Subject: Modern Gurage Orthography Additions to Ethiopic Script

Date: January 11, 2021

I. Background

The Gurage Zone comprises 13 districts wherein the major indigenous languages clustered into three subgroups are spoken. The sub-groups of Gurage include (1) North Gurage (Kistane-ክስታኔ also called Soddo-ሶዶ, gru) and Dobbi-ዶብቢ (also called Gogot-ጎጎት), (2) West Gurage that consists of three sub-groups; namely, Mesqan-መስቃን, mvz, Central West Gurage (Chaha-ቸሃ, Ezha-እዛ, Gumer-ጉሙር, Muhir-ሙህር, and Gura-ጉራ), and Peripheral West Gurage (Inor-እኖር, ior, Endegagn-እንደጋን, Ennar-ኤነር, and Geto-ጌቶ), and (3) East Gurage (Wolane-ወለኔ, Silte-ሰልጤ and Zay-ዛይ). The term Səbatbet-ሰባት ቤት, sgw, which was a regional social organization, is used in some literature to include the Central West Gurage and Peripheral West Gurage language varieties. The Gurage languages, excluding Silte and Zay, are spoken by 1.8 million people (2007 estimate by The Ethiopian Central Statistics Authority). The Gurage Zone Administration Council (GZAC), the regions highest authority, has the legal mandate to support in public communications and education. The districts, sub-district and peoples' names in some cases are similar or identical to the language variety name, which is a common source of confusion. Figure 1 presents a map of the Gurage Zone and its districts. Note the similarity of district names to language names.

