subject: K6-110B for U+25A2B

Dear Prof. Kim,

China has requested to **update GZJW-01380 glyph for U+2B058 in IRG N2805R2**,  
so it will be the same as K6-110B, and K6-110B is not totally the same as  
other sources under U+25A2B.

My suggestion for ROK is to consider to **move K6-110B to U+2B058**, that  
matches G-source glyph.

Thank you for Conifer's finding.

Eiso

## 2. Discussion

- 1) As mentioned in Mr. Eiso's email shown in 1.3 above, there is no dot  
(stroke) in evidence for K6\_110B.

- 2) There is a dot in the glyph for K6-110B in KS X 1027-5. Therefore, there is a  
mismatch between the evidence in 1) and the glyph in KS X 1027-5.

- 3) As shown below, KR found another piece of evidence that matches the glyph  
for K6-110B in KS X 1027-5. (See the attachment 1 for the full text of  
evidence).

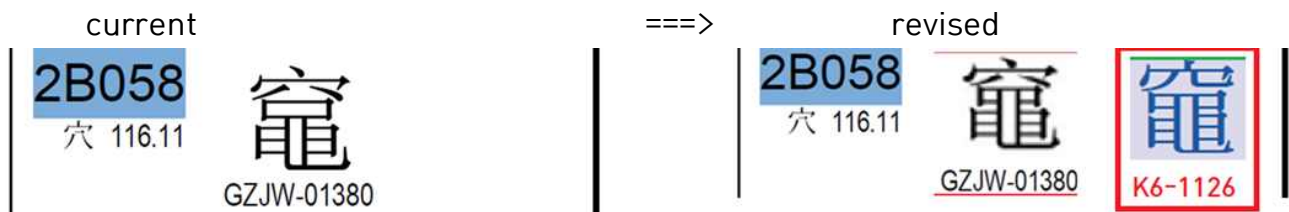

### 3. KR proposal

- 1) KR will modify the glyph for K6-110B in U+25A2B to match evidence. The source reference K6-110B remains unchanged.

- 2) KR will make a horizontal extension for the U+2B058. The source reference will be K6-1126.

- 3) KR will revise KS X 1027-5 by adding one character which matches the glyph for the U+2B058/GZJW-01380.

Note. The glyph of K6-110B in KS X 1026-5 will remain unchanged.
