ISO/IEC JTC1/SC2/WG2/IRG N 1707

Date: **2010-06-24**

ISO/IEC JTC1/SC2/WG2
Coded Character Set
Secretariat: Japan (JISC)

Doc. Type: **Input to ISO/IEC 10646**

Title: **ISO/IEC 10646: Review document for CJK Unified Ideographs Extension B**
Source: **ISO/IEC 10646 Project Editor**
Project: JTC1 02.10646
Status: For review by IRG
Date: 2010-06-24
Distribution: IRG
Reference:
Medium:

Summary: To facilitate review of the CJK Unified Ideographs Extension B shown in multi-column format, this document presents a modified format (from the charts used in the 3rd edition CD of ISO/IEC 10646) with an additional source UCS-xxxxx showing the original glyph as presented in the ISO/IEC 10646:2003. This makes easy to compare the original single-column glyph with the new multi-column glyphs. In the case of single source, it is expected that the two glyphs should be nearly identical.

The UCS source has been appended at the last position and is shown after other sources. It would have been preferable to show it at the first position, but this is not possible with the current chart tool without introducing significant regression risk.

The page count for the CJK Unified Ideographs Extension charts starts at 1298 and ends at 2139 because they are extracted from a larger document.

This document should be only used for review purpose and should not be distributed outside of IRG reviewers to avoid confusion with the original charts included in ballots documents associated with ISO/IEC 10646 3rd edition.

Universal Multiple-Octet Coded Character Set UCS

ISO/IEC JTC1/SC2/WG2/IRG NXXXX
Date: 2010-09-30

Source:	Chen Zhuang
Title:	Consolidated comments of 1st round review on IRGn1707 (Ext. B Multi-column)
Actions required	To be reviewed and discussed by IRG members at IRG#35, Macao
Distribution:	IRG members
Pages:	28
Appendixes:	5
Medium :	Electronic

This document contains comments of 1st round review on IRGn1707 (Ext. B Multi-column), from China, Japan, R.O.Korea, Vietnam, TCA and HKSAR.

All comments recorded in tables defined in IRGn1700 (editorial report of IRG#34) are re classified for your easy review and discussion at IRG#35.
See appendixes please：

1. WrongGlyph: to be corrected
2. Unification: questioned
3. GlyphCorrectness: questioned
4. FontChanged: to be confirmed
5. FontError&Others: to be corrected

Other comments from Japan and HKSAR are copied below without any change, for your convenience.

HKSAR comments:

General Comments

(1) For G-source characters, their KX codes are incomplete, e.g. U+2822D

[KX1237.280], U+29307

[KX1390.220] and

U+2A103 [KX1487.170].

(2) Also for G-source characters, the source reference 'GHC' may be not specific enough, as many G-characters are mapped to the same source reference, e.g.

, 
and

.

(3) For many UCS characters with the radical 齒, there are font quality problems of having 'white dots' on both end of the horizontal bar in the lower part, e.g.

,

UCS-2A686 and
UCS-2A68E .

(4) There are also similar cases for UCS characters with the radical where the crossing of bars are having ‘white dots’, e.g.
UCS-2A6B0 ,
UCS-2A6B6 and
UCS-2A6BB .

Japan comments:

Comments type 1 and 2 of Japan are copied here:

(1) Problems regarding conclusions in DaNang meeting (IRG N1632)
I copied them here to remind all people that these problems should have been resolved.

(2) GKX source issues
These comments are related to G_KX glyphs/fonts only, I'm asking Chinese editors to review them and report to IRG#35.

(1) Problems regarding conclusions in DaNang meeting (IRG N1632)

Problems in this part is already concluded in DaNang meeting and recorded in IRG N1632, but not processed in IRG N1707.

---

(2) GKX source issues

The G source reference has a prefix GKX-, meaning this particular glyph is taken from the Kangxi dictionary. However, the current G glyph is different from that on Kangxi.