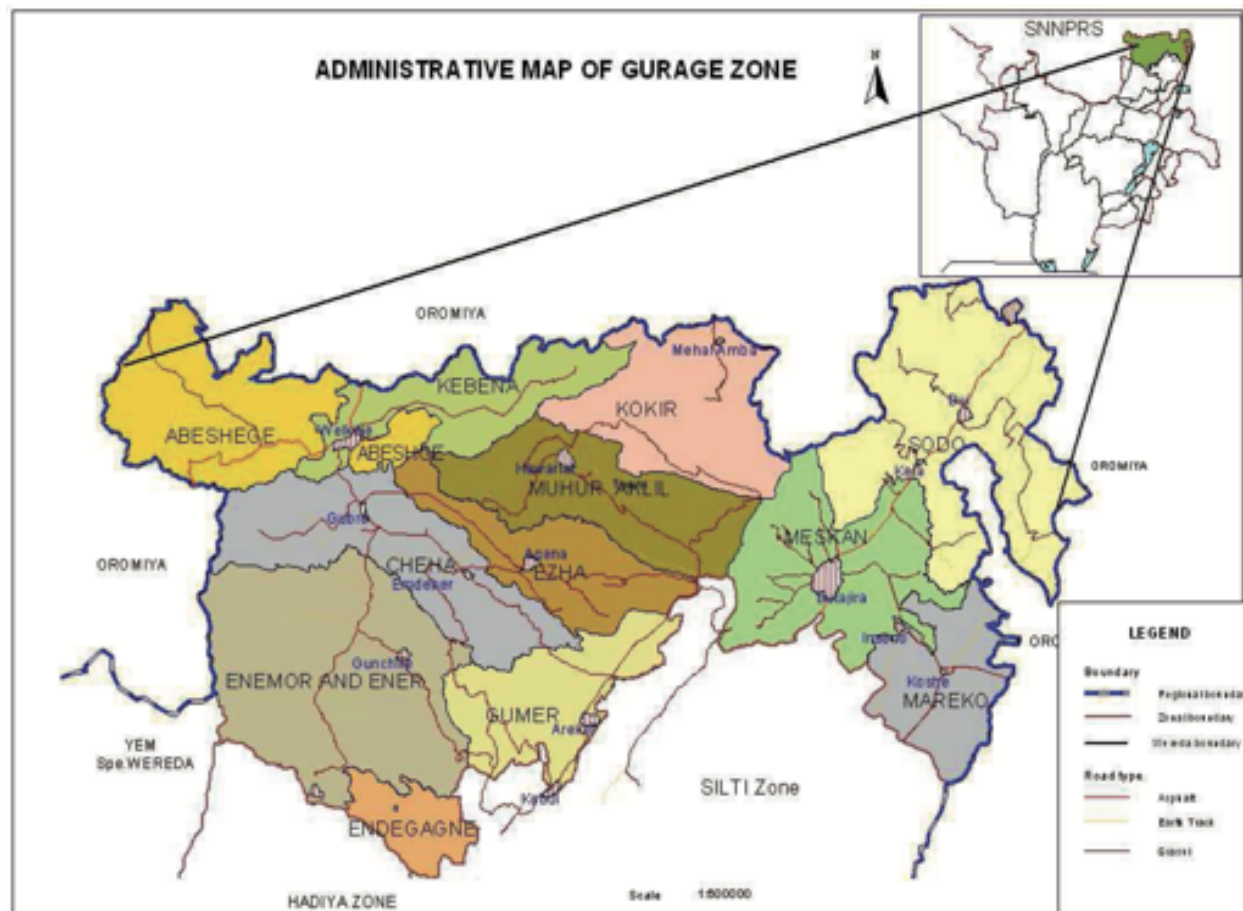

Figure 1: Administrative map of the Gurage Zone (Menuta, 2015, Page 6)

11 January 2021

It is the practice within Ethiopia, and the policy of the GZAC, to refer any of these language identities, and sub-ethnicities, simply, neutrally, and inclusively as “Gurage”. When greater specificity is required, the term “Gurage” will be appended, for example “Soddo-Gurage”, “Sebat Bet Gurage”, etc. However, whenever possible, the unifying term “Gurage” will be used. This is the case when the GZAC endorsed an orthography, The Gurage Fider (alphabet), developed by local language experts over several years and debated and refined in locally held workshops. The Gurage Fider is designed to meet the written language needs of all languages and varieties indigenous to the Gurage Zone that the GZAC is in turn responsible for. To deploy a Gurage orthography widely, it was found necessary to revise an older orthography to improve clarity of reading, ease of learning and writing. Due to the difficulties inherent with the prior orthography, it had only found limited use in publishing and public life. The following summarizes some milestones in the development of the orthography and presents the new letters in the following sections.

In December of 2013, the Gurage Zone regional government endorsed a new orthography for the Gurage language (ISO 639: *sgw*) that included new letter shapes proposed in the PhD. work of Dr. Fekede Menuta (GZTC 2013). In 2017 (2009 EC) the GZTC approached Wolkite Univeristy to develop a computer font and keyboard software for the orthography. The Wolkite University computer science department proceeded to develop the first computer font for the orthography, “Yetenbi” (meaning “Welcome”), which became available in the same year (Wolkite 2018). In early 2019, a 2nd font, “Zebidar”, and Keyman based computer and mobile keyboard was made available freely online and later expanded to include six fonts supporting the new orthography (GFF 2019).

The GZAC endorsed the orthography in 2019 and introduced it into the public school system at the start of the 2013EC school year (September 2020). Elementary school educators were trained in the new orthography and provided basic teaching materials. A mobile platform application for teaching the syllabary and basic vocabulary was also produced to supplement these materials MarkBill (2020).

It is worth noting that Silt’e (ሰልጢ, *stv*) has historically been grouped in with the Gurage languages and peoples by linguists and ethnographers. However, since the Silt’e people are now governed under their own administrative “Silt’e Zone”, they were not stakeholders when the new orthography was devised. An exception is the Wolane (ወለኔ, *wle*) dialect of Silt’e which is a language of the Gurage Zone. Similarly for the Zay (ዛይ, *zwa*) language and people, who reside in a Gurage exclave in a neighboring administrative region (on the islands of Lake Zway in the Oromia Region). However, we believe the new orthography also meets the needs of these now external, but related, languages.

