

Doc Type: Working Group Document
Title: THX correction glyph summary table
Source: TCA and China
Status: Proposal
Action: For consideration by JTC1/SC2/WG2
Reference: N4853, N4973, N5089, N5105, N5117
Date: 2022- 02 -20

The work of encoding THX Shuowen has been completed through the joint efforts of many experts and scholars. However, during the WG2 meeting, many experts expressed their opinions on whether the taboo glyphs should be reverted to their original form and whether the exact duplicate glyphs should not be coded. Therefore, the TCA and China experts have reorganized the THX Shuowen and summarized six correction principles (for details, please refer N5117). The number of corrected THX glyphs according to the correction principles is as follows.

Small Seal Glyph Modification Principles (校正原則)	count
1. Handling of taboo glyphs(避諱字)	12
2. Handling of exact duplicate(重複字形)	17
3. Handling of the original broken glyphs (殘斷字形)	13
4. Handling of the inconsistent component(不一致之部件)	198
5. Handling of possible duplicate(近似字)	3
6. Handling of misprint of the original book(原書誤刻)	57

Excluding the 17 characters of Handling of exact duplicate which are not coded, the other corrected glyphs are 283 characters, as shown in the table below.

In order to avoid the loss of data and to facilitate the research of experts and scholars who are interested in the Shuowen Small Seal Script, TCA has created a website to store the decision making process of modifying the THX glyphs. The website address is <http://seal.cmex.org.tw/>

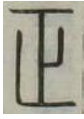

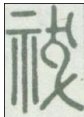

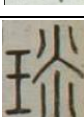

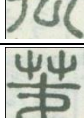

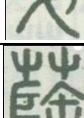

Experts of the working group

TCA: 李鑒(Xian Li), 許學仁(Xue-jen Hsu), 季旭昇(Hsiu-sheng Chi), 袁國華(Kwok-wa Yuen), 魏林梅(Lin-mei Wei)

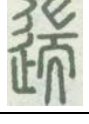

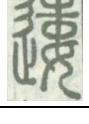

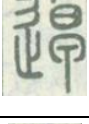

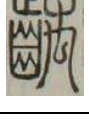

China: 王寧(Wang Ning), 王立軍(Wang Liun), 胡佳佳(Hu Jiajia), 師霞(Bu Shixia), 凌麗君(Ling Lijun), 孟琢(Meng Zhuo), 董靖辰(Dong Jingchen)

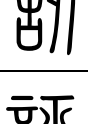

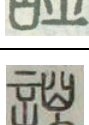

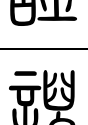

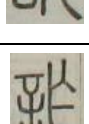

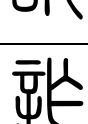

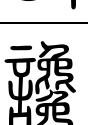

Organization: Chinese Foundation for Digitization Technology, the Project of Chinese Character Repertoire, China Electronics Standardization Institute
