exemplar spellings.

Word	Spelling	Notes
ꨟꨟꨟꨟꨟ	1E21A 1E214 1E233 1E230	Pre vowels go before the last initial.
ꨟꨟꨟ	1E206 1E22E 1E232	No visual difference based on order.
ꨟꨟꨟꨟ	1E215 1E223 1E229 1E22E	Interaction between upper and final vowels.
ꨟꨟꨟꨟ	1E200 1E233 1E229	Interaction between following medial and following vowel.
ꨟꨟ	1E253 1E22E	For lunar days, also 1E24C

Layout. Text is laid out left to right, although due to mixing with Arabic script, regularly occurs in a bidirectional context. There are no word spaces in Western Cham. Spaces act like or with a comma as per Khmer. Western Cham follows other Indic fonts in considering base characters as hanging from a baseline rather than building up from one. This even applies to the use of Arabic shapes in Western Cham symbols.

Punctuation. In addition to specific Western Cham punctuation marks, the script also borrows punctuation from other scripts. Regular use is made of Western European punctuation: « U+00AB (LEFT-POINTING DOUBLE ANGLE QUOTATION MARK), » U+00BB (RIGHT-POINTING DOUBLE ANGLE QUOTATION MARK), “ U+201C (LEFT DOUBLE QUOTATION MARK), ” U+201D (RIGHT DOUBLE QUOTATION MARK), ‘ U+2018 (LEFT

SINGLE QUOTATION MARK), ' U+2019 (RIGHT QUOTATION MARK), ? U+003F (QUESTION MARK), ! U+0021 (EXCLAMATION MARK), (U+0028 (LEFT PARENTHESIS),) U+0029 (RIGHT PARENTHESIS), [U+005B (LEFT SQUARE BRACKET),] U+005D (RIGHT SQUARE BRACKET).

In addition: | U+0964 (DEVANAGARI DANDA), || U+0965 (DEVANAGARI DOUBLE DANDA).

◌ U+0353 (COMBINING X BELOW) is used, rarely, in transcribing handwritten texts where the mark is used to indicate a spelling error.

Unicode Properties. These are the Unicode database properties for the characters proposed.

 1E217 1E246 << 1E23B (ᩈᩃᩅ)
 1E227 1E224 1E24C << 1E23C (ᩈᩃᩅ)

The punctuation, digits and other signs sort appropriately with similar characters from other scripts. Special handling is required for handling U+1E22E as a vowel:

U+1E22C U+1E23D < U+1E22E U+1E23D
 U+1E22C U+1E23E < U+1E22E U+1E23E
 U+1E22C U+1E23F < U+1E22E U+1E23F
 U+1E22C U+1E240 < U+1E22E U+1E240
 U+1E22C U+1E241 < U+1E22E U+1E241
 U+1E22C U+1E242 < U+1E22E U+1E242
 U+1E22C U+1E22E < U+1E22E U+1E22E
 U+1E22C U+1E244 < U+1E22E U+1E244
 U+1E22C U+1E245 < U+1E22E U+1E245
 U+1E22C U+1E246 < U+1E22E U+1E246
 U+1E22C U+1E247 < U+1E22E U+1E247
 U+1E22C U+1E248 < U+1E22E U+1E248
 U+1E22C U+1E249 < U+1E22E U+1E249
 U+1E22C U+1E24A < U+1E22E U+1E24A
 U+1E22C U+1E24B < U+1E22E U+1E24B
 U+1E22C U+1E24C < U+1E22E U+1E24C
 U+1E22C U+1E24D < U+1E22E U+1E24D

Cluster Patterns. The traditional approach to handling cluster patterns has been through the Canonical Combining Class. Due to the immutability of Canonical Combining Class (CCC) values and the confusion between whether the CCC value is an order or a class, it is required that the CCC values for all characters in this block SHALL BE 0.² This does not mean that relative ordering of marks is not important. Here is a list of mark classes in their relative order. Those occurring first are listed first:

