Title:	CJK Editorial Group Report of CJK_E
Meeting:	IRG#38, Gyeongju, R.O.Korea
Status :	To be Approved by IRG plenary
Actions required	To be followed by IRG members
Distribution:	IRG
Medium :	Electronic
Page:	4
Appendix:	3

References:

- IRGN1829 CJK_Ev7.0, its comments and feedbacks (responses)
- IRGN1830 CJK_Ev7.1, its comments and feedbacks (responses)
- IRGN1875 and feedbacks from Vietnam and HKSAR

Editors from China, Japan, R.O.Korea, TCA, HKSAR, USA, Unicode Consortium met during IRG#38. The editors discussed the CJK_E issues as below:

1. Discussion on CJK_E comments

The editors discussed the CJK_Ev7.0 and v7.1 M sets comments with references of comments feedback from China, Japan, Vietnam, HKSAR and TCA. The discussion was focused on Radicals, Stroke counts, First strokes, Kangxi indexes, Glyph/font designs, additional Evidences and unification cases.

The comments on D sets were not discussed. IRG members can submit these characters to CJK_F if they think them no problem or problem solved.

Some unification cases were postponed for more study or additional information.

(For discussion results, see Appendix A and B.)

Most V source characters' radicals are still questioned. The editors noticed the particularity of V characters and understood that Vietnamese editors may have different opinions on choosing radicals of V characters. Since Vietnam agreed to change all questioned radicals as suggested in the CJK_E comments list (see Vietnam's responses to IRGN1875), the editorial meeting agreed to accept all these characters with changes of radicals. (See also Appendix C.)

2. Important technical notes

Stroke count of the component “成” (U+06210) was set 6 to reflect the real writing, although it is counted 7 in Kangxi Dictionary.

Stroke count of the component “象” (U+08C61) was set 12.

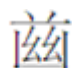

Stroke count of the component “興” (U+08208) was set 16.

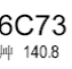

Stroke count of the component “與” (U+08207) was set 14.

The stroke count of components 𡗗 and 𡗘 were discussed but no conclusion was drawn. The editorial meeting agreed to remove characters with these components (in CJK_Ev7.0 and v7.1 comments) from CJK_E. The editors were encouraged to prepare written documents for discussion and revision of IRGN954AR.

Information: IRGN954AR

35	𡗗	𡗘	4	𡗗 𡗘
----	---	---	---	-----

The character SN00588 (G_K06042.17)  was removed from CJK_E. China and Japan were invited to prepare written documents for further discussion on unification/dis-unification of

SN00588 (G_K06042.17) and U+26C73  .
(See also IRGN1824.)

Since there is no convincing evidences or explanations to unify the components 「𡗗」 and 「𡗘」, the editorial meeting agreed to study

the suggested unification cases one by one. We welcome contribution on this issue.

The editors reviewed and discussed issues raised in IRGN1824 Feedback (Mr. Suzuki) and decided not to unify the 4 pairs below because of different shapes.

<div>亭</div> <div>09702</div>	<div>1452.051</div> <div>高</div> <div>71</div>	<div>亭</div> <div>G_ZJW00686</div>	<div>亭</div> <div>20177</div>

3. CJK_E proposal to WG2

The IRG Technical Editor was instructed to generate a final character list for submission to WG2. The editorial group requested the IRG Rapporteur to submit it to WG2 in name of IRG.

- 2012-08-03: CJK_Ev8.0 (IRGN1877) M set (with fixed attributes and fonts) and D set, by the IRG Technical Editor.
- 2012-08-24: Fixing comments on CJK_Ev8.0 M set, to the IRG Technical Editor, by IRG members' chief editors.
- 2012-09-07: CJK_Ev8.1 (IRGN1878) M set and D set, to the IRG Rapporteur, by the IRG Technical Editor.
- 2012-09-21: IRG official proposal on CJK_E with character list (CJK_Ev8.1 M set) to WG2, by the IRG Rapporteur.

