References:	N1974

Japanese National Body carefully considered the request from IRG to modify the glyph design of JMJ-057075 to align Mincho-Style, with the font experts from IPA. As a result, we concluded that it is very difficult to modify current glyph design keeping accommodation with the glyph image of the source dictionary.

JNB is welcome to the suggestion or the advice how to modify the current glyph design to accommodate IRG request and source dictionary glyph image.

Following glyph images are taken from a related governmental project report and the source dictionary.

と同字

[新大字典(Shin Dai Jiten)]

The source dictionary glyph image. One of Japanese authentic dictionary treating actually used Han character in Japan. This dictionary is commonly used as a base reference to review application forms of family registration and resident's card. The glyph designs of 戸籍統一文字 and IPAmj明朝 itself are designed based on this dictionary.
