Proposal to Encode Lao Yamakkan

Vinodh Rajan vinodh@virtualvinodh.com
Jayasāro Bhikkhu ven.chaisiri@gmail.com

L2/17-106R proposed the encoding of several characters required for the writing of Pali in the Lao script. This proposal requests the encoding of one more character, Lao Yamakkan, to further support Lao Pali in the UCS. This will not only facilitate proper digitization of existing documents but also allow contemporary use of the character.

Certain Pali publications in the Lao script use a sign cognate with Thai Character Yamakkan ຟ to denote a consonant that is shared between the preceding syllable and the succeeding syllable at the inter-syllabic boundary. From [1]:

This may be translated as:

“2. Maiyāma(k)kāra “This figure ” happiness “ is to be written on top of consonantal clusters (When the sign ” happiness “ is on top of a consonant and if there are other consonants or vowels in front of it, it is to be pronounced 1st consonant half and a 2nd consonant half) as follows”

```
In essence, this sign appears to mark a consonant that is simultaneously a part of two consonant clusters (by splitting itself into two halves). The first half is associated with the preceding syllable and the second half with the succeeding syllable. This is different from gemination where a consonant doubles itself.

gatvā = ga_t_vā

dīsvā = dī_s_vā

It probably applies to consonantal clusters that are composed of a varga (plosive/nasal) and non-varga (glide/liquid/fricative) consonants. However, the current attestation is only limited to clusters with -v, -y or -h as the final consonant.

The Lao term Yamakkan is most likely to be derived from the Pali/Sanskrit term yamaka-kāra, which can be roughly translated as the twin letter.

A parallel usage is also seen in some Thai orthographies for Pali that differentiate consonant clusters based on their components. Here, Thai Thanthakhat U+0E4C is used for normal clusters and Yamakkan U+0E4E for varga/von-varga clusters.

(From [2])

Visual Appearance

The character is attached at the top-right position of a consonant and usually extends over the succeeding character as seen below. An alternate positioning over a single base is also attested in [1].

(From [2])
In Pali text, the character appears almost always with the sign Pali Virama U+0EBA as evident by the above samples. As the sign applies to a dead consonant (that becomes eventually split), it should be recommended that the sign follow the sign Pali Virama in terms of input order as shown below.

\[
\text{አereço} = \text{አ} + \text{ DatabaseReference} + \text{ Autism } + \text{ Autism }
\]

\[
\text{Events} = \text{Events} + \text{ DatabaseReference} + \text{ Autism }
\]

However, when appearing amidst Lao text it is common for it to appear without the Pali Virama.

There is also a glyphic variation of the character taking a form similar to that of Thai Yamakkan over a single base.

(From https://laofonts.tripod.com/keymap_Khunburom.html)

**Interaction with Tone Marks**

As a Pali-specific character, it is very unlikely that Lao Yamakkan will ever appear alongside tone marks (The are currently no attestations that we know of). However, if there is a need to place a tone mark over a syllable, it can adhere to the usual Lao script grammar, by following the Yamakkan in terms of input order and be placed over it similar to other top-positioned vowel signs.
Character to be encoded

We propose to encode the following character in the Lao block of the UCS with the associated character properties.

OECE  Lao Yamakkan

OECE;LAO YAMAKKAN;Mn;0;NSM;;;;;N;;;;;

Indic Syllable Properties

It must be noted that the Thai Yamakkan is assigned a Indic Syllable Property of “Pure Killer”. But this does not match Lao Yamakkan’s attested usage. As discussed earlier, even though the description might appear to suggest gemination, it rather denotes the sharing of a consonant between two syllables. Therefore, it is proposed to classify it as a syllable modifier rather than a gemination mark.

The following addition should be made to the IndicSyllabicCategory.txt file under:

# Indic_Syllabic_Category=Syllable_Modifier
OECE ; Syllable_Modifier # Mn LAO YAMAKKAN

Indic Positional Category

The following addition should be made to the IndicPositionCategory.txt file under:

# Indic_Positional_Category=Top
OECE ; Top # Mn LAO YAMAKKAN

Collation

The character must be collated after Lai Sign Pali Virama U+0EBA.
Additional Attestations

From [3]:

Yāmakkan  n. mark directed consonants for reading the cluster consonants (s.) (figure as follows: ^^)
References

A. Administrative

1. Title: **Proposal to Encode Lao Yamakkan**

2. Requester's name: Vinodh Rajan, Jayasāro Bhikkhu

3. Requester type (Member body/Liaison/Individual contribution): Individual

4. Submission date: 21-Apr-2021

5. Requester's reference (if applicable): 

6. Choose one of the following:

   a. This is a complete proposal: Yes

   b. More information will be provided later: 

B. Technical – General

1. Choose one of the following:

   a. This proposal is for a new script (set of characters):

   Proposed name of script: 

   b. The proposal is for addition of character(s) to an existing block:

   Name of the existing block: Lao

2. Number of characters in proposal: 1

3. Proposed category (select one from below - see section 2.2 of P&P document):

   A. Contemporary
   B.1-Specialized (small collection)
