Meeting :   19th IRG Meeting, Macao, China

Title :   Two more ideographic strokes for CJK_C1

Status :   To be considered

Although most ideographic strokes have been encoded in CJK (including Ext.A and B) or submitted to CJK_C1 by IRG members, there are two ideographic strokes are found missing. Ideographic strokes are important for ideograph decomposition, analysis and for making ideographic strokes subset. Chinese linguists suggest to add these two ideographic strokes to CJK_C1.