26487	UCS-26487	26487 羽 124.11 GKX-0959.18 T7-4871	wrong glyph	In T Glyph, two sub-components similar to 工 enclosed by a component similar to 己 on the upper left should be changed to components similar to ユ and 匚 as in 2003 glyph and G glyph.	It is not apparent that this particular difference of shapes is that of abstract shape or of physical shape, but based on the observations on other characters having similar components (e.g., 2649B vs 2649E, or 264AB vs 264AF), the difference of the components seems to be considered as a difference in abstract shapes. So, using the current T glyph breaks the unification rules. G glyph of this character has a separate comment.	J	T
264e1	UCS-264E1	264E1 而 126.11 V0-413D UCS-264E1	wrong glyph	non-unifiable change because of Annex S 1.4.2 (different relative positions of components)		J	V
26566	UCS-26566	26566 耳 128.6 T6-4D35 UCS-26566	wrong glyph	non-unifiable change because of Annex S 1.4.2 (different relative positions of components)		J	T

2669D	UCS-2669D	2669D 肉 130.6 GKX-0980.15 T5-2F67	wrong glyph	In T glyph, move the lower dot in a middle component to higher position as in 2003 glyph and/or G glyph.	The current T glyph appears as a combination of 月 (肉) and 冰. On the other hand, in 2003 glyph, two dots are placed on the uppler left corner of a component similar to 水. There are significant differences and to be considered as two separate abstract shapes. Putting the current T glyph here breaks unification rules.	J	T

259BA	UCS-259BA	259BA 穴 116.9 GKX-0867.03  T5-4832	unification	In G glyph, the enclosed vertical stroke in the lower component should be changed to two strokes forming a shape similar to 人 as in 2003 glyph and/or T glyph.	These two components are considered to have different abstract shapes (see S.1.4.3) and not to be unified. Using the current G glyph breaks unification rules. Moreover, the G source reference has a prefix GKX-, meaning this particular glyph is taken from the Kangxi dictionary, but the current G glyph is	J	G

UCS Code	Glyph in UCS 2003	Glyph in CD	Comment type	Comment	Note	Comments from	Related IRG Members
					different from that on Kangxi. The Kangxi dictionary shows a shape more similar to T glyph. The Kangxi glyph is as follows:		
25A10	竆 UCS-25A10	25A10 穴 116.12 GKX-0868.36 T4-574E	unification	In T glyph, components should be rearranged as 2003 glyph and/or G glyph.	The current T glyph arranges three components 穴, 貢, and 刂 differently from 2003 glyph, and it is considered to have a different abstract shape (see S.1.4.2 Different relative positions of components).	J	T
25F17	糲 UCS-25F17	25F17 米 119.12 GKX-0912.40 UCS-25F17	Unification	In G glyph, the shape of the upper right component should be more similar to 2003 glyph's. IRG editors also need to discuss on GKX- source reference.	It is not apparent whether we can unify this particular difference, but we have another character 25F21, and it seems not wise two make such a change. However, there is another concern on this character. The G source reference to this character is prefixed by GKX-, meaning this particular glyph is from the Kangxi dictionary,	J	G

UCS Code	Glyph in UCS 2003	Glyph in CD	Comment type	Comment	Note	Comments from	Related IRG Members
					although the kangxi glyph is more similar to the current G glyph and it is questionable to indicate this 2003 glyph as GKX- source. We need a discussion what we should do on this character.

Review of IRG-1707 (Extension B)
2010-09-30: Expert Contribution (US/Unicode)

- Dr. Richard Cook (UTC; UC Berkeley; Wenlin Institute)
- Dr. Ken Lunde (Adobe Systems)

The results of our Extension B review are presented below under two main categories, (A) **Major Issues**, (B) **Other Issues**.

A: Under "Major Issues" we include (1) ordering "off-by-one" errors; (2) glyph errors that result in an apparent duplicate of another encoded character. [An inadvertent glyph change resulted in a duplicate; this suggests that the characters in question are/ were unifiable as known variants of the same abstract character (though of course, not unifiable after the fact)].

B: Under "Other Issues" we include a number of issues relating to: errors/changes in CNS (1992 and 2007) glyphs; glyph changes to component structure and stroke stypes that may or may not reflect intentional/allowable unifications evident in original encoding work (with reference to SuperCJK14). It is possible that a G or T glyph is adhering closely to a primary mapping source, and thus exhibits a completely proper range of variation. [It is useful to consult SuperCJK14, to see the range of variation (or errors) accepted in unifications in the original encoding work, even if SuperCJK14 at present has no formal status in Unicode/ISO 10646.]

A third category for **VSource** has been omitted. VSource has too many errors: we have excluded most comments on that category from our review. The most troublesome TSource issues relate to glyph changes when there is no other source besides TSource (see suggestion #3 below).

Suggestions for future work:

(1) A consolidated comment chart should be generated, colorizing each cell flagged by any reviewer, for the next round of review.

