Meeting: IRG#22 @ Chengdu

Title: A correction to Japanese subset data for IICore1.1

Keywords: (none)

Status: Member Body Contribution

Proposed Conclusion / Requested Action: To incorporate the reported correction into the latest IICore data.

Background

Japanese subset data for IICore (aka CJK Subset) was based on the first edition of ITSCJ Trial Standard 0007 published in 2003 (hereafter "TS 0007"). As summarized in Japan Activity Report for IRG#22 meeting, TS 0007 was revised to reflect input from public review results and the second edition has been published in 2004 (<http://www.itscj.ipsj.or.jp/ipsj-ts/02-07/coreset/toc.htm>). The impact of the change by this revision to IICore is almost nothing; no change is needed to the subset itself but a few corrections on a source information data.

Change detail

Japan requests to change source information data for IICore1.1 as follows:

From: 099E2 T1A H1A

To: 099E2 T1AJ1AH1A

From: 09A08 J1A K0A P0A

To: 09A08 K0A P0A