Class	Characters
Medial ra	꠵ꠟ 1E234 (CONSONANT SIGN RA)
Medial la	꠵ꠡ 1E235 (CONSONANT SIGN LA)
Medial ya	꠵ꠢ 1E233 (CONSONANT SIGN YA)
Medial wa	꠵ꠣ 1E236 (CONSONANT SIGN WA)
Pre vowels	꠵ꠦ 1E22F (VOWEL SIGN E), ꠵ꠧ U+1E230 (VOWEL SIGN AA)
Final vowels	꠵꠩ 1E229 (VOWEL SIGN AA), ꠵꠪ 1E22A (VOWEL SIGN I), ꠵꠫ 1E22B (VOWEL SIGN II), ꠵꠬ 1E22C (VOWEL SIGN AI), ꠵꠭ 1E231 (VOWEL SIGN AU)
Upper vowels	꠵ꠥ 1E22E (VOWEL SIGN OE)
Lower vowels	꠵꠨ 1E232 (VOWEL SIGN U)
Finals	꠵꠴ 1E24C (CONSONANT SIGN FINAL M), ꠵꠵ 1E24D (CONSONANT SIGN FINAL H), ꠵꠶ 1E24E (CONSONANT SIGN TKAJ KA)

No more than one character in each class may occur following the same base character U+1E200 (꠵꠰ LETTER A) ... 1E228 (꠵꠰꠵꠰ LETTER HA). The only exception to this U+1E22E (VOWEL SIGN OE), which can be a vowel or a final and may occur twice in sequence. The Finals class also includes all the spacing final letters U+1E23D (꠵꠵꠰ FINAL PH) ... U+1E24B (꠵꠵꠰ FINAL SS). From this we can establish a set of basic script level regular expressions. This description allows sequences that would not occur in Western Cham but is sufficient for rendering and keyboarding.

- [1E200-1E228] 1E234? 1E235? 1E233? 1E236? [1E22F-1E230]? [1E229-1E22C 1E231]? 1E22E? 1E22E? 1E232? [1E23D-1E24D 1E24E]?
- [1E23A-1E23C]

² It is unfortunate that the effect of making CCC values immutable means they have to be set to 0, resulting in the exact opposite effect that making CCC values immutable intends to achieve of enforcing a consistent order.

Encoding Model. The encoding model follows that of Eastern Cham and Khmer, in being Indic with vowels following base characters, as described in the cluster patterns. An alternative would be to use a visual encoding order where the medial ra would be encoded before the base consonant. This makes no logical sense in that none of the confusion arguments used for visual ordering apply here. Could a visual ordering be used? Yes. But it would confuse everyone and have to answer the question why differ from Eastern Cham and Khmer when there is no need?

Indic Properties. Based on the ordering rules above, we can set the following Indic properties for Western Cham.

1E200..1E205 ; Vowel_Independent
1E206..1E228 ; Consonant
1E229..1E232 ; Vowel_Dependent
1E233..1E236 ; Consonant_Medial
1E23A..1E23C ; Consonant_Placeholder
1E23D..1E24E ; Consonant_Final
1E250..1E25A ; Digits

1E229..1E22E ; Top
1E22F..1E230 ; Left
1E231 ; Top
1E232 ; Bottom
1E233 ; Right
1E234 ; Left
1E235 ; Bottom
1E236 ; Right
1E24C ; Top
1E24E ; Right

In review, it is noted that 1E233 and 1E236 are both right medials. The Universal Shaping Engine has the unfortunate constraint of only allowing one medial in each position. The author is open to suggestions as to how to resolve this problem. Either the USE has to change to support multiple medials in a position, or one of the right medials has to be arbitrarily marked as above just to conform to a technological constraint. It should be noted that allowing multiple right medials would not cause any ambiguity in the erroneous situation that a user enters multiple right medials where only one is expected, since right medials are assumed to be spacing and not attach to the base.

Bibliography.