II. Proposed characters

Ila. List of proposed character

Support in formal standard for a Gurage orthography first appears in the Ethiopian national standard ES-781 in 2002. The Unicode Standard followed with adoption of the ES-781 inventory in version 4.1 of the standard published 2005. The special Gurage palatalized letters were encoded in the “Ethiopic Extended” block in the address range U+2DC0 – U+2DDE, and the labiovelar syllables were encoded in the “Ethiopic Supplement” block in the address range U+1380 – U+138F. In both blocks the sub-heading label “Syllables for Sebatbeit” appears in the listings of these respective ranges.

The choice of “Sebatbeit” when the letters were proposed for inclusion in the standard was a consequence of publishing up to that point having only been made in the “Sebatbeit” language[†]. Utilization of the letters by neighboring languages was unknown to the parties involved in the ES-781 definition. Indeed, none of the individuals developing the standard resided in, or hailed from, the Gurage Zone nor were they fluent in any of the languages of the region but were simply acting on behalf of publishers who had a focus on Sebatbeit at that time. When we consider the inherent multilingual nature of the letters (by Innor, Mesqan, Sebat Bet, and Sodo), “Gurage” can be understood as an inclusive moniker that does not imply the letters are intended for, or the cultural property of, any one group more so than another.

The term “SEBATBEIT” also appears in the Ethiopic Supplement block as a modifier term for letter names. The choice of “SEBATBEIT” here is in keeping with the sub-heading label and is applied only when a conflict would occur with a letter name found in the Ethiopic Basic range. For example, U+121F (ሸ) has the name “ETHIOPIC SYLLABLE MWA”, and under Unicode naming conventions for Ethiopic syllables the same name would be logical and expected for U+1380 (ሸሸ). Injecting “SEBATBEIT” into names in the four cases where a conflict occurred produced an identifier that remained systematic and intuitive, e.g. “ETHIOPIC SYLLABLE SEBATBEIT MWA”.

Following this prior convention, the broader term “GURAGE” is employed similarly to distinguish letter names when a conflict would occur in either the Ethiopic Basic or Ethiopic Supplement ranges. Table 1 presents the 28 letters required of modern Gurage orthography. The table provides the shapes, names, relative ordering, and figure references for each letter.

ሸ	U+1E7E0 ETHIOPIC SYLLABLE HHYA. Figures 2, 3, 12, 21, and 29.
ሸሸ	U+1E7E1 ETHIOPIC SYLLABLE HHYU. Figures 2, 3, 17, 21, and 29.
ሸሸሸ	U+1E7E2 ETHIOPIC SYLLABLE HHYI. Figures 2, 3, 16, 21, and 29.

Table 1: Modern Gurage Additions to the Ethiopic Syllabary

In Table 1 four gaps are present for reserved code points. The first, at U+1E7E7 is in keeping with the Ethiopic encoding principle in the Unicode Standard whereby eight positions are allocated per syllabic family. Most, but not all, syllabic families will have a member occupying the eighth position. Past experience found that the eighth position may later be populated when a corresponding syllable is found in a language when it begins using Ethiopic script for its orthography. Accordingly, U+1E7E7 may later be populated with a HHYWA or HHYOA syllable if its availability is later found to be required by another language. The remaining unassigned positions, U+1E7EC, U+1E7EF, and U+1E7FF have correspondence with syllables still in use from the prior orthography that might have otherwise occupied these syllabic and code positions (U+1380, U+1383, and U+138F accordingly).

Proposed Ethiopic Extended-B Description for the Core Specification

A description of the Ethiopic Extended-B block that also helps explain the name choices is offered in the following: *“The Ethiopic Extended-B block contains extensions for Modern Gurage Orthography which covers the languages Inor, Mesqan, Sebatbeit and Soddo. Letters used by Sebatbeit were encoded in other Ethiopic blocks at a time when utilization by additional languages was unknown or uncertain. The term “SEBATBEIT” was then applied to help form unique letter names in the Ethiopic Supplement block. The broader term “GURAGE” is used in its place in the Extended-B block as the need arises.”*

IIb. Additional information on characters

The letter additions for Modern Gurage include seven fricative voiceless palatized syllables in ‘x’ (IPA) that are unique to the Gurage language and presented in Table 2. The remainder are labial velar syllables and are presented in Table 3.

