

Universal Multiple-Octet Coded Character Set  
UCS

ISO/IEC JTC1/SC2/WG2 IRG N 1247

Date: 2006-11-24

Doc. Type:	Member body contribution
Title:	Activity Report form TCA
Source:	TCA
Status:	Input to IRG
Action:	For Your Information
Distribution:	IRG Members and Ideographic Experts
No. of pages:	5
Reference:	IRGN1254(IRG#28_Invitation_TCA).pdf
Medium:	Electronic

1. Invitation for IRG#28 meeting:

TCA was available for hosting the IRG #28 meeting. BMSI (Bureau of Standards, Metrology and Inspection, the organization for standardization in Taiwan) and CMEC (Chinese Foundation for Digitization Technology) will be in charge of the logistics of IRG #28 meeting. The logistic information of IRG #28 meeting was provided in the document named “IRG #28 Taipei meeting Logistic Information”.

2. New standard fonts for Chinese characters:

The MOE (Ministry of Education) in Taiwan had published a set of new standard fonts for the Chinese characters in planes 3-7 of CNS 11643. They are true type fonts in Song style. The set of true type fonts is reviewed by BMSI right now. They will be published in next year by BMSI. Because the true type fonts for T-source ideographs in CJK-B are included in the set of true type fonts, TCA cannot provide those true type fonts before the reviewing work was completed by BMSI.

3. Revise of CNS 14649:

Based on the project from BMSI, CMEC revised CNS 14649 by means of combining ISO/IEC 10646:2003 with ISO/IEC 10646 Amendment 1:2005. The revised CNS 14649 will be reviewed by BMSI next year. And it will replace two old standards CNS 14649-1 and CNS 14649-2, which came from ISO/IEC 10646-1:2000 and ISO/IEC 10646-2:2001, respectively.

4. Chinese characters for Taiwanese dialect:

The MOE in Taiwan will publish about 300 frequently used Chinese characters for Taiwanese dialect in December 2006. The MOE had collected many hundred Taiwanese

dialect ideographs from Taiwanese documents and publications. In past 2 years, MOE reviewed those characters and then choice about 300 frequently used characters as the first reference set of Taiwanese ideographs.

5. Revise of MOE's "Dictionary of Chinese character variants":

The Dictionary of Chinese character variants version 5 (<http://140.111.1.40/main.htm>) was published in January 2004 by National Languages Committee, MOE. In the dictionary, the Chinese characters variants were collected from more than 60 ancient and modern dictionaries and relative documents (see Appendix: "Reference list of the Dictionary of Chinese Character Variants" ). The revising work for the dictionary is in progress. By comparing all the Chinese characters in the dictionary with all the CJK unified ideographs in ISO/IEC 10646:2003, there were about 40,000 characters found outside the UCS.

## Appendix: Reference list Dictionary of Chinese Character Variants

No.	Dictionary	Author • Edit
01	說文解字(大徐本) 說文解字(大徐本)新附	東漢・許慎著 宋・徐鉉注