សហគមន៍ឥស្លាមកនអ៊ីម៉ាសាន់កម្ពុជា *SahakumIslamKromKanImamSanKampucia* (Islamic Community Kan Imam-San of Cambodia), 2011

ក្រសួងវប្បធម៌ និងវិចិត្រសិល្បៈ *Procum Neug TakajThanaw* (Books and Ethics)

សហគមន៍ឥស្លាមកនអ៊ីម៉ាសាន់កម្ពុជា *SahakumIslamKromKanImamSanKampucia* (Islamic Community Kan Imam-San of Cambodia), 2011

សិវ្យាប្បទាន *SiophouAksosaSgamCam* (Book of literature learning Cham)

Revision 1. The first revision differs from the original document:

- Moved one symbol into the Arabic Extended A block and closed up the gap. Added extra block chart, etc.
- Adding sections on disunification, ligation and finals
- Expanding section text in introduction, combining orders, confusability
- renaming 1E26B from WESTERN CHAM SIGN LUNAR 5 DOTS OVER HAH to WESTERN CHAM SIGN LUNAR 5 DOTS OVER HEH.
- Adding two sequence independent vowels to collation order. Fixing 1E22E collation specials.
- Adding sample glyphs to all character name references
- Added subheadings in names list after the chart

Revision 2. These are the changes from revision 1 (June 2019) to revision 2 (Sept 2019)

- Added Indic syllabic and positional categories
- Added extra examples in response to comments.

There is no change to the character repertoire.

Revision 3. These are the changes from revision 2 (Sept 2019) to revision 3 (November 2019)

- Renamed U+1E22E from WESTERN CHAM VOWEL SIGN OE OR FINAL NG to WESTERN CHAM VOWEL SIGN OE.
- Added many more examples.
- Moved lunar symbols from U+1E266 ..U+1E26D to U+1EEF8..U+1EEFF and rename from WESTERN CHAM SIGN LUNAR to ARABIC SYMBOL LUNAR.
- Added a bibliography.

L2/20-061. These are the changes from revision 3 (November 2019) to L2/20-061 (January 2020)

- Add figure references to the discussion of proposed characters.
- Remove references to unencoded characters removed from Eastern Cham, with some remaining.
- Remove discussion of alternative final character mark.
- Rename lunar month characters.
- Rename ligatures from consonant signs to LIGATURE.
- Change all punctuation characters to have bidi property ON.
- Remove U+1E25F (PUNCTUATION TRIPLE DANDA) in favour of a sequence of double and single dandas.

L2/20-000. These are the changes from L2/20-061 (January 2020) to L2/20-000 (March 2020)

- Reintroduce U+1E25F (PUNCTUATION TRIPLE DANDA) in response to direct request from community.

- Move U+1E237 to U+1E24E (CONSONANT SIGN TKAJ KA).
- Reorder lower vowels to come after upper vowels to fit with Universal Shaping Engine expectations.
- New introductory paragraph to the Repertoire section.
- Fix chart names for ligatures U+1E23A ... U+1A23C.
- Change the letter name U+1E205 WESTERN CHAM LETTER OS to a more conventional WESTERN CHAM LETTER OH.

L2/20-061R3. These are the changes from L2/20-061R2 (May 2020) to L2/20-000 (November 2020)

- Add examples of U+1E21B, in Fig 52 and the main text (which is also found in Eastern Cham (U+AA1B), for which no evidence was provided in its proposal document). Explain why it does not occur in the alphabet lists from the Chief Imam.
- Yet again, move the lunar symbols to another block. This time U+1EF00 ... U+1EF07.
- Remove U+1E263 SIGN TANA TAMAT AYET to use U+2055 FLOWER PUNCTUATION MARK instead.
- Remove U+1E264 SIGN TANA TAMAT TAKUE for presumed lack of evidence, despite other characters having been encoded on far less evidence. The example figure remains to save renumbering all the figures yet again and for future evidence should a request be made for encoding later.
- Rename U+1E25F PUNCTUATION TRIPLE DANDA to END OF TEXT. Justify why there is no need for an extra triple danda since such a thing never occurs alone and is always a component of an END OF TEXT, for example the figure on L2/20-185 p3 shows an example of END OF TEXT and not of a separate triple danda.
- Explain the implications of the Chief Immam's imprimatur in Fig 24, 25.
- Add comment on U+0353 COMBINING X BELOW to the section on punctuation.

