Title: Proposal to encode 114 Tangut components
Source: Andrew West
Status: Individual Contribution
Action: For consideration by JTC1/SC2/WG2 and UTC
Date: 2023-10-02

1. Introduction

This document proposes to encode 114 Tangut components as TANGUT COMPONENT-771 through TANGUT COMPONENT-884 in the range 18D82..18DF3 as part of a new Tangut Components Supplement block. These characters are used for character indexing purposes in the recently-published dictionary of Tangut words, *Xīxiàwén Cídiǎn (shísú wénxiàn bùfēn)* 西夏文词典（世俗文献部分） (Beijing: Zhongguo Shehui kexue chubanshe, 2021), compiled by Hán Xiǎománg 韩小忙. This is an immense nine-volume dictionary of secular Tangut vocabulary (i.e. not covering Buddhist literature, which is anticipated to be covered in a future dictionary), with entries for 6,150 Tangut characters (including 263 variant forms) spanning some 4,872 pages. This is the most important contribution to Tangut lexicography in a generation, and there is no doubt that it will remain the standard reference work for secular Tangut vocabulary for many years to come.

The final volume of the dictionary provides indices and appendices, including two separate Tangut character indices using radical and stroke-count lookup. The first radical index (vol. 9 pp. 2–94) is a radical index based on the left side or top part of a Tangut character, as is normal for Tangut dictionaries compiled in China, and comprises 444 primary radicals numbered LR1 through LR444, and 29 supplementary radicals numbered LR+1 through LR+29. All but ten of these 473 radicals are already encoded as Tangut components, and two of the ten unencoded radicals are alternative forms of encoded components where the alternative form (given in parentheses below) is only used to classify its own corresponding ideograph:

- LR364: 𐰇 (𐰇) where the parenthetical form only indexes U+186D6 𐰇
- LR419: 𐰉 (𐰉) where the parenthetical form only indexes U+187A4 𐰉

According to the principles adopted for encoding Tangut components, radicals that are only used to classify their own corresponding ideograph are not encoded separately (see WG2

Table 1: Proposed Tangut Components

C/P	No.	Radical	Strokes	Glyph	Example Ideograph	Ideograph	Note
18D82	771	RR3	1	\	𐰇		
18D83	772	RR4	1	,	𐰈		
18D84	773	RR14	2	𐰉 (𐰊)	𐰋, 𐰌(𐰍)		1
18D85	774	RR34	3	𐰎	𐰏		
18D86	775	RR53	4	𐰐	𐰑		
18D87	776	RR73	4	𐰒 (𐰓)	𐰔		
18D88	777	RR81	4	𐰕	𐰖		
18D89	778	RR102	5	𐰗	𐰘		
18D8A	779	RR128*	5	𐰙	𐰚(𐰛)		
18D8B	780	RR138	5	𐰜 (𐰝)	𐰞		
18D8C	781	RR154	5	𐰟	𐰠		
18D8D	782	RR160	5	𐰡	𐰢		
18D8E	783	LR177	5	𐰣 (𐰤)	𐰥, 𐰦		2
18D8F	784	LR190 RR185	5	𐰧	𐰨(𐰩), 𐰪(𐰫)		3

¹ RR14 𐰉 occurs in the two semantically-related characters U+17121 𐰋 *kji*² ‘scorched’ and U+17C51 𐰌 *tšjiw*² ‘burnt’. It looks like a cosmetic variant of Component 34 𐰉, but it is consistently written as 𐰊, and so should actually be a distinct component. See “Glyph corrections for four Tangut ideographs” (WG2 N5237 = L2/23-148) and “Evidence for Glyph Forms of U+17121 and U+17C51” (L2/23-155).

² LR177 𐰣 is used both as the unencoded head component in the ideographs 𐰥 and 𐰦, and also as a left-side component corresponding to Component 323 𐰣 in the ideographs 𐰧 and 𐰨 (in this usage it is the same as RR176 which corresponds to the right side of ideographs such as 𐰩 and 𐰪).

³ LR190/RR185 𐰧 (with a dot) contrasts with LR105 𐰧 (without a dot) which is encoded as Component 198, and indexes U+17D0C 𐰨 in Hán Xiǎománg’s dictionary. In Lǐ Fànwén’s 2008 Tangut dictionary, which was the main source for the encoded Tangut repertoire, U+17D0B 𐰨 and U+180DF 𐰪 are both written with the dotless component, which are the forms inherited in the code charts. In 2014, we discussed the correct glyph forms for these and other related characters (see N4588R2 = L2/14-209R *Tangut glyph corrections* section 4.1 on pp. 82–83), but did not reach a conclusion. As the dotted forms of U+17D0B 𐰨 and U+180DF 𐰪 used in Hán Xiǎománg’s dictionary match the glyph forms shown in *Homophones*, it is reasonable to now update the code chart glyphs for these two characters to use the dotted form of the component. See “Glyph corrections for four Tangut ideographs” (WG2 N5237 = L2/23-148).

