Question: It is marked in N712 that 15137 should be unified with/to 15250. But the former is a BMP character, we can't remove a BMP character.

2-2914 (KXI 0401.310; T6-5D26; SCJK9.0 16668) is unified to 0-614C (KXI 0398.090; T1-637D; SCJK9.0 16509) and is suggested to be put into the suggested CJK Compatibility Zone in Plane 2.

Draft Comments on Extension B
