1. Response to [IRGN2851](#)/[IRGN2853](#)/[IRGN2855](#)

China has reviewed three documents regarding revision suggestions and discussions on Chinese character glyph and resources. Kushim Jiang, Ma Shijie, and Judith Chen have already had in-depth discussions.

The considerations of China are listed in the table below:

UCS code	UCS glyph	Suggestion from Kushim Jiang	Suggestion from Ma Shijie	Suggestion from Judith Chen	China's decision
U+3A17	捷	捷→捷 GHZ-31914.07 →GGFZ-017300		1. Glyph 捷 with component 𠂇 compiles with China's convention of 新字形. 2. The glyph shape of U+3A17 should be consistent with that of U+507C (𨮑), U+5AAB (𨮒) and U+28A7C (𨮓).	1.Accept the suggestion for glyph changing. To distinguish it from the main text of the 通用规范汉字表, the source should not be marked as GCESI-00534. 2.Change the middle component 𠂇 to 𠂈 of U+507C, U+5AAB and U+28A7C as well for the unification case doesn't compile with the glyph rationale. 3.Change the reference of U+507C (𨮑), U+5AAB (𨮒) and U+28A7C (𨮓) to GCESI-00524, GCESI-00525, GCESI-00526.

U+2165F	𣎵		Change the middle component 𠂇 → 𠂆 because the most common glyph is 𣎵 instead of 𣎶. The revision will make it coordinate with the glyph of U+235F8(𣎵), U+26FD9(𣎶) and U+2C33E(𣎵).		1.Accept the suggestion for glyph revision. 2.The reference needs to be changed to GCESI-00527.
U+22843 U+237E5	𣎵 𣎶		Change the upper component 𠂇→𠂆 to make them coordinate with the glyph of U+20425(億) and U+2D7DE(億), for the transcription must follow the original shape of the small seal style 𣎵. glyph 𣎵.		1.Accept the suggestion for glyph revision. 2.The reference of U+22843 needs to be changed to GCESI-00528. 3.The reference of U+237E5 needs to be changed to GCESI-00529.
U+29167	𣎶		Change the lower component 𣎶→𣎵 to match the original shape of the small seal style 𣎶. glyph 𣎶.		1.Accept the suggestion for glyph revision. 2.The reference of U+29167 needs to be changed to GCESI-00530.
U+6287 U+22A8F	𣎶 𣎶		1.The ref. G3-4964 of U+6287 shows the original glyph in GB 7589—1987 should be 𣎶𣎶𣎶. 2.For the glyph changing will result in duplication with U+22A8F, the glyph of U+22A8F should be change to 𣎶𣎶𣎶.	1.Support the viewpoint of Ma Shijie. 2.Change the ref. of U+22A8F from GKX-0420.17 to GKX-0420.16.	1.Accept the suggestion for glyph revision. 2.Accept the suggestion for ref. changing.

U+220B7	𡗗		<p>Revise the glyph of U+220B7 to match the original shape of the small seal style glyph .</p>		<p>1.Traditional dictionaries have inherited this erroneous transcription for a long time including 广韵/集韵, that's why Kangxi Dictionary and Hanyu Dazidian quoted the wrong glyph.</p> <p>2.U+220B7 is a variant of U+97E0 𡗗. 市 市 is a independent radical in Shuowen, which is obviously different with 𡗗 市, and is annotated as '市,𡗗也'. U+220B7 and U+97E0 are both subordinate characters of the radical 市 市, which means the right part of U+220B7 must be 市 instead of 市.</p> <p>3.Accept the suggestion for glyph revision.</p> <p>4.The reference of U+220B7 needs to be changed to GCESI-00531.</p>
U+23326	𡗗		<p>Change the component 𡗗 →  𡗗 to fit original evidence  and .</p>		<p>1.Another same mistake as U+220B7.</p> <p>2.Accept the suggestion for glyph revision.</p> <p>3.The reference of U+23326 needs to be changed to GCESI-00532.</p>
U+4620	袂		<p>Change the component 友 → 友 to make the glyph design of U+4620 compile with U+4620,</p>		<p>1.Another same mistake as U+220B7.</p> <p>2.Accept the suggestion for glyph revision.</p> <p>3.The reference of U+4620 needs to be</p>

			U+629C, U+9FC6 and U+306CD.		changed to GCESI-00533.
U+8669	𧢲		<p>1.Change the component 𠂇 → 小 to fit the glyph shape of 𧢲, and make the glyph design of U+8669 compile with U+9699, U+2113C, U+2DCF3.</p> <p>2.The glyph of U+2E4ED also needs to be revised.</p>		<p>1.The UCS glyph doesn't match the original one 𧢲 in G3. This design must have made adjustments based on the old and new glyph processing methods of 肖 incorrectly.</p> <p>2.Accept the suggestion for glyph revision.</p> <p>3.U+2E4EB(𧢲) &amp; U+2E4ED(𧢲) could be modified in next HE file.</p>
U+26A7F	𧢲		<p>1.Change the component 𠂇 → 𠂇 to fit glyph revision in Hanyu Dazidian.</p> <p>GHZ 𧢲 → GHZR 𧢲</p>		<p>1.Accept the suggestion for glyph revision.</p> <p>2.The reference of U+26A7F needs to be changed to GHZR-53266.19.</p>

## 2. Response to [IRGN2869](#)

China accept the suggestion from Eiso Chan for revising the glyph of U+28B48.

The reference of U+28B48 needs to be changed to GHC-1113820.

## 3. Response to [IRGN2730](#)

In the meeting IRG#63, China responded to CheonHyeong Sim's file IRGN2730 with [IRGN2743](#), the consensus didn't make a decision about the suggestion for disunifying the code point U+6B25.

China have already changed the glyph from 𠂇日欠 to 𠂇日欠 in file [IRGN2805R2](#).

Unicode 16.0

6B25 欠 76.4 𠂇 𠂇 𠂇 𠂇 𠂇

G5-4A39 HB2-CCE9 T2-274A JMJ-014753 K2-3E2D

Unicode 17.0

6B25 欠 76.4 𠂇 𠂇 𠂇 𠂇 𠂇

G5-4A39 HB2-CCE9 T2-274A JMJ-014753 K2-3E2D

In the next working set or UNC proposal, China will submit the data of 𠂇日欠 for encoding.

## 4. Response on [IRGN2871](#)

Accept the suggestion for glyph and reference revision on U+23591 , U+2AA26, and U+3162D .

## 5. The revision table of glyph and references

UCS	Current G-glyph	Revised G-glyph	Current reference	Revised reference
U+3A17	捷	捷	GHZ-31914.07	GCESI-00534
U+507C	倢	倢	GE-312C	GCESI-00524
U+5AAB	媵	媵	GE-362C	GCESI-00525