ប្រតិបត្តិការអនុញ្ញាតឱ្យប្រើប្រាស់អក្ខរក្រម
A letter of endorsement

ថ្ងៃទី ០៤ ខែ ឧសភា ឆ្នាំ ២០១៩
Date : May 04, 2019

គោលការណ៍នៃការអនុញ្ញាតឱ្យប្រើប្រាស់អក្ខរក្រម
To Unicode international committee:

យើងគាំទ្រការអនុញ្ញាតឱ្យប្រើប្រាស់អក្ខរក្រម
We, the Islamic Community Kan Imam San of Cambodia, support the Proposal to encode Western Cham in the UCS.

យើងគាំទ្រការអនុញ្ញាតឱ្យប្រើប្រាស់អក្ខរក្រម
We support this proposal because it has included all the Cham sounds and symbols that we need to write and read in Cham KakKhak script.

នេះគឺជាឈ្មោះនៃអ្នកអនុញ្ញាតឱ្យប្រើប្រាស់អក្ខរក្រម
These are the names of the people who endorse this proposal with its signatures.

១ (ឈ្មោះ) អ្នកប្រឹក្សាប្រតិបត្តិការអនុញ្ញាតឱ្យប្រើប្រាស់អក្ខរក្រម
1. Chief Imam of entire Cham Iman San Group (OngKhnuo Math Sa)

២ (ឈ្មោះ) អ្នកប្រឹក្សាប្រតិបត្តិការអនុញ្ញាតឱ្យប្រើប្រាស់អក្ខរក្រម
2. Imam right hand of Srae Prey village (Kokk Math)

៣ (ឈ្មោះ) អ្នកប្រឹក្សាប្រតិបត្តិការអនុញ្ញាតឱ្យប្រើប្រាស់អក្ខរក្រម
3. Head Imam of Phum Keoh village (Math Soum)

៤ (ឈ្មោះ) អ្នកប្រឹក្សាប្រតិបត្តិការអនុញ្ញាតឱ្យប្រើប្រាស់អក្ខរក្រម
4. Head Imam of Phum Cagho village (Ol Lee)

Sincerely

អ្នកប្រឹក្សាប្រតិបត្តិការអនុញ្ញាតឱ្យប្រើប្រាស់អក្ខរក្រម
The Chief Imam of the Islamic Community Kan Imam San of Cambodia

OngKhnuo Math Sa

ISO/IEC JTC 1/SC 2/WG 2
PROPOSAL SUMMARY FORM TO ACCOMPANY SUBMISSIONS
FOR ADDITIONS TO THE REPERTOIRE OF ISO/IEC 10646⁴

Please fill all the sections A, B and C below.

Please read Principles and Procedures Document (P & P) from <http://std.dkuug.dk/JTC1/SC2/WG2/docs/principles.html> for guidelines and details before filling this form.

Please ensure you are using the latest Form from <http://std.dkuug.dk/JTC1/SC2/WG2/docs/summaryform.html>.

See also <http://std.dkuug.dk/JTC1/SC2/WG2/docs/roadmaps.html> for latest Roadmaps.

A. Administrative

1. Title:	Western Cham		
2. Requester's name:	Martin Hosken		
3. Requester type (Member body/Liaison/Individual contribution):	Individual Contribution		
4. Submission date:	12/Nov/2020		
5. Requester's reference (if applicable):			
6. Choose one of the following:			
This is a complete proposal:	<input checked="" type="checkbox"/>		
(or) More information will be provided later:	<input type="checkbox"/>		