   B.2-Specialized (large collection)
   C. Major extinct
   D. Attested extinct
   E. Minor extinct
   F. Archaic Hieroglyphic or Ideographic
   G. Obscure or questionable usage symbols

4. Is a repertoire including character names provided?

   a. If YES, are the names in accordance with the "character naming guidelines" in Annex L of P&P document? Yes

   b. Are the character shapes attached in a legible form suitable for review? Yes

5. Fonts related:

   a. Who will provide the appropriate computerized font to the Project Editor of 10646 for publishing the standard? Jayasāro Bhikkhu, Sanit Phokhaphan, Vinodh Rajan

   b. Identify the party granting a license for use of the font by the editors (include address, e-mail, ftp-site, etc.): ven.chaisiri@gmail.com, sanit2001@hotmail.com, vinodh@virtualvinodh.com

6. References:

   a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided? Yes

   b. Are published examples of use (such as samples from newspapers, magazines, or other sources) of proposed characters attached? Yes

7. Special encoding issues:

   Does the proposal address other aspects of character data processing (if applicable) such as input, presentation, sorting, searching, indexing, transliteration etc. (if yes please enclose information)? Collation

8. Additional Information:

   Submitters are invited to provide any additional information about Properties of the proposed Character(s) or Script that will assist in correct understanding of and correct linguistic processing of the proposed character(s) or script. Examples of such properties are: Casing information, Numeric information, Currency information, Display behaviour information such as line breaks, widths etc., Combining behaviour, Spacing behaviour, Directional behaviour, Default Collation behaviour, relevance in Mark Up contexts, Compatibility equivalence and other Unicode normalization related information. See the Unicode standard at http://www.unicode.org for such information on other scripts. Also see Unicode Character Database (http://www.unicode.org/reports/tr44/) and associated Unicode Technical Reports for information needed for consideration by the Unicode Technical Committee for inclusion in the Unicode Standard.
### C. Technical - Justification

<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Has this proposal for addition of character(s) been submitted before?</td>
<td>No</td>
</tr>
<tr>
<td>If YES explain</td>
<td></td>
</tr>
<tr>
<td>2. Has contact been made to members of the user community (for example: National Body, user groups of the script or characters, other experts, etc.)?</td>
<td>Yes</td>
</tr>
<tr>
<td>If YES, with whom?</td>
<td>Jayasăro Bhikkhu is a native user</td>
</tr>
<tr>
<td>If YES, available relevant documents:</td>
<td></td>
</tr>
<tr>
<td>3. Information on the user community for the proposed characters (for example: size, demographics, information technology use, or publishing use) is included?</td>
<td>Yes</td>
</tr>
<tr>
<td>Reference:</td>
<td>See Proposal</td>
</tr>
<tr>
<td>4. The context of use for the proposed characters (type of use; common or rare)</td>
<td>Rare</td>

<tr>
<td>Reference:</td>
<td></td>
</tr>
<tr>
<td>6. After giving due considerations to the principles in the P&amp;P document must the proposed characters be entirely in the BMP?</td>
<td>Yes</td>
</tr>
<tr>
<td>If YES, is a rationale provided?</td>
<td>Yes</td>
</tr>
<tr>
<td>If YES, reference:</td>
<td>Lao is encoded in the BMP</td>
</tr>
<tr>
<td>7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)?</td>
<td>Yes</td>
</tr>
<tr>
<td>8. Can any of the proposed characters be considered a presentation form of an existing character or character sequence?</td>
<td>No</td>
</tr>
<tr>
<td>If YES, is a rationale for its inclusion provided?</td>
<td></td>
</tr>
<tr>
<td>If YES, reference:</td>
<td></td>
</tr>
<tr>
<td>9. Can any of the proposed characters be encoded using a composed character sequence of either existing characters or other proposed characters?</td>
<td>No</td>
</tr>
<tr>
<td>If YES, is a rationale for its inclusion provided?</td>
<td></td>
</tr>
<tr>
<td>If YES, reference:</td>
<td></td>
</tr>
<tr>
<td>10. Can any of the proposed character(s) be considered to be similar (in appearance or function) to, or could be confused with, an existing character?</td>
<td>No</td>
</tr>
<tr>
<td>If YES, is a rationale for its inclusion provided?</td>
<td></td>
</tr>
<tr>
<td>If YES, reference:</td>
<td></td>
</tr>
<tr>
<td>11. Does the proposal include use of combining characters and/or use of composite sequences?</td>
<td>Yes</td>
</tr>
<tr>
<td>If YES, is a rationale for such use provided?</td>
<td>Yes</td>
</tr>
<tr>
<td>If YES, reference:</td>
<td>See Proposal</td>
</tr>
<tr>
<td>Is a list of composite sequences and their corresponding glyph images (graphic symbols) provided?</td>
<td>Yes</td>
</tr>
<tr>
<td>If YES, reference:</td>
<td>See Proposal</td>
</tr>
<tr>
<td>12. Does the proposal contain characters with any special properties such as control function or similar semantics?</td>
<td>No</td>
</tr>
<tr>
<td>If YES, describe in detail (include attachment if necessary)</td>
<td></td>
</tr>
<tr>
<td>13. Does the proposal contain any Ideographic compatibility characters?</td>
<td>No</td>
</tr>
<tr>
<td>If YES, are the equivalent corresponding unified ideographic characters identified?</td>
<td></td>
</tr>
