Title:	Proposal to Normalize some G-source Characters in CJK-ExtC
Status:	Individual Contribution on IRG #65
Action:	To be considered by IRG and China

## Background

When making the fonts for CJK-ExtC on [Glyphwiki](#), I noticed some **G-source characters whose glyph does not follow G-source convention**. I will list them in this proposal and suggest China to consider modify the glyphs.

## List of Characters

### U+2A735 (倌)

The glyph does not match the G-source convention, on the contrary it matches T-source.

### U+2A790 (孚)

The lower part (子) of the glyph looks weird. In SJ/T 11239-2001 (八辅), it would be 子:

18 区 01 02 03 04 05 06 07 08 09 10 11 12 13 14 15 16 17 18 19