B. Technical – General

1. Choose one of the following:			
a. This proposal is for a new script (set of characters):	<input checked="" type="checkbox"/>		
Proposed name of script:	Western Cham		
b. The proposal is for addition of character(s) to an existing block:	<input checked="" type="checkbox"/>		
Name of the existing block:	Arabic; Arabic Supplemental Symbols		
2. Number of characters in proposal:	96		
3. Proposed category (select one from below - see section 2.2 of P&P document):			
A-Contemporary <input checked="" type="checkbox"/>	B.1-Specialized (small collection)	B.2-Specialized (large collection)	
C-Major extinct <input type="checkbox"/>	D-Attested extinct	E-Minor extinct	
F-Archaic Hieroglyphic or Ideographic <input type="checkbox"/>	G-Obscure or questionable usage symbols		
4. Is a repertoire including character names provided?	yes		
a. If YES, are the names in accordance with the "character naming guidelines" in Annex L of P&P document?	yes		
b. Are the character shapes attached in a legible form suitable for review?	yes		
5. Fonts related:			
a. Who will provide the appropriate computerized font to the Project Editor of 10646 for publishing the standard?	SIL International		
b. Identify the party granting a license for use of the font by the editors (include address, e-mail, ftp-site, etc.):	martin_hosken@sil.org		
6. References:			
a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided?	yes		
b. Are published examples of use (such as samples from newspapers, magazines, or other sources) of proposed characters attached?	yes		
7. Special encoding issues:			
Does the proposal address other aspects of character data processing (if applicable) such as input, presentation, sorting, searching, indexing, transliteration etc. (if yes please enclose information)?	yes		

8. Additional Information:

Submitters are invited to provide any additional information about Properties of the proposed Character(s) or Script that will assist in correct understanding of and correct linguistic processing of the proposed character(s) or script. Examples of such properties are: Casing information, Numeric information, Currency information, Display behaviour information such as line breaks, widths etc., Combining behaviour, Spacing behaviour, Directional behaviour, Default Collation behaviour, relevance in Mark Up contexts, Compatibility equivalence and other Unicode normalization related information. See the Unicode standard at <http://www.unicode.org> for such information on other scripts. Also see Unicode Character Database (<http://www.unicode.org/reports/tr44/>) and associated Unicode Technical Reports for information needed for consideration by the Unicode Technical Committee for inclusion in the Unicode Standard.

⁴ Form number: N4502-F (Original 1994-10-14; Revised 1995-01, 1995-04, 1996-04, 1996-08, 1999-03, 2001-05, 2001-09, 2003-11, 2005-01, 2005-09, 2005-10, 2007-03, 2008-05, 2009-11, 2011-03, 2012-01)

C. Technical - Justification

1. Has this proposal for addition of character(s) been submitted before?	yes
If YES explain	L2/20-061
2. Has contact been made to members of the user community (for example: National Body, user groups of the script or characters, other experts, etc.)?	yes
If YES, with whom?	supporting letter enclosed
If YES, available relevant documents:	
3. Information on the user community for the proposed characters (for example: size, demographics, information technology use, or publishing use) is included?	no
Reference:	
4. The context of use for the proposed characters (type of use; common or rare)	common
Reference:	
5. Are the proposed characters in current use by the user community?	yes
If YES, where? Reference:	This document
6. After giving due considerations to the principles in the P&P document must the proposed characters be entirely in the BMP?	no
If YES, is a rationale provided?	
If YES, reference:	
7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)?	yes
8. Can any of the proposed characters be considered a presentation form of an existing character or character sequence?	no
If YES, is a rationale for its inclusion provided?	
If YES, reference:	
9. Can any of the proposed characters be encoded using a composed character sequence of either existing characters or other proposed characters?	no
If YES, is a rationale for its inclusion provided?	
If YES, reference:	
10. Can any of the proposed character(s) be considered to be similar (in appearance or function) to, or could be confused with, an existing character?	yes
If YES, is a rationale for its inclusion provided?	yes
If YES, reference:	This document
11. Does the proposal include use of combining characters and/or use of composite sequences?	yes
If YES, is a rationale for such use provided?	yes
If YES, reference:	This document
Is a list of composite sequences and their corresponding glyph images (graphic symbols) provided?	no
If YES, reference:	
12. Does the proposal contain characters with any special properties such as control function or similar semantics?	no
If YES, describe in detail (include attachment if necessary)	
13. Does the proposal contain any Ideographic compatibility characters?	no
If YES, are the equivalent corresponding unified ideographic characters identified?	
If YES, reference:
