Supplementary Compatibility Characters from TCA

In the last WG2 meeting, TCA has proposed 517 Compatibility Characters. Because of the continuous unification work in IRG on SuperCJK 9.0 and 10.0, there are more characters have been unified. Among these unified characters, there are 15 characters from TCA should be also treated as Compatibility Characters. TCA will further submit these characters to WG2 to be included into ISO 10646 Part 2 Plane 2.