Appendix A: Records of CJK_Ev7.0 comments discussion (by Mr. Chen Zhixiang and Mr. Zhang Yifei)

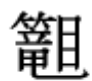

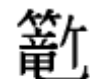

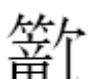

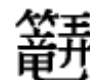

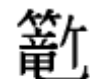

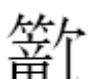

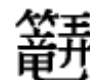

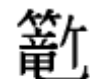

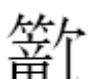

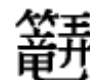

Appendix B: Records of CJK_Ev7.1 comments discussion (by Mr. Chen Zhixiang and Mr. Zhang Yifei)

Appendix C: Comments on the radical decision for V-source ideographs (by Mr. Bear Tseng)

Table 1: Radical corrections, Unifications and Glyph corrections

J comments on remaining issue of SN00588

Comment on the remaining issue recorded in IRG N1824 (Editorial group report in Meeting #37)

- REMAINING ISSUE:

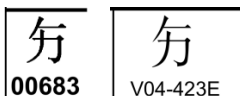

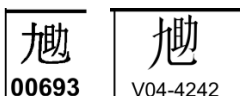

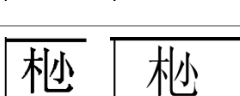

The character SN00588 (G_K06042.17)  was agreed (by the editorial meeting) to be coded in CJK_E rather than unified to U+26C73   , and the J glyph  of U+26C73 will be kept in CJK_B. However, China and TCA proposed to move J4-7644 from U+26C73 to CJK_E. This proposal was postponed for more research.

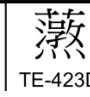

At IRG #37, Japan compromised to keep G_K0642.17 in CJK E candidates for the moment because China showed a dictionary as a non-cognate character. However, Japan didn't agree to change of the rule. In IWDS we already have #153 in UCV (Unifiable Component Variations).

In addition, Japan would like to request China to show the evidence as an IRG document showing G_K0642.17 to separate from u+26c73. Otherwise Japan again insists to unify them.

HKSAR's comments on stroke count of 象 (U+8C61), 興 (U+8208) and 與 (U+8207).

During the review, it was noted that the components 象 (U+8C61), 興 (U+8208) and 與 (U+8207) were assigned different stroke counts in different glyphs as follow:

象 (U+8C61)

Japanese comments on unification of 「𪛗」 and 「𪛘」.

Japan believes 「𪛗」 and 「𪛘」 is unifiable component thus they should be added to UCV list.

Title: Comments on the radical decision for V-source ideographs

From: Bear Tseng

On 100 A.D., Han Dynasty scholar Xu Shen (許慎) firstly introduced “the Six-Principles Theory of ideograph composition” (六書) in his famous dictionary “Shuowen Jiezi” (說文解字). The six principles are “simple indicatives” (指事), “pictograms” (象形), “phono-semantic compound ideographs” (形聲), “compound indicatives” (會意), “derived ideographs” (轉注) and “borrowed ideographs” (假借). The “phono-semantic compound ideographs” are most commonly used to create a new ideograph and there are about 75% ideographs belong to this kind of ideographs. A phono-semantic compound ideograph consists of the radical and the phonetic part. For a phono-semantic compound ideograph, its radical denotes the category that it belongs to and its phonetic part denotes its pronunciation with some kind of non-categorical meaning of it. For an ideograph in any Kangxi-based dictionary, its radical was decided by the dictionary. Otherwise, the radical of an ideograph could be decided by selecting its component without the pronunciation or with categorical meaning. The most difficulty case is that we didn’t know the pronunciation and the meaning of an ideograph. For that case, we could apply the following principles which used in Kangxi-based dictionary to decide the radical of an ideograph:

- (1) left component takes precedence over right component,
- (2) larger component takes precedence over smaller component, and
- (3) lower component takes precedence over upper component.
