Title: Feedback on MC-00137 glyph in L2/20-203
Source: Eiso Chan (陈永聪)
Status: Individual Contribution
Action: For consideration by UTC and MSARG
Date: 2020-8-26

Macao SARG submitted 5 UNCs, and IRG members and experts have reviewed for one round, but there is still one questionable glyph issue, I list it here.

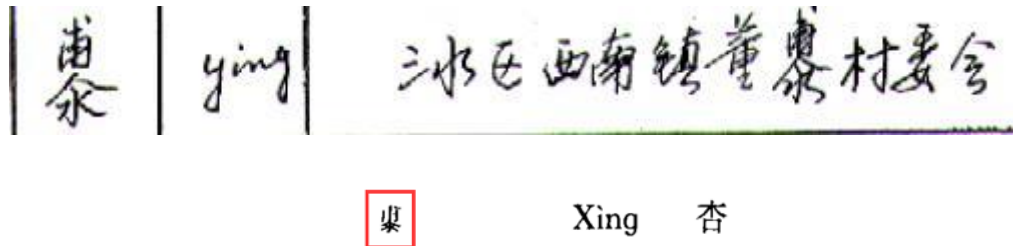

The current MC-00137 glyph and the corresponding meta data are shown as below.

3	MC-00137		MC-00137-200702.bmp	85.0	9	1	13	0		No	E_MC-00137.png	Included in IRG WS 2017 v5.0 (IRGN2423): SN 02004 (GDM-00085, UTC-02993)
---	----------	---	---------------------	------	---	---	----	---	---	----	----------------	--

When we check the submitted evidence for this character by Macao SARG, which is not clear enough, but we can know the bottom is 𪗇 (U+6C3A) not 水 (U+6C34).

Macao SARG has pointed out this character could be unified with WS2017-02004:GDM-00085/UTC-02993. I showed the submitted evidence for GDM-00085 and UTC-02993 as below.

Three pieces of evidence above show the characters are used in Foshan City, Guangdong Province, PRC. And, MC-00137 and GDM-00085 mean the same place.

Source	Place
MC-00137	佛山市三水区西南街
GDM-00085	佛山市三水区西南镇
UTC-02993	佛山市南海市

One WeChat Subscription account 三水潮生活 published [an article](#) related to the village mentioned by MC-00137 and GDM-00085, and we can find out the pictures of the real use of this character in the article.

It's clear that the bottom is 寨 (U+6C3A) not 水 (U+6C34).

China NB has modified the GDM-00085 to match the real use after releasing IRG WS2017 v5.1 as below.

02004 Trad	水 85.9		寨 (v5.1)	寨 UTC-02993	IRGN2435WS2017v5.1 Pending Postponed for disunification of GDM-00085 vs UTC-02993, 2020-06. unifies 02007, irg50.

I request MSARG for consideration to modify the MC-00137 glyph to match the real use like China NB.