C/P	No.	Radical	Strokes	Glyph	Example Ideograph	Ideograph	Note
18D90	785	RR189	5	彡	彡	U+1724C 彡	
18D91	786	RR191	5	彣	彣		
18D92	787	RR193	6	彤	彤		
18D93	788	RR198	6	彥	彥		
18D94	789	RR204	6	彥	彥	U+17000 彥	
18D95	790	LR210	6	彥	彥		
18D96	791	RR226*	6	彥	彥		
18D97	792	LR231	6	彥	彥(彥)		
18D98	793	RR248	6	彥	彥		
18D99	794	RR256	6	彥	彥		
18D9A	795	RR261	6	彥	彥		
18D9B	796	RR264	6	彥	彥		
18D9C	797	RR265	6	彥	彥		
18D9D	798	LR274 RR271	6	彥	彥(彥), 彥		4
18D9E	799	RR274*	7	彥	彥		
18D9F	800	RR275	7	彥(彥)	彥	U+17100 彥	
18DA0	801	RR276	7	彥	彥	U+17684 彥	
18DA1	802	RR284	7	彥	彥		
18DA2	803	RR294	7	彥	彥		
18DA3	804	RR295	7	彥(彥)	彥	U+171CA 彥	
18DA4	805	RR296	7	彥	彥		
18DA5	806	RR306	7	彥(彥)	彥		

⁴ RR187 has the same glyph as LR274/RR271 彥 (two dots), but is counted as five strokes. I suspect that the glyph for RR187 is a mistake for Component 343 彥 (only one dot), which is the expected component for the characters indexed under RR187.

18DF3	884	RR491	14	𦍉	𦍉	U+181D2 𦍉	

⁵ RR487 is listed under 13 strokes, and the dictionary glyph has a dot on right side (13 strokes); the three ideographs indexed under RR487 (U+18050 𦍋, U+17AC1 𦍋, and U+181CD 𦍋) also show a final dot on the right side in the dictionary entries. However, the code chart glyphs for these three ideographs are all without a final dot, which matches the glyph forms shown in primary sources such as *Homophones* and *Sea of Writing* where none of the entries show a final dot on these three ideographs. Therefore, I believe that the final dot on RR487 and three associated ideographs in Hán Xiǎománg's dictionary should be a mistake, and propose to encode the dotless form of the component (12 strokes) rather than the actual form shown in the dictionary.