(2) The "original versioned UCS glyph" (including chart overlays, if any) should be made a permanent fixture of all future multi-column charts, if only for internal use. The term "original versioned UCS glyph" needs to be well-defined: it is specific to each versioned chart font glyph.

(3) VSource glyphs should be completely re-done, with focus on the original TSource print/dictionary sources

[Note: CJK Glyphs appearing below reflect available OS glyphs, and do not necessarily reflect our preference. Please consult the referenced chart glyphs.]

A. Major Issues

𠮩 U+23085 T missing (see 𠮪 U+23086)
𠮪 U+23086 T glyph wrong (see 𠮩 U+23085)
𠔃 U+24503 UCS = CNS 1992; T = CNS 2007 (same as 𠔭 U+2450D)
𠘬 U+2462C UCS = CNS 1992; T = CNS 2007 (same as 𠘱 U+24631)
𤪡 U+24BA1 UCS = CNS 1992; T = CNS 2007 (same as 𤪤 U+24BA4)
𠰶 U+24C36 G & UCS = CNS 1992; T = CNS 2007 (same as 𠱓 U+24C53; cp. 𠦀 U+26980)
𡅉 U+25149 UCS = CNS 1992; T = CNS 2007 (same as 𡅕 U+25155)

B. Other Issues

𢧍 U+229CD UCS = CNS 1992; T = CNS 2007
𢧿 U+229FF UCS uses 入, but G and T use "人" (unifiable difference; see SuperCJK14)
𢪾 U+22ABE (unifiable difference?; see SuperCJK14)
𢫂 U+22AC2 UCS = CNS 1992; T = CNS 2007; (T: "P" stroke, UCS: "HP")
𢬳 U+22BA3 G includes extra stroke (unifiable difference?; see SuperCJK14)
𢮈 U+22BC8 G and T are different from UCS (unifiable difference?; see SuperCJK14)
𢯭 U+22BED G and T are different from UCS (unifiable difference?; see SuperCJK14)
𢰱 U+22BF1 G uses 火 component (unifiable difference?; see SuperCJK14)
𢶀 U+22C80 UCS = CNS 1992; T = CNS 2007 (T has wrong component; see also SuperCJK14)
𢻇 U+22D87 G and T are different from UCS
𢻛 U+22D9B G and T are different from UCS
𢻪 U+22DAA UCS = CNS 1992; T = CNS 2007 (different comp structure; unifiable difference?; attested in SuperCJK14)
𢼽 U+22DBD V is different from UCS
𢽏 U+22E0F T missing two strokes; UCS = CNS 1992; T = CNS 2007 (all strokes in SuperCJK14)
𢾄 U+22E84 G and T are different from UCS

Feedback to IRG Member Bodies' Review Comments on H-source Characters in N1707 (Round 1 Review of Ext B Multi-column Code Chart)

Comments made by Japan

U+26E88

26E88	龔 UCS-26E88		font format ? should be checked	The H glyph should be shifted to the left. (This seems a font problem and not a layout problem.)		J	H

Response

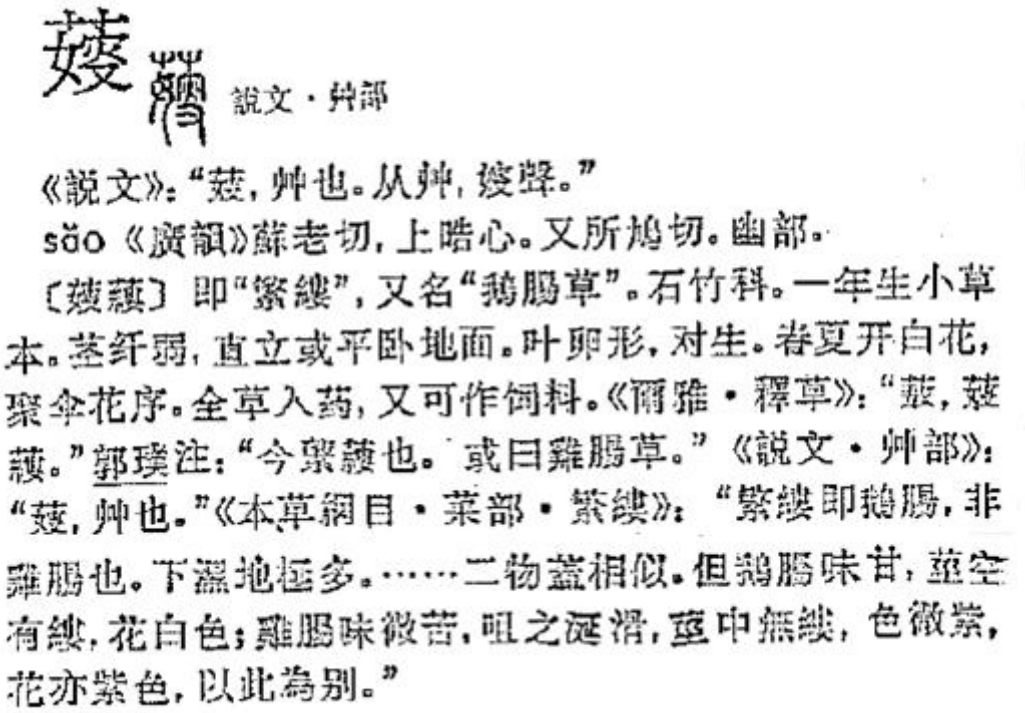
We have checked our fonts and confirmed that it is a layout problem, not a font problem.

