

Proposed kMandarin Values

John H. Jenkins

6 April 2020

I've gone through Fenn's *Chinese-English Pocket Dictionary* (kFenn, kFennIndex) and Mathews' *Chinese-English Dictionary* (kMatthews) to cull definitions and Mandarin readings where there were none. I've found the following characters can have kMandarin values given them based on these authorities (plus one from the *Hanyu Da Zidian*):

U+348B	儻	sī