Palatized Vowels

Letter	ሕ	ሖ	ሗ	መ	ሙ	ሚ	ሙ
IPA	xʲə	xʲu	xʲi	xʲa	xʲe	xʲɨ	xʲo

Table 2: Gurage Fricative Voiceless Palatized Syllables in ‘x’

Labialized Velars

IPA	ʷə	ʷɨ	ʷe	ʷɨ
h	ሐ	ሐ።	ሐ፣	ሐ፤
m		ማ።	ማ፣	
b		ቦ።	ቦ፣	
q		ቂ።	ቂ፣	ቂ፤
k		ከ።	ከ፣	ከ፤
g		ገ።	ገ፣	ገ፤
f		ፊ።	ፊ፣	
p		ፑ።	ፑ፣	

Table 3: Gurage Labialized Velar Syllables

Summary of Orthography Basic Principles

The Modern Gurage Orthography introduces simplifications over its predecessor to improve reading clarity and to ease the learning process in elementary schools by virtue of the graphic simplifications and greater regularity of shapes. The letters with a caron (or háček, ˇ) mark to denote palattizations in the previous orthography are replaced by corresponding letters that feature the Ethiopic macron (̄). Three mappings could thus be made onto already available elements within the Ethiopic script. It was then found necessary to introduce a single new letter series in “ሕ”, to provide an intuitive shape for the palatized ‘x’. This simplification eliminates two graphically similar shapes derived from “ከ”, and allows the student to familiarize with only a single upper mark (the macron).

IPA	Legacy	Modern
h	ከ̇	ሐ
xʲ	ከ̇	ሕ
kʲ	ከ̇	ከ̄
qʲ	ቂ̇	ቂ̄
gʲ	ገ̇	ገ̄
ə	ኦ̇	ኦ
a	ኦ̇	ኦ

Table 4: Gurage Orthography Changes for Palattizations and Two Glottal Vowels

The new orthography improves upon its predecessor by making the distinction between the ^wi and ^wɨ orders even more pronounced. The ^ɥ diacritical mark is applied consistently to basic syllabic orders and becomes a mnemonic shape signaling the rounding diphthong. An exception is made for the ^wa order which is deeply ingrained in orthographies across Ethiopia for many languages and so the Gurage orthography maintains consistency with its neighbors. The four other labiovelar orders, on the other hand, are very frequent in Gurage languages and are rarely used in the few other outside languages that employ them.

IPA	Legacy	Modern	IPA	Legacy	Modern	IPA	Legacy	Modern
m ^w i	ጠጐ	ጠጐ	m ^w e	ጠጐ	ጠጐ			
b ^w i	ቡጐ	ቡጐ	b ^w e	ቡጐ	ቡጐ			
q ^w i	ቃጐ	ቃጐ	q ^w e	ቃጐ	ቃጐ	q ^w ɨ	ቃጐ	ቃጐ
k ^w i	ከጐ	ከጐ	k ^w e	ከጐ	ከጐ	k ^w ɨ	ከጐ	ከጐ
g ^w i	ገጐ	ገጐ	g ^w e	ገጐ	ገጐ	g ^w ɨ	ገጐ	ገጐ
f ^w i	ፈጐ	ፈጐ	f ^w e	ፈጐ	ፈጐ			
p ^w i	ፑጐ	ፑጐ	p ^w e	ፑጐ	ፑጐ			

Table 5: Gurage Orthography Changes for Labiovelar Syllables

The four labiovelar orders of ሐ given in Table 3 are newly introduced and required to support the shift away from ኸ in the previous orthography.

Note that the Inor, Mesqan, and Sebat Bet languages all require both the palatized families and labiovelar for their written languages. While the Soddo language features no palatizations but does use the labiovelars in h^w, k^w, q^w, and g^w.

