Title: **fonts for CJK main, Ext. A and C**
Source: **Kim, Kyongsok,** Head of Delegation
Status: **National Position of Rep. of Korea**
Action: **For consideration by JTC1/SC2/WG2/IRG**
Date: **2008-11-10**

1, Korea will provide the first version of fonts for CJK main, Ext. A, and Ext. C by Dec. 31, 2008. The fonts can be used for the first draft of the next edition of ISO/IEC 10646

2. However, the fonts are not the final version.
We plan to improve the quality of the fonts and provide the final version later (say, by June, 2009, to be determined later) which will eventually be used for the next "official" edition of ISO/IEC 10646.

3. Therefore, we suggest that IRG should not review the glyphs in K column in the first draft of the next edition of ISO/IEC 10646, based on the wrong assumption that K column fonts used therein are the final version.