U+26E8B

26E8B	蘩 UCS-26E8B	26E8B 艸 140.12 蘩 GKX-1056.27 蘩 T7-3253 蘩 H-8753 蘩 UCS-26E8B	wrong glyph/ unification	G & T	蘩	J	G, T (also H)

Response

The H-glyph 26E8B 蘩 is supported by *Hanyu Da Zidian* (《漢語大字典》):



蘩 說文・艸部

《說文》:"蘩,艸也。从艸,敏聲。"

sǎo《廣韻》蘇老切,上晧心。又所鳩切。幽部。

〔蘩蔞〕即"繁縷",又名"鵝腸草"。石竹科。一年生小草本。莖纖弱,直立或平卧地面。叶卵形,对生。春夏开白花,聚伞花序。全草入药,又可作饲料。《爾雅・釋草》:"蘩,蘩蔞。"郭璞注:"今繁縷也。或曰雞腸草。"《說文・艸部》:"蘩,艸也。"《本草綱目・菜部・繁縷》:"繁縷即鵝腸,非雞腸也。下濕地極多。……二物蓋相似。但鵝腸味甘,莖空有縷,花白色;雞腸味微苦,咀之涎滑,莖中無縷,色微紫,花亦紫色,以此為别。"

Title:	Feedback to comments on G-source Characters in IRG n1707 (Round 1 Review of Ext B Multi-column Code Chart)
Pages:	1
Appendixes:	5
Medium :	Electronic

This document contains feedback to comments of 1st round review on IRGn1707 (Ext. B Multi-column) on G-source Character.
All comments are responsed in corresponding documents, which are clearly labelled in titles of appendixes.

See appendixes please：

1. Feedback for A1.WrongGlyph
2. Feedback for A2.Unification
3. Feedback for A4.GlyphChange
4. Feedback for A5.FontError&Other
5. Feedback for ConsolidatedComments

HKSAR comments:

(1) For G-source characters, their KX codes are incomplete, e.g. U+2822D GKX-1237.28 [KX1237.280], U+29307 GKX-1390.22 [KX1390.220] and U+2A103 GKX-1487.17 [KX1487.170].

Response:

The number after dot indicate the sequence of character in current page. For example, GKX01237.28 means the 28th character in page 1237 in Kangxi Dictionary.

(2) Also for G-source characters, the source reference 'GHC' may be not specific enough, as many G-characters are mapped to the same source reference, e.g.

27D27 貝 154.2

, 28CA3 長 168.10

and 2A5B1 鼻 209.9

.

(3) Response:

The comment is reasonable.

Japan comments:

The G source reference has a prefix GKX-, meaning this particular glyph is taken from the Kangxi dictionary. However, the current G glyph is different from that on Kangxi.

Response:

Table 1 lists glyphs which are modified and supported by the latest version of Hanyu Da Zidian（《汉语大字典》）.The corresponding entries in Hanyu Da Zidian are added in the Note column.

Table 2 lists wrong G glyths which need to be corrected.

Table 1

Code	Glyph in UCS 2003	Glyph in CD	Comment type	Comment	Note
25B70			GKX		25BA2			GKX	In G glyph overshooting of particular four horizontal strokes should be adjusted as in 2003 glyph and/or T glyph. Although the difference in this case could be classified as “difference in overshooting at the end of a stroke”, the shape as a whole is significantly different. it is very likely that we should consider this case to have a different abstract shape (hence not to be unified.)	25C31			GKX		325f39			GKX	G	25f42			GKX	G
