

Rotations of Egyptian Hieroglyphs to be Registered in Unicode

Daniel A. Werning

v1.0, 5 Jan. 2022

Based on an evaluation of Manuel de Codage encodings from *Thesaurus Linguae Aegyptiae* database (BBAW Berlin, Daniel A. Werning), **Pyramid Text** encoding project (Frank Kammerzell, Daniel A. Werning), **Karnak Project** database (Sébastien Biston-Moulin), **Athribis project** encodings (Christian Leitz, Carolina Teotino), **Kom Ombo project** encodings (Françoise Labrique, Sven Eicke).

Frequency values are minimum frequencies and may combine cases of various similar angles.

Caveat: In the cases marked in pale yellow, the angle of the standard Unicode glyph deviates slightly from the standard angle in JSesh; the corresponding effect has been taken into account in course of the evaluation so that the suggested angles for the rotation still largely make sense.)

Unicode	JSesh	Rotated	Freq.	Listing
			9	13012 FE03; Egyptian Ad-Hoc Working Group; A015 Rotated 30
			1	13091 FE00; Egyptian Ad-Hoc Working Group; D027 Rotated 90