3. Character Properties

3.1 Unicode Character Properties

The following entries for Tangut components should be added to the UnicodeData.txt file:

```

5. Proposal Summary Form

**SO/IEC JTC 1/SC 2/WG 2
PROPOSAL SUMMARY FORM TO ACCOMPANY SUBMISSIONS
FOR ADDITIONS TO THE REPERTOIRE OF ISO/IEC 10646⁶.**

Please fill all the sections A, B and C below.

Please read Principles and Procedures Document (P & P) from <http://www.dkuug.dk/JTC1/SC2/WG2/docs/principles.html> for guidelines and details before filling this form.

Please ensure you are using the latest Form from <http://www.dkuug.dk/JTC1/SC2/WG2/docs/summaryform.html>.

See also <http://www.dkuug.dk/JTC1/SC2/WG2/docs/roadmaps.html> for latest Roadmaps.

A. Administrative

1. Title:	<i>Proposal to encode 114 Tangut components</i>
2. Requester's name:	<i>Andrew West</i>
3. Requester type (Member body/Liaison/Individual contribution):	<i>Individual contribution</i>
4. Submission date:	<i>2023-10-02</i>
5. Requester's reference (if applicable):	
6. Choose one of the following:	
This is a complete proposal:	<input type="checkbox"/>
(or) More information will be provided later:	<input type="checkbox"/>

B. Technical – General

1. Choose one of the following:		
a. This proposal is for a new script (set of characters):	<input type="checkbox"/>	
Proposed name of script:	<i>Tangut Components Supplement</i>	
b. The proposal is for addition of character(s) to an existing block:	<input type="checkbox"/>	
Name of the existing block:		
2. Number of characters in proposal:	<i>114</i>	
3. Proposed category (select one from below - see section 2.2 of P&P document):		
A-Contemporary <input type="checkbox"/>	B.1-Specialized (small collection) <input type="checkbox"/>	B.2-Specialized (large collection) <input type="checkbox"/>
C-Major extinct <input type="checkbox"/>	D-Attested extinct <input type="checkbox"/>	E-Minor extinct <input type="checkbox"/>
F-Archaic Hieroglyphic or Ideographic <input checked="" type="checkbox"/>	G-Obscure or questionable usage symbols <input type="checkbox"/>	
4. Is a repertoire including character names provided?	<input type="checkbox"/>	
a. If YES, are the names in accordance with the "character naming guidelines" in Annex L of P&P document?	<input type="checkbox"/>	
b. Are the character shapes attached in a legible form suitable for review?	<input type="checkbox"/>	
5. Fonts related:		
a. Who will provide the appropriate computerized font to the Project Editor of 10646 for publishing the standard?	<i>Andrew West</i>	
b. Identify the party granting a license for use of the font by the editors (include address, e-mail, ftp-site, etc.):	<i>Andrew West</i>	
6. References:		
a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided?	<input type="checkbox"/>	
b. Are published examples of use (such as samples from newspapers, magazines, or other sources) of proposed characters attached?	<input type="checkbox"/>	
7. Special encoding issues:		
Does the proposal address other aspects of character data processing (if applicable) such as input, presentation, sorting, searching, indexing, transliteration etc. (if yes please enclose information)?	<input type="checkbox"/>	

8. Additional Information:

Submitters are invited to provide any additional information about Properties of the proposed Character(s) or Script that will assist in correct understanding of and correct linguistic processing of the proposed character(s) or script. Examples of such properties are: Casing information, Numeric information, Currency information, Display behaviour information such as line breaks, widths etc., Combining behaviour, Spacing behaviour, Directional behaviour, Default Collation behaviour, relevance in Mark Up contexts, Compatibility equivalence and other Unicode normalization related information. See the Unicode standard at <http://www.unicode.org> for such information on other scripts. Also see Unicode Character Database (<http://www.unicode.org/reports/tr44/>) and associated Unicode Technical Reports for information needed for consideration by the Unicode Technical Committee for inclusion in the Unicode Standard.

⁶ Form number: N4102-F (Original 1994-10-14; Revised 1995-01, 1995-04, 1996-04, 1996-08, 1999-03, 2001-05, 2001-09, 2003-11, 2005-01, 2005-09, 2005-10, 2007-03, 2008-05, 2009-11, 2011-03, 2012-01)

C. Technical - Justification

1. Has this proposal for addition of character(s) been submitted before? If YES explain	<i>NO</i>
2. Has contact been made to members of the user community (for example: National Body, user groups of the script or characters, other experts, etc.)? If YES, with whom? If YES, available relevant documents:	<i>NO</i>
3. Information on the user community for the proposed characters (for example: size, demographics, information technology use, or publishing use) is included? Reference:	<i>NO</i>
4. The context of use for the proposed characters (type of use; common or rare) Reference:	<i>rare</i>
5. Are the proposed characters in current use by the user community? If YES, where? Reference:	<i>YES</i>
6. After giving due considerations to the principles in the P&P document must the proposed characters be entirely in the BMP? If YES, is a rationale provided? If YES, reference:	<i>NO</i>
7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)?	<i>YES</i>
8. Can any of the proposed characters be considered a presentation form of an existing character or character sequence? If YES, is a rationale for its inclusion provided? If YES, reference:	<i>NO</i>
9. Can any of the proposed characters be encoded using a composed character sequence of either existing characters or other proposed characters? If YES, is a rationale for its inclusion provided? If YES, reference:	<i>NO</i>
10. Can any of the proposed character(s) be considered to be similar (in appearance or function) to, or could be confused with, an existing character? If YES, is a rationale for its inclusion provided? If YES, reference:	<i>YES</i> <i>YES</i>
11. Does the proposal include use of combining characters and/or use of composite sequences? If YES, is a rationale for such use provided? If YES, reference: Is a list of composite sequences and their corresponding glyph images (graphic symbols) provided? If YES, reference:	<i>NO</i>
12. Does the proposal contain characters with any special properties such as control function or similar semantics? If YES, describe in detail (include attachment if necessary)	<i>NO</i>
13. Does the proposal contain any Ideographic compatibility characters? If YES, are the equivalent corresponding unified ideographic characters identified? If YES, reference:	<i>NO</i>