Modern and Legacy Orthography in Ethiopic Unicode Blocks

In the Ethiopic Supplement block a number of the letters are utilized in the modern orthography. They are U+1380 (ጠጐ), U+1383 (ፑጐ), U+1384 (ቡጐ), U+1387 (ቃጐ), U+1388 (ፈጐ), U+138B (ገጐ), U+138C (ፑጐ) and U+138F (ፑጐ). All other letters under the “Syllables for Sebatbeit” subsection are part of the legacy orthography only. A suggested for a new subsection heading here is “Syllables for Gurage Orthographies”.

In the Ethiopic Extended block, all letters under the “Syllables for Sebatbeit” heading are elements of the older orthography convention. A recommendation is to relabel this section with “Syllables for Legacy Gurage”.

Table 6 presents the Modern Gurage Orthography letters and their orthographic correspondences in the prior orthography. The table may be used to define bidirectional transliteration mappings between the legacy and modern orthographies.

Table 7: Modern Gurage Letter Properties

IV. Collation (Sort order)

The new letters of the Modern Gurage Orthography are phonetically equivalent to the letters of the prior orthography that they supersede and may collate in the same way. A best practice is to avoid using the two orthographies together in the same document for any text that renders a Gurage language. In the unexpected case where the two orthographies are used together, the new letters may sort immediately after their new counterparts as per Table 6.

VII. ISO Proposal Summary Forms

A complete ISO/IEC N4502 form is provided on the following pages.

**ISO/IEC JTC 1/SC 2/WG 2
PROPOSAL SUMMARY FORM TO ACCOMPANY SUBMISSIONS
FOR ADDITIONS TO THE REPERTOIRE OF ISO/IEC 10646**

Please fill all the sections A, B and C below.

Please read Principles and Procedures Document (P & P) from <http://std.dkuug.dk/JTC1/SC2/WG2/docs/principles.html> for guidelines and details before filling this form.

Please ensure you are using the latest Form from <http://std.dkuug.dk/JTC1/SC2/WG2/docs/summaryform.html>.

See also <http://std.dkuug.dk/JTC1/SC2/WG2/docs/roadmaps.html> for latest Roadmaps.

A. Administrative

1. Title: *Proposal to Encode Modern Gurage Orthography Characters in the UCS*

2. Requester's name: *Dr. Fekede Menuta, Feidu Akmel, Daniel Yacob*

3. Requester type (Member body/Liaison/Individual contribution): *Individual Contribution*

4. Submission date: *2020-01-05*

5. Requester's reference (if applicable):

6. Choose one of the following:

This is a complete proposal:

Yes

(or) More information will be provided later:

B. Technical – General

1. Choose one of the following:

a. This proposal is for a new script (set of characters):

Yes

Proposed name of script:

Modern Gurage Orthography

b. The proposal is for addition of character(s) to an existing block:

Name of the existing block:

2. Number of characters in proposal:

28

3. Proposed category (select one from below - see section 2.2 of P&P document):

A-Contemporary

X

B.1-Specialized (small collection)

B.2-Specialized (large collection)

C-Major extinct

D-Attested extinct

E-Minor extinct

F-Archaic Hieroglyphic or Ideographic

G-Obscure or questionable usage symbols

4. Is a repertoire including character names provided?

Yes

a. If YES, are the names in accordance with the "character naming guidelines" in Annex L of P&P document?

Yes

b. Are the character shapes attached in a legible form suitable for review?

5. Fonts related:

a. Who will provide the appropriate computerized font to the Project Editor of 10646 for publishing the standard?

The Ge'ez Frontier Foundation

b. Identify the party granting a license for use of the font by the editors (include address, e-mail, ftp-site, etc.):

The Ge'ez Frontier Foundation, yacob@geez.org, <https://github.com/raeytype/gurage-font-collection>

6. References:

a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided?

Yes

b. Are published examples of use (such as samples from newspapers, magazines, or other sources) of proposed characters attached?

Yes

7. Special encoding issues:

Does the proposal address other aspects of character data processing (if applicable) such as input, presentation, sorting, searching, indexing, transliteration etc. (if yes please enclose information)?

Yes

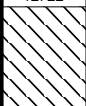

A sorting description is enclosed.

8. Additional Information:

Submitters are invited to provide any additional information about Properties of the proposed Character(s) or Script that will assist in correct understanding of and correct linguistic processing of the proposed character(s) or script. Examples of such properties are: Casing information, Numeric information, Currency information, Display behaviour information such as line breaks, widths etc., Combining behaviour, Spacing behaviour, Directional behaviour, Default Collation behaviour, relevance in Mark Up contexts, Compatibility equivalence and other Unicode normalization related information. See the Unicode standard at <http://www.unicode.org> for such information on other scripts. Also see Unicode Character Database (<http://www.unicode.org/reports/tr44/>) and associated Unicode Technical Reports for information needed for consideration by the Unicode Technical Committee for inclusion in the Unicode Standard.

C. Technical - Justification

1. Has this proposal for addition of character(s) been submitted before?	No
If YES explain	
2. Has contact been made to members of the user community (for example: National Body, user groups of the script or characters, other experts, etc.)?	Yes
If YES, with whom? Gurage Zone Administration Council	
If YES, available relevant documents: Letter enclosed	
3. Information on the user community for the proposed characters (for example: size, demographics, information technology use, or publishing use) is included?	Yes
Reference: Ethiopian Central Statistics Authority	
4. The context of use for the proposed characters (type of use; common or rare)	Common
Reference: Letter frequency found in cited publications	
5. Are the proposed characters in current use by the user community?	Yes
If YES, where? Reference: Gurage Zone, Ethiopia	
6. After giving due considerations to the principles in the P&P document must the proposed characters be entirely in the BMP?	No
If YES, is a rationale provided?	
If YES, reference:	
7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)?	Yes
8. Can any of the proposed characters be considered a presentation form of an existing character or character sequence?	No
If YES, is a rationale for its inclusion provided?	
If YES, reference:	
9. Can any of the proposed characters be encoded using a composed character sequence of either existing characters or other proposed characters?	No
If YES, is a rationale for its inclusion provided?	
If YES, reference:	
10. Can any of the proposed character(s) be considered to be similar (in appearance or function) to, or could be confused with, an existing character?	Yes
If YES, is a rationale for its inclusion provided?	
If YES, reference: Enclosed.	
11. Does the proposal include use of combining characters and/or use of composite sequences?	No
If YES, is a rationale for such use provided?	
If YES, reference:	
Is a list of composite sequences and their corresponding glyph images (graphic symbols) provided?	
If YES, reference:	
12. Does the proposal contain characters with any special properties such as control function or similar semantics?	No
If YES, describe in detail (include attachment if necessary)	
13. Does the proposal contain any Ideographic compatibility characters?	No
If YES, are the equivalent corresponding unified ideographic characters identified?	
If YES, reference:

From: Gurage Zone Administration

Subject: Unicode for Gurage Orthography

For over half a century the Gurage language has used the Amharic Fidel with some additional letters developed for sounds which are not found in Amharic. It is not clearly known who shaped these additional letters. The writing system was used to publish some fictional works in Gurage language as well as a New Testament, called *Geder Gurda*, and the complete Bible called *Met'af Qidus*. As Gurage language was not in the past used in institutions such as education, media and administration bureaus, the orthography was not officially recognized. Recently, the need for introducing the Gurage language for education necessitated improvement of the pre-existing orthography in order to make it simple and pattern based so that students can learn it quickly and write without difficulty. The new orthography was evaluated continuously by linguists and educators through several workshops since 2020. It was finally officially endorsed by Gurage Zone Administration Council in 29/01/2013. The orthography has also been introduced on a limited basis in the school system since September 2020. This letter is therefore to request the Unicode Consortium help us with our primary technical challenge by adopting the letters in the Unicode Standard so that we may then enjoy the benefit of using our language in all modern digital devices. A table of the Gurage Fider ("Alphabet") is presented on the following page.

Sincerely yours,
